

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE. *Chicago*
(Berkman Collection)

In this issue of The Almanac and Year-Book, in addition to the regular statistical and other annual features, much material relating to the European war is presented. The conflict, in respect to the number of persons affected and cost in men and money, already ranks as the greatest in history, and many questions, especially as to its origin and early progress, will come up in the future. It is with a view to answering such questions that most of the war data given in this volume have been compiled. Attention may be called to the fact that the diplomatic and other correspondence, issued in the form of official "papers" or "books" by Great Britain, Germany, Russia and Belgium immediately following the outbreak of hostilities, is published in full. The "Yellow Book" issued by France appeared too late to be added to the others, but the official summary of the conclusions reached is given. Information relating to the armed strength of the belligerents, loss of life and property, the use of airships, submarines, automobiles and wireless telegraphy by the armies, naval operations, effect of the crisis on the markets of the world, action taken by the American congress and President Wilson, strategy of the combatants, gigantic war loans and numerous other features of the struggle will also be found in shape for ready reference. A chronology carried up to the latest possible date and a pronouncing gazetteer of places most frequently mentioned in the dispatches from the various war zones have been added.

The story of the trouble between the United States and Mexico, involving the capture and temporary occupation of Vera Cruz, is told at some length.

Important laws passed by congress at its long and eventful session are given in full or in summarized form. The new internal revenue act, with its list of special and stamp taxes to meet the deficiency in the national receipts caused by the war in Europe, will also be found.

INDEX—1915.

ERAS OF TIME.

The Gregorian year 1915 corresponds to the following eras:

The latter part of the 139th and the beginning of the 140th year of the independence of the United States.

The year 1333-34 of the Mohammedan era; the year 1334 begins Nov. 9.

The year 4612 (nearly) of the Chinese era, beginning now Jan. 1.

The year 8024 of the Greek church, beginning Jan. 14.

The year 5675-76 of the Jewish era; the year 5676 begins at sunset Sept. 8.

The year 7423-24 of the Byzantine era, beginning Sept. 1.

The year 2675 of the Japanese era.
The year 6628 of the Julian period, and Jan. 1 is the 2420499th day since the commencement of the Julian period.

CHRONOLOGICAL CYCLES.

Lunar cycle or golden number.....16	
Solar cycle.....20	
Roman indiction.....13	
Dionysian period.....244	

Solar Cycle is the number of years that have elapsed since the days of the week fell on the same days of the year, or when there will, therefore, be a recurrence of the Dominical or Sunday letter. This would be the case every seven years but for leap year, hence four times seven is the cycle, or twenty-eight years. It is the remainder found by adding nine to the year and dividing the sum by twenty-eight. The Roman Indiction is a cycle of fifteen years and is of no utility except to chronologers. It is the remainder found by adding three to the year and dividing by fifteen. The Julian period is a cycle of 7,980 years and is the product of the three cycles, Golden Number (19), Solar Cycle (28) and Roman Indiction (15), and hence shows the time when these cycles will coincide, or begin at the same time. The first of this cycle will be completed in the year 2267; it is the year + 4713. The Dionysian period is a cycle of 532 years and is called the great Paschal cycle, being the product of a completed solar and lunar cycle (28x19). It is the remainder found by adding 457 to the year and dividing by 532, and with the Julian period is chiefly used by chronologers. The Jewish Lunar cycle is always three less than the Golden Number and is used by the Jews in fixing the time of their festivals.

EXPLANATORY NOTE—The Dominical letter or letters (two for leap year), or Sunday letters, indicate the day of the year on which the first Sunday occurs, the first seven letters of the alphabet being used. Thus, for 1914, the Dominical letter is D, the fourth letter of the alphabet, and hence the fourth day of the year will be the first Sunday of the year. In leap years two letters are used, the first being for January and February, and the latter, being the preceding letter, answers for the last ten months, in order to maintain the cycle. The rule for obtaining the Dominical letter for any year is somewhat complicated and for that reason is omitted here. The Golden Number is that number of a cycle of nineteen years which shows how many years have elapsed since the new moon fell on Jan. 1, for in nearly nineteen years the solar and lunar years nearly come together. The chief use of this cycle is in fixing the date of Easter, and in this same connection is used the Epact. The

NOTE—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For example: To know on what day of the week July 4 was in the year 1895, in the table of years look for 1895, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1722 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

CHART OF THE HEAVENS.

EXPLANATION—The chart of the heavens shows all the bright stars and groups visible in the United States, Canada, Cuba and Hawaii. Stars of the third magnitude are sometimes shown in order to complete a figure.

If a bright, uncharted body be seen near the "ecliptic circle" it must be a planet. To locate the planets or moon, refer to the monthly calendar pages in this almanac, find the proper signs on the chart in the "ecliptic circle" and an inspection of that part of the heavens, comparing with the chart, will serve to identify the planet and all surrounding objects.

Because of the earth's motion from west to east (opposite to the direction of the arrow in the chart), the stars rise 4 m. earlier each day or 30 m. per week or 2 hrs. a month. The

chart shows the position at 9 p. m. Then if the position for any other hour be desired, as for 7 p. m., count ahead one month, or back one month for 11 p. m., and so on for any hour of the night, holding the month desired in front as the face looks either to the north or south with name down.

A circle described from the zenith on the "zenith circle" for the desired latitude with a radius of 90 degrees (see graduated meridian) will show what stars are above the horizon. Thus Capella is near the overhead (zenith) point on latitude 40 degrees north Jan. 15, 9 p. m., as will be "big dipper" at 3 a. m. Then from Capella or Algol all the surrounding visible groups can be identified. The "pointers," being 5 degrees apart and always in sight, may be used as a convenient unit of measure; also when visible, the "belt of Orion," 3 degrees, or the sides of the "square of Regulus."

STORY OF OUR WORLD FAMILY FOR 1915.

THE SUN—Mighty as the sun seems to us—and it is more than 1,000,000 times the size of our earth—an astronomer, aided by the most powerful telescope known and stationed on the nearest of the fixed stars, would be unable to see it. If, however, it were possible to see the sun, it would appear as a dim star with a varying degree of brightness, due to the partial interception of its light by the giant planet Jupiter. The influence over our meteoric conditions of the sun during a maximum of sun spots was abundantly illustrated in 1914 and will continue into 1915.

The planets are bodies which revolve about the sun and borrow most of their light from it, while the stars are similar to our sun, each shining by its own light and probably surrounded by a family of planets and comets. Nevertheless, at certain periods the planets are designated as evening and morning stars. An inferior planet (one whose orbit is within that of the earth) can never shine all night, as do the superior planets when opposite the sun. A superior planet is called an evening star, in this almanac, when it rises before midnight.

THE FAMILY OF THE SUN.

1. Mercury.
2. Venus.
3. Earth, with one moon.
4. Mars, with two moons.
5. Asteroids, about 700.
6. Jupiter, with seven moons.
7. Saturn, with nine moons.
8. Uranus, with four moons.
9. Neptune, with one moon.
10. Comets, about 500.

MERCURY—Will be brightest and easily seen as an evening star Feb. 1 to 7 and Sept. 27-Oct. 5, setting in about the same place as the sun and near the close of evening twilight; also March 16 to 23 and Nov. 3 to 10 as a morning star, rising about the time of the beginning of the morning twilight. He will be practically invisible at all other times. No one need err as to the identity of this planet, for at the above named periods he will be the brightest body in the vicinity. He can only be seen by seeking for him at the right time and place, unless the sun's light be hid in eclipse.

VENUS—Will be brightest as a morning star Jan. 1 to 10, when just west of the noted red star Antares, in Scorpio. When viewed at this time with a small telescope or good opera glass she will appear as shown in figure "C" of the annexed cut with the concave side of her crescent away from the sun. All her phases and variations in apparent size are shown in this cut.

As seen in the morning west of sun.

As seen in the evening east of sun.

Explanation.

A—Fifteen days before superior conjunction with the sun, Aug. 27, 1915.

B—At greatest elongation west of the sun, about Feb. 6, 1915.

C—When brightest as a morning star, Jan. 2, 1915.

D—Just after inferior conjunction with the sun; not in 1915.

E—Fifteen days after superior conjunction with the sun, Sept. 27, 1915.

F—At greatest elongation east of the sun, about April 20, 1915.

G—When brightest as an evening star; not in 1915.

H—Just before inferior conjunction with the sun; not in 1915.

As will be seen by the chart "Visibility of the planets" she will continue to recede from the sun until Feb. 6, when she will be at her greatest angular distance west of the sun, $46^{\circ} 54'$. The reason she does not increase in brilliancy up to that time is that she is running away from us too rapidly. From Feb. 6 she will gradually approach the sun until she becomes invisible in September, being at superior conjunction, Sept. 12, and when last to be seen appearing as at A. Then when she is first visible on the other (east) side of the sun as an evening star, she will appear as at E. From then on to the end of the year she will grow brighter as she approaches the earth and recedes from the sun, being very bright at the end of the year.

The conjunctions or near approaches of Venus to the moon during the time she is fairly bright will be as follows: Jan. 12, 9° north; Feb. 10, 7° north; March 12, 3° north; April 10, 2° south; May 11 and June 10, 6° south; July 10, 4° south; Nov. 8, 4° north, and Dec. 8, 1° north. She will be close to other planets as follows: Uranus, March 19, $1^{\circ} 10'$ north; Jupiter, April 15, 9° north; Mars, May 14, $55'$ south, and Saturn, July 17, $38'$ north. Her very close approach to Jupiter on April 15 will make a pretty sight. While their nearest approach takes place before they are above the horizon in the United States, they will be so close at rising and for some time after they will appear almost as one very bright body. The apparent diameter of the moon is about $30'$, hence their distance apart (about $9'$) will be but one-third the apparent diameter of the moon.

Venus' itinerary, for the time she is conspicuously visible, will be as follows: Jan. 1 in Scorpio close to Beta Scorpio, and nearly midway between the Square of Libra and the red star Antares. From Feb. 10 to 20 she will be sailing along westward just north of the Milkmaid's Dipper in Sagittarius. About March 5 to 13, close to the bright stars in the head of the Goat, Capricornus and by April 10 just south of the γ in Aquarius; April 10-11, about midway between the bright stars in the southern Fishes, Fomalhaut and Markhab, which marks the southwest corner of the Great Square of Pegasus; about April 24-26, in line with the east side of the Square of Pegasus and about 10° south of Algenib; about May 20-25, 10° south of the brightest stars in Aries, Hamel and Sheratan, in the head of the Ram; June 8-14, close to and just about south of the Pleiades or seven stars, also known as the Seven Sisters, and from June 20 to 25 just north of the Hyades and Aldebaran in the head of Taurus, the Bull; July 1, just below Elnath, the southernmost star of the beautiful five-sided figure in Auriga in the Milky Way; about July 5, midway between Capella 20° to the north and Betelgeuse, in Orion, to the south. She will be too near the sun for good seeing until in November and December; Nov. 9-10 she will be back to the place where she was at the beginning of the year, midway between Antares and the Square of Libra, and in the middle of November close to Antares; Dec. 5-10 she will pass along the length of the Milkmaid's Dipper, ending the year in Capricornus.

MARS—Will be too near the sun in January to be easily seen. He will be west of the sun and therefore a morning star until Nov. 9, when he will begin his career as evening star, being at that time 90° west of the sun, passing the meridian at 6 a. m. and therefore rising near midnight, and continuing as evening star the remainder of the year. Look for a morning star in the east and an evening star in the west. Our rule for fixing the morning and evening star periods of the superior planets has been criticised, but we believe the most consistent rule is to call them evening stars when they rise in the evening hours and morning stars when they rise in the morning.

Mars will not attain, in this year, his greatest degree of brilliancy possible or usual in a year.

but may be best seen in December. On May 12-16 he will be only about 1° north of the beautiful Venus. The two, with Hamel and Sheratan on the north, form a beautiful trapezoidal figure. His conjunctions or near approaches to the moon will be as follows: Feb. 12, 24° north; March 14, 2° south; April 12, 4° south; May 11, 5° south; June 9, 6° south; July 8, 5° south; August 6, 4° south; Sept. 4, 3° south; Oct. 2, 24° south; Oct. 26, 6° north; Nov. 23, 4° north; and Dec. 26, 6° north. The conjunction of Oct. 2 will be an occultation between latitudes 11 north and 90 north wherever the bodies are above the horizon near the time of conjunction about 8:30 in the evening, or about three hours before they will rise in the United States. Mars will be in an exceedingly interesting quarter of the heavens at this time (Oct. 2) and thereabouts, viz., in Gemini, just south of the beautiful stars, Castor and Pollux, and the cluster Praesepe about midway between him and the Sickle, the Lion, with Regulus at the end of the handle; Procyon will be 10° south, and the glorious Sirius still farther south and west. From Oct. 15-20 he will be passing through the cluster Praesepe, and in December through the Sickle, being in conjunction with the magnificent Regulus Dec. 12 and only about 3° north of that star.

JUPITER—Will be a dim evening star at the beginning of the year, soon becoming invisible as he approaches the sun, which he reaches Feb. 24, after which he will reappear on the other (west) side of the sun as a morning star, and will so remain until about June 19, when he will begin to rise before midnight, and will so continue until the end of the year. He may be called an all night star also in September, when brightest, when he will rise about sunset and shine all night. He will be very close to Mars March 23 in the early morning hours, being the most northern, but the two appearing almost as one body, making a very pretty sight. Again in the morning of April 15 he will have Venus for a close companion.

His near approaches to the moon will be as follows: April 11, 3° south; May 9, 4° south; June 5, 4° south; July 3, Aug. 26, Sept. 22, Oct. 20, Nov. 1 and Dec. 13 the moon will pass about 5° to the north of Jupiter. When brightest in September he will be just south of the great square of Pegasus, forming a neat triangular figure with Markab and Algenib to the north of him. (See chart of the heavens.)

SATURN—Will be nearly at his brightest and may be best seen in January and December, when he will rise near sunset and be an all night star, nearly, being also an evening star until June 28 or until he becomes lost in the light of the sun weeks before that time. When next visible, the latter part of July or in August, he will be a morning star and will remain such until early in October, when he will begin his course as an evening star, remaining such to the end of the year. A beautiful sight will greet early risers in September, as Saturn and Mars travel along in close company, being only about double the amount of the moon's apparent diameter apart. Mars, the red one, and farthest north, Saturn's near approaches to the moon will be as follows: Jan. 27, Feb. 23, March 23, April 19 and May 17, in all of which the moon will pass about 5° north of Saturn; also Aug. 7, Sept. 4, Oct. 1 and 29, Nov. 25 and Dec. 22, in all of which the moon will pass about 3° to the north of Saturn.

Saturn is the possessor of a magnificent and unique set of rings, which may be better seen

this year than will again be the case in fourteen years, or until 1929-1929. At this time the southern faces of the rings are presented to our view; in 1900 it was the northern surfaces and in 1918 it will be the same. These rings are inclined about 28° to the earth's orbit and once in 15 years are edgewise to us, and are then invisible for a considerable time, even to the best telescope, being only about 60 miles thick and one billion of miles distant. Then when the dark or unilluminated side is toward us they again disappear. These various phases are shown in the annexed cut. It is believed that they illustrate the world-building process, an unfinished world, and that in time they will be resolved into other moons to illumine that great planet.

SATURN AND HIS RINGS.

URANUS—Will be brightest Aug. 1-14 and is invisible to the unaided eye except at about that time, when he may be just seen by knowing exactly where to seek him.

NEPTUNE—Will be brightest Jan. 10-26 and is always invisible without optical aid.

COMETS—Several small wanderers of this class were discovered in 1914, but none worth mentioning here.

ZODIACAL LIGHT—This phenomenon is a glow or faint pyramid of light, most noticeable in northern latitudes in the evenings of February and March and the mornings of October and November, shortly after sunset and before sunrise. Near the equator it has been observed as late as midnight and extending early across the heavens. A fainter "counter glow" is frequently observed opposite the principal glow. The light of the moon or even of a bright planet renders the zodiacal light very feeble or invisible. This is believed to be due to the reflection of sunlight on myriads of particles revolving about the sun as a thin ring something like Saturn's rings, and extending to the orbit of the earth or to that of Mars.

EXPORT TRADE IN FOUNTAIN PENS.

[From department of commerce report.]

In the year ended June 30, 1913, the United States exported to about fifty foreign countries 309,200 fountain pens having an average wholesale value of \$1.05 each. In the same year 49,500 ordinary metallic pens were exported. Of the fountain pens exported 169,000 were consigned to England, 53,700 to Canada and 30,900 to France. Germany, Holland and Austria-Hungary were the next in importance as markets for these pens. Considerable quantities were

also sent to Cuba and the British West Indies, Panama, Brazil, Argentina, Chile, India, Japan, Australia and the Philippines. The same countries are in most cases the largest purchasers of American metallic pens. Manufacturers in this country use English and Swedish steel to a large extent in the pen industry. Most of the imported steel pens come from Birmingham, England. A large proportion of the world's supply of gold pens is made in New York city.

NOTE.—On the chart of the heavens the hours of right ascension and subdivisions are marked on the margin, and inasmuch as the planets will always be near or on the ecliptic circle it is a simple matter to locate the above planets at any time on the chart. Thus on April 11 Venus will be in right ascension XVIII^h, and that point

on the outer circle connected with Polaris intersects the ecliptic circle at a point just north of the bowl of the Milkmaid's Dipper, and there Venus will be seen in the middle of April. By the same means Mars will be found close to the Pleiades early in July and close to Regulus and the Sickle in December.

FACTS ABOUT THE SUN AND PLANETS.

Uranus	31,900	1,781,900,000	30,687
Neptune	34,800	2,791,600,000	60,181

The sun's surface is 12,000 and its volume 1,300,000 times that of the earth, but the mass is only 332,000 times as great and its density about one-quarter that of the earth. The force of gravity at the surface of the sun is twenty-seven times greater than that at the surface of the earth. The sun rotates on its axis once in 25.3 days at the equator, but the time is longer in the higher latitudes, from which fact it is presumed that the sun is not solid, at least as to its surface.

THE EARTH AND THE MOON.

Earth.—The equatorial diameter of the earth is 7,926.5 miles and the polar diameter 7,899.5 miles; equatorial circumference, 25,000. The linear velocity of the rotation of the earth on its axis at the equator is 24,840 miles a day, or 1,440 feet a second; its velocity in its orbit around the sun is approximately nineteen miles per second, the length of the orbit being about 560,000,000 miles. The superficial area of the earth, according to Encke, the astronomer, is 197,108,580 square miles, of which two-thirds is water and one-third land. The planetary mass is about 256,000,000 cubic miles.

Moon.—The moon has a diameter of 2,162 miles, a circumference of about 6,800 miles and a surface area of 14,685,000 square miles. Her mean distance from the earth is 238,840 miles. The volume of the moon is about 1/49th that of the earth and the density about 3% that of water. The time from new moon to new moon is 29 days 12 hours 44.6 minutes. The moon has no atmosphere and no water and is a dead world.

Light travels at the rate of 186,300 miles per second. It requires 8 minutes and 8 seconds for light to come from the sun to the earth.

†Explanation: By the absolute scale of magnitudes stars brighter than Aldebaran and Altair are indicated by fractional or negative quantities; thus Vega 0.2 and Sirius -1.4. As the magnitudes increase the brilliancy decreases, each increase of a unit being equal to a decrease of about two and one-half in brightness.

To ascertain when any star or constellation will be on the upper meridian add the number opposite in the column "For Meridian Passage" to the figures in the table on the following page "Sidereal Noon," taking note whether such figures be "Morn." or "Eve." If "Morn." and the sum is more than 12h. the result will be Eve. of same day; if "Eve." and the sum is more than

12h. the result will be Morn. of the next day. Having found the time of meridian passage, for the rising subtract and for the setting add the numbers opposite the star in the column headed "For Rising and Setting" and observe the directions as to Morn. and Eve. given for the meridian passage. Those marked (.....) in the last column are circumpolar stars having an asterisk (*) in the last column are only to be seen in the far south and then near the meridian, as the vapors of the horizon will prevent seeing them when they rise or set. To tell how high up from the nearest point of the horizon a star will be at its meridian passage subtract the star's declination from 90° and if the

result is less than the latitude of the place of the observer that star will neither rise nor set, out is circumpolar, and the difference between that result and the latitude shows the star's altitude above the north point of the horizon or below the southern horizon. Or (90°-dec.)-lat. = alt. or elevation of the star above the nearest point of the horizon at meridian passage for stars of a southern declination. Examples:

Sidereal noon, Oct. 30, 9:23 p. m.
Fomalhaut "in meridian" col., 22:45

Subtract, 32:16
24:00

8:16 p. m. of the 31st.
time of meridian
passage.

Fomalhaut ris. and set. col. add 4:00 for lat. 40° N.

12:16 = 0:16 a. m. of
Nov. 1 the time
of setting.

Fomalhaut, dec. 30° S. 90° - 30° = 60°, -40° = 20°, altitude of Fomalhaut in latitude 40° at its meridian passage. To measure celestial distances with the eye keep in mind that one-third of the distance from the zenith to the horizon is 30°. For smaller measurements use the belt of Orion, 3° long, or the sides of the Square of Pegasus; the "pointers" in the "big dipper," which are nearly 5° apart—a convenient celestial yardstick because always to be seen. In the case of a star whose dec. is such as to bring it nearer to the zenith than to a horizon at meridian passage, it will be more convenient to use its zenith distance as a means of locating it. The difference between the latitude and dec. is this zenith distance. If the dec. is greater than the latitude then such distance is to be counted northward, otherwise southward from the zenith.

SIGNS AND CONSTELLATIONS OF THE ZODIAC.

Until recently it was taken for granted that the present relationship between signs and constellations of the zodiac was generally understood, as all astronomical textbooks mention their disagreement and explain the cause. The numerous letters of inquiry concerning differences between the data in this almanac and certain others show the necessity for this note of explanation.

Thousands of years ago when the zodiac, that belt of the heavens about 12° in width within which move the moon and planets, was formed and divided into twelve parts or seasons called signs, each containing certain star groups called constellations, each was given the name of an object or animal which never did bear any relationship to the configuration of the stars in that group or division, but which did or is supposed to have reference to certain astronomical or other facts. Thus Libra =, the scales or balance, comes at the autumnal equinox when there is an equilibrium or balance between the length of day and night the world over. "Aquarius", the water-bearer, whose sign is the Egyptian sign for running water, comes at the season of greatest rains in Egypt, and so on.

Since the time when these divisions were made and named, owing to the precession of the equinoxes, resulting from the differing polar and equatorial diameters of the earth, the signs have moved back west nearly a whole division or constellation and where ♈ was the first, ♋ now is. Hence, though the sun now enters the sign ♈ March 20, it is a month later when he enters the constellation ♈. It must be apparent, therefore, that any supposed influence or relationship which early astrologers attributed to the position of the sun, moon or planets when in certain of these divisions can no longer exist, as the sign now only represents that space or division of the zodiac where the controlling constellation was 2,000 or more years ago, but is not now. Nevertheless some almanacs still give the signs for the moon's place, which is very misleading to those who attempt to follow her in her course among the stars. Hence, this almanac gives the constellation and discards the ancient picture of the disemboweled man as relics of the age of superstition. The sign is retained for sun's place in connection with the seasons and sun's path through the zodiac each month because of its relationship to the equinoxes and solstices.

VISIBILITY OF THE PRINCIPAL PLANETS, 1915.

EXPLANATION—The light spaces show the approximate time and extent of visibility of the planets named. Each of the small divisions represents 15° of arc or 1 hour of time. The width of the light-colored space is the measure of the angular distance of the planet from the sun, east or west.

PLANETS BRIGHTEST OR BEST SEEN, INVISIBLE, EVENING AND MORNING AND ALL NIGHT STARS.

MERCURY (♿) will be brightest as an evening star Feb. 1 to 7 and Sept. 27 to Oct. 5, setting shortly after the sun, and near the same place; also as a morning star March 16 to 23 and Nov. 3 to 10, rising about 1h. before the sun and near the same point of the horizon. He will be practically invisible at all other times.

VENUS (♀) will be brightest Jan. 1 to 10 as a morning star, which she will continue to be until Sept. 11, or until she is lost in the morning twilight somewhat before that time. When next visible she will be on the east side of the sun as an evening star and so continue to the end of the year, when she will set some two hours after the sun.

MARS (♂) will be too near the sun in January to be well seen. He will be a morning star, being west of the sun until about Nov. 9, when he may be considered an evening star, and he remains so until the end of the year. He will not attain his greatest brightness possible or usual this year, but will be best seen toward the close of the year, and he will continue to increase in brightness until the latter part of February, 1916, when he will be only about one-hi-fteenth as bright as in 1907.

JUPITER (♃) will be a rather dim evening star at the beginning of the year, becoming invisible in February and March. Then he will reappear on the other (west) side of the sun as

a morning star, and will so continue until about the middle of June, when he will begin his course as an evening star, remaining such to the end of the year, though also called an all night star during most of September, rising at sunset Sept. 17, and brightest Sept. 12 to 22.

SATURN (♄) will be nearly at his brightest of the year at its beginning and close and may be best seen in January and December, being at these times nearly an all night star. He will be an evening star until June 23 or as long as visible, for he will be invisible for some weeks before and after that date. When next visible, the latter part of July or early in August, he will be a morning star and will so continue until about Oct. 10, when he will again be an evening star and will so continue until the end of the year.

URANUS (♅) will be brightest Aug. 1 to 14.

NEPTUNE (♆) will be brightest Jan. 10 to 23.

Both Uranus and Neptune are invisible to the naked eye at all times.

NUMBER OF THE STARS.

According to the best astronomers the number of stars that can be seen by a person of average eyesight is only about 7,000. The number visible through the telescope has been estimated by J. E. Gore at 70,000,000 and by Profs. Newcomb and Young at 100,000,000.

CHART SHOWING LIGHT AND DARK MOON, 1915.

EXPLANATION—The small spaces represent 3 h. of time or 1 h. in each the morning and evening, and the middle division is the midnight line. The light portions show approximately the number of hours of moonlight and the dark the reverse, in each night of the year. Thus in

January the 1st is all light, 5th dark until 9 p. m., 8th dark until midnight, 11th dark until 3 a. m. and on the 15th dark all night. On the 18th it will be moonlight until 9 p. m.; 23d to midnight; 26th to 3 a. m. and 30th all night.

ECLIPSES IN 1915.

There will be two eclipses in 1915, both of the sun, as follows:

- I. Annular Feb. 14, invisible in United States; visible in Indian ocean, Australia, etc.
- II. Annular Aug. 10, invisible in U. S.; visible in Pacific ocean, Asia, etc.

NOTE—All eclipses occur in series, the first one of which will take place at one of the poles and the last one at the opposite pole. The whole

number in a series of lunar eclipses covers a period of about 865 years and in the case of the sun about 1,200 years. Two is the least number that can occur in any one year and seven the greatest. When two occur both must be of the sun, as this year, and when there are seven five must be of the sun, as will be the case in 1917 and 1935.

HUNTER'S AND HARVEST MOON.

The full moon nearest to Sept. 21 is popularly known as the "harvest moon." This is because the moon then rises, for several consecutive evenings, at nearly the same hour, giving an unusual number of moonlight evenings. This is the

most noticeable in the higher latitudes and quite disappears at the equator.

The "hunter's moon" is the first full moon following the harvest moon.

BERLIN AND NEW YORK WIRELESS COMMUNICATION.

Wireless press messages between Germany and the United States were exchanged for the first time Feb. 12, 1914. The stations used were at Sayville, L. I., and Nauen, twenty-five miles from Berlin. These are about 4,000 miles apart, but little difficulty was experienced in reading the messages at either end as the conditions for transmission were declared to be perfect. On

the invitation of the Atlantic Communication company The Associated Press and a number of newspapers sent greetings to the Berlin newspapers, to the Wolff bureau, Emperor William, Ambassador James W. Gerard and Mayor Wermuth of Berlin, cordial replies being received from all.

TIME AND STANDARDS OF TIME.

Various kinds of time are in use in this country:

1. Astronomical Time or Mean Solar Time—This is reckoned from noon through the twenty-four hours of the day and is used mainly by astronomical observatories and in official astronomical publications. It is the legal time of the dominion of Canada, though "standard" and "mean" time are in general use there as in this country.

2. Mean Local Time—This is the kind that was in almost universal use prior to the introduction of standard time. This time was based upon the time when the mean sun crosses the meridian, and the day begins at midnight. When divided into civil divisions—years, months, weeks, days, etc.—it is sometimes called civil time.

3. Standard Time—For the convenience of the railroads and business in general a standard of time was established by mutual agreement in 1883 and by this calculation trains are now run and local time is regulated. By this system the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour (7½° or 30m. on each side of a meridian), commencing with the 75th meridian. The first or eastern section includes all territory between the Atlantic coast and an irregular line drawn from Buffalo to Charleston, S. C., the latter city being

its southernmost point. The second or central section includes all the territory between this eastern line and another irregular line extending from Bismarck, N. D., to the mouth of the Rio Grande. The third or mountain section includes all the territory between the last named line and nearly the western borders of Idaho, Nevada and Arizona. The fourth or Pacific section includes all the territory of the United States between the boundary of the mountain section and the Pacific coast. Inside of each of these sections standard time is uniform and the time of each section differs from that next to it by exactly one hour, as shown on the map.

Owing to the eccentricity of the earth's orbit and the inclination of the equator to the ecliptic, the apparent motion of the sun is retarded or accelerated according to the earth's place in its orbit. Hence, to take the actual sun as a guide would necessitate years, days and their subdivisions of unequal length. Therefore an imaginary or "mean sun" was invented. The difference between apparent and mean time is called the "equation of time" and may amount to a quarter of an hour in twenty-four hours. It is the difference between the figures in "Sun at noon mark" column in calendar and twelve hours. The figures on a correct sun dial give the apparent time.

STANDARDS OF TIME.

The following is the table of times, based upon the meridians used by the United States and Canada:

NAME OF TIME.	Degrees.	Central meridian from Greenwich.	Nearest place.
Intercolonial or Atlantic.....	60	4 hours west.....	About 3¼ degrees east of Halifax, N.S.
Eastern.....	75	5 hours west.....	Between New York and Philadelphia
Central.....	90	6 hours west.....	St. Louis and New Orleans.
Mountain.....	105	7 hours west.....	Denver, Col.
Pacific.....	120	8 hours west.....	14 degrees east of Sacramento, Cal.
Sitka.....	135	9 hours west.....	1 degree east of Sitka, Alaska.
Tahiti.....	150	10 hours west.....	1 degree west of the island of Tahiti
Hawaiian.....	157½	10 hrs. 31 min. west.	Near center of Molokai.

It is obvious that to express the time of rising and setting of the sun and moon in standard time would limit the usefulness of such data to the single point or place for which it was computed, while in mean time it is practically correct for places as widely separated as the width

of the continent (see note at bottom of February calendar), and persons having obtained the mean time by the rising or setting of the sun or moon may easily ascertain the correct standard time of any event by making use of the following table and map:

All the calculations in this Almanac and Year-Book are based upon mean or clock time unless otherwise stated. The sun's rising and setting are for the upper limb, corrected for parallax and refraction. In the case of the moon no correction is needed, as in the sun, for "parallax and refraction"; with her they are of an opposite nature and just balance each other. The figures given, therefore, are for the moon's center on a true horizon such as the ocean affords. The calculations in each of the geographical divisions of each calendar page will apply with sufficient accuracy to all places in the contiguous

North American zones indicated by the headings of the divisions.

The heavy dotted lines show the arbitrary (standard) divisions of time in the United States. The plus and minus marks on either side of the meridian lines show whether it is necessary to add to or subtract from the mean time of points east or west of these lines to arrive at actual standard time. Example: Chicago is $2\frac{1}{4}^{\circ}$ east of the 90th meridian; therefore Chicago local time = $2\frac{1}{4} \times 4 = 10$ to be subtracted from mean time = standard time, and for Boston standard (eastern) time, 16m. must be subtracted from mean time.

The national holidays, such as July 4, New Year's, etc., are such by general custom and observance and not because of congressional legislation. Congress has passed no laws establishing holidays for the whole country. It has made Labor day a holiday in the District of Columbia, but the law is of no effect elsewhere. It has also designated the second Sunday in May as "Mothers' Day."

1 cubic inch	= 16.387 cubic millimeters.
1 cubic foot	= 0.02832 cubic meter.
1 cubic yard	= 0.7645 cubic meter.

ELECTRICAL UNITS DEFINED.

Ohm—Unit of resistance; represents resistance offered to an unvarying electric current by a column of mercury at the temperature of ice, 14.5421 grams in mass, of a cross-sectional area of 1.00003 square millimeters and of the length of 106.3 centimeters.

Ampere—Unit of current; decomposes .0009324 of a gram of water in one second or deposits silver at the rate of .001118 of a gram per second, when passed through a solution of nitrate of silver in water.

Volt—Unit of electro motive force; one volt equals one ampere of current passing through a substance having one ohm of resistance.

Coulomb—Unit of quantity; amount of electricity transferred by a current of one ampere in one second.

Farad—Unit of capacity; capacity of a condenser charged to a potential of one volt by one coulomb. A microfarad is one-millionth of a farad.

Joule—Unit of work; equivalent to energy expended in one second by one ampere current in one ohm resistance.

Watt—Unit of power; equivalent to work done at the rate of one joule per second. A kilowatt is 1,000 watts.

LIBRARY OF CONGRESS.

The Library of Congress was established in 1800 in the city of Washington, D. C. It was burned in 1814, and in 1851 lost 35,000 volumes by fire. The present library building, which cost \$3,347,000, was opened to the public in November, 1897. It is located a short distance east of the capitol and is the largest and finest building of its kind in the world.

June 30, 1913, the Library contained 2,123,255 books and pamphlets, 135,333 maps, 638,098 pieces

of music and 360,494 photographs, prints, engravings and lithographs. The copyright office is a distinct division of the library with its own force of employees. The total number of employees in the library is 494 and the annual cost of maintenance is now about \$753,000, including \$200,000 for printing and binding.

The Librarian of Congress is Herbert Putnam, salary, \$3,500; chief assistant Librarian, Appleton P. C. Griffin, \$4,000.

UNION OF SOUTH AFRICA.

Sept. 29, 1909, the British parliament passed an act empowering the four self governing colonies of South Africa—Cape of Good Hope, Natal, Transvaal and Orange Free State—to form a federal government to be known as the Union of South Africa. This was proclaimed May 31, 1910, at Pretoria, the seat of government, other services taking place at Cape Town, the seat of the legislature.

The executive government is vested in the king, represented by a governor-general, and an executive council and in ten ministers of state. Legislative power is vested in a parliament consisting of a senate and a house of assembly. The senate contains forty members, eight of whom are nominated by the governor-general in council and thirty-two elected by the four provinces, each of which is entitled to eight senators. The assembly consists of 121 members, chosen in electoral divisions as follows: The Cape of Good Hope, 51; Natal, 17; Transvaal, 36; Orange Free State, 17. Senators are elected for ten years and assemblymen for five. The English and Dutch languages are both official.

Imports and Exports.—The total imports of the four states in 1913 were valued at \$209,144,000 and the exports at \$332,846,820. Exports to the United States in 1914, \$2,469,849; imports, \$14,834,974.

THE MONROE AND DRAGO DOCTRINES.

The "Monroe doctrine" was enunciated by President Monroe in his message to congress Dec. 2, 1823. Referring to steps taken to arrange the respective rights of Russia, Great Britain and the United States on the northwest coast of this continent, the president went on to say:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which the rights and interests of the United States are involved that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power."

"We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

DRAGO DOCTRINE.

When in the winter of 1902-03 Germany, Britain and Italy blockaded the ports of Venezuela in attempt to make the latter country settle up its debts Dr. L. F. Drago, a noted jurist of Argentina, maintained that force cannot be used by one power to collect money owing to its citizens by another power. Prominence was given to the contention by the fact that it was officially upheld by Argentina and favored by other South American republics. The principle embodied has become generally known as the "Drago doctrine."

LODGE RESOLUTION.

In connection with the reported attempt of Japan to obtain land for the establishment of a naval base in Magdalena bay on the western coast of Mexico, the senate of the United States adopted the following resolution Aug. 2, 1912:

"Resolved, That when any harbor or other place in the American continents is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such relation to another government not American, as to give that government practical power of control for national purposes."

WORK OF UNITED STATES CENSUS BUREAU.

The bureau of the census in the department of commerce in Washington, D. C., is charged with the duty of taking periodical censuses of the population, agriculture, manufactures and mines and quarries of the United States together with such special statistics as are required by congress from time to time. The next general or decennial census will be taken in 1920. A census of electrical industries is taken every fifth year; the last one was taken in 1913 and consequently the next will be taken in 1918, for the statistics of 1917. Other regular censuses include:

Wealth, debt and taxation: taken every tenth year; latest statistics are for fiscal year ending June 30, 1913.

Manufacturing industries: taken every fifth year; next report will relate to calendar year 1914.

Agriculture: taken at ten-year intervals; next census will be taken late in fall of 1915 and will relate to the crops of that year.

Religious bodies: taken every tenth year; next census will be taken in 1916.

Water transportation on coast and inland waters of the United States: taken every tenth year; next census will cover the year 1916.

The annual reports issued by the bureau include mortality and birth statistics; financial

statistics of cities with a population of 30,000 or statistics relating to cotton production and consumption and statistics showing the amount of tobacco of various kinds on hand on April 1 and Oct. 1 of each year.

Special reports issued include studies of racial classes of population; population of metropolitan districts; Indian population; negro population; supplementary occupation statistics, embracing occupations of adults and children, occupations of women, occupations of children, occupations of the foreign born and unemployment; fecundity of women; general statistics of cities; statistical atlas; plantation study in the southern states; age of the farmer in relation to tenure and size of farm, stability of farm population; inmates of institutions (prisoners and juvenile delinquents, paupers in almshouses, insane and feeble-minded), the blind and the deaf, and special monographs.

The present director of the census is William J. Harris of Georgia. The director is appointed by the president and receives a salary of \$4,000 a year. The chief clerk is William L. Austin and the chief statisticians are: Le Grand Powers, finance and municipal statistics; William M. Stewart, manufactures; William C. Hunt, population; Creasy L. Wilbur, vital statistics; Charles S. Sloan, geographer.

NONCONTIGUOUS POSSESSIONS OF THE UNITED STATES.

THE PHILIPPINE ISLANDS.

The Philippine Islands were ceded to the United States by Spain Dec. 10, 1898. Maj.-Gen. Merritt was the first military governor. He was succeeded in August, 1899, by Maj.-Gen. E. S. Otis, who in turn was followed in May, 1900, by Maj.-Gen. Arthur MacArthur. The last named remained in office until July 4, 1901, when the military authority was transferred to Gen. A. R. Chaffee. By order of the president Gen. Chaffee was relieved of his duties as military governor July 4, 1902, and the office terminated. The Philippine commission was at the same time made the superior authority. Sept. 2 the islands were divided into three military departments, to be known as the department of Luzon, the department of Visayas and the department of Mindanao. July 1, 1902, congress passed an act providing temporarily for the government of the Philippines, providing for the election by popular vote, two years after a census of the islands had been taken and published, of delegates to an assembly consisting of not more than 100 members nor less than fifty, apportioned among the provinces as nearly as possible according to population. This assembly should, together with the Philippine commission appointed by the president of the United States, exercise the legislative power heretofore exercised by the commission alone, the members of the commission acting as an upper house and the elected assemblymen as lower house. The members of the assembly were to hold office two years and annual sessions of the legislature not exceeding ninety days in length were to be held.

The first election was held July 30, 1907, when eighty members of the legislature were chosen, the total vote being 97,903. The first session was formally opened Oct. 16 by William H. Taft, United States secretary of war, the first civil governor of the islands after they came into American possession. Sergio Osmena was elected president.

Officials and Salaries.—The Philippine commission consisted in October, 1913, of Francis B. Harrison of New York, Henderson S. Martin of Kansas, Clinton L. Riggs of Maryland, Winfred T. Denison of New York, Rafael Palma, Victorino Mapa, Jaime C. de Veyra, Vicente Ilustre and Vicente Slingson of the Philippines. The officers in 1913 were:

Governor-General—Francis Burton Harrison.
Vice-Governor—Henderson S. Martin.
Secretary Interior Department—Winfred T. Denison.
Secretary Finance and Justice—Victorino Mapa.
Secretary Public Instruction—Henderson S. Martin.
Secretary of Commerce and Police—Clinton L. Riggs.

Treasurer—Jeremiah L. Manning.
Director of Education—Frank L. Crone.
Director of Posts—William T. Nolting.
Attorney-General—Ramon Avancena.
Chief Justice Supreme Court—Cayetano S. Arellano.

The governor receives \$19,400 a year (\$18,000 as governor general) and the other American commissioners receive \$13,900 each (\$9,400 being for their services as heads of departments). The commissioners not heads of departments get \$6,750 each. The salaries of other leading officials are: Executive secretary, \$6,750; secretary to the governor-general, \$5,000; second, third and fourth executive secretaries, \$4,000 each; auditor, \$6,000; collector of customs, \$5,400; attorney-general, \$5,500; chief justice Supreme court, \$10,000; associate justice, \$10,000; director of education, \$5,000; director of posts, \$5,400; treasurer, \$5,000; director of public work, \$6,500; director of lands, \$5,400; director of science, \$5,400; director of forestry, \$2,800; collector of internal revenue, \$5,400; director of agriculture, \$5,000; purchasing agent, \$5,000; director of printing, \$4,500.

Area and Population.—The total land and water area of the Philippine archipelago is 332,968 square miles; land area, 115,026; population (es-

timated 1912), 8,460,052. The population of Manila in 1910 was 334,408. The population of the principal islands in 1903 was: Bobol, 243,148; Cebu, 592,247; Jolo, 44,718; Leyte, 357,641; Luzon, 3,798,507; Marinduque, 50,601; Mindanao, 499,634, of whom 252,940 are uncivilized; Negros, 460,776 (21,217 uncivilized); Panay, 743,646 (14,933 uncivilized); Samar, 222,690.

Products and Climate.—The chief products are hemp, sugar, coffee, tobacco, leaf, copra, cigars and indigo. Between 600,000 and 700,000 bales of hemp are exported annually.

The climate of the Philippine islands is considered excellent for the tropics. The mean temperature in Manila ranges from 77 in January to 83 in May. June, July, August and September are the rainy months. March, April and May the hot and dry, and October, November, December, January and February the temperate and dry.

Trade with the United States.—The shipments of merchandise from the United States to the Philippines in the fiscal year ended June 30, 1914, amounted in value to \$27,304,587, as compared with \$25,354,793 in 1913. The principal articles sent were: Breakfast, \$1,098,068; cotton manufactures, \$6,706,094; iron and steel manufactures, \$7,424,234; mineral oils, \$1,351,724. The imports into the United States amounted in value to \$18,162,312, as compared with \$21,010,248 in 1913. The principal articles imported were: Unmanufactured manila, \$9,713,695; sugar, \$2,553,601; tobacco, \$1,385,944.

Imports and Exports.—The total imports of the Philippine islands in the fiscal year 1913 amounted to \$56,329,533; total exports, \$53,633,326.

ISLAND OF PORTO RICO.

Porto Rico, according to the decision of the United States Supreme court in the insular cases May 27, 1901, is a territory appurtenant and belonging to the United States, but not a part of the United States within the revenue clause of the constitution. The island was ceded to the United States by Spain in 1898 and was under military rule until the Foraker law went into effect May 1, 1900. In accordance with the third section of that act, the legislative assembly of Porto Rico having put into operation a system of local taxation to meet the necessities of government, President McKinley on the 25th of July, 1901—the anniversary of the landing of American troops on the island in 1898—proclaimed free trade between the United States and Porto Rico.

Government.—Civil government, under the provisions of the Foraker act, was established May 1, 1900. The upper house consists of eleven members, six of whom are "cabinet" officers appointed by the president; the lower house is made up of thirty-five delegates elected by the people every two years. The governor, who is appointed by the president, has practically the same duties as the governor of any other territory of the United States. The present officers are: Governor, Arthur Yager; secretary, Martin Travieso; treasurer, Allan H. Richardson; commissioner of education, E. G. Balnter; attorney-general, Wolcott H. Pitkin, Jr.; auditor, J. W. Bonner; commissioner of interior, Manuel Domenech; director of labor, charities and correction, Manuel Camunas; United States district judge, Peter J. Hamilton; resident commissioner in the United States, Luis Munoz Rivera.

Area and Population.—The area of Porto Rico is 3,435 square miles and the population in 1910 was 1,118,012, of which 65.5 per cent was white, 30 per cent mulatto and 4.5 per cent black. The cities having more than 5,000 inhabitants in 1910 were: San Juan, 48,716; Ponce, 35,005; Mayaguez, 16,583; San Pedro de Macoris, 4,125; Yaguajay, 5,839; Caguas, 10,354; Guayama, 8,321.

Commerce.—For the year ended June 30, 1914, the total domestic exports from Porto Rico to foreign countries were \$5,675,516, and to the United States, \$34,027,610. Foreign imports amounted to \$3,838,419 and imports from the United States amounted to \$31,764,695. Of the exports Spain took \$1,568,364; Cuba, \$5,087,885; France, \$541,911; Germany, \$496,068; Austria-Hungary, \$1,601,988.

The leading articles of export are coffee, oranges, brown sugar and tobacco.

THERMOMETERS COMPARED.

There are three kinds of thermometers, with varying scales, in general use throughout the world—the Fahrenheit, Reaumur and centigrade. The freezing and boiling points on their scales compare as follows:

	Freezing pt.	Boiling pt.
Fahrenheit	32 degrees	212 degrees
Reaumur	zero	80 degrees
Centigrade	zero	100 degrees

The degrees on one scale are reduced to their equivalents on another by these formulas:

Fahrenheit to Reaumur—Subtract 32, multiply by four-ninths.

Fahrenheit to Centigrade—Subtract 32, multiply by five-ninths.

Reaumur to Fahrenheit—Multiply by nine-fourths, add 32.

Reaumur to Centigrade—Multiply by five-fourths.

Centigrade to Fahrenheit—Multiply by nine-fifths, add 32.

Centigrade to Reaumur—Multiply by four-fifths.

NOTES—The word "citizen" as used in above table means citizen of the United States in all cases.

As shown in the above table women have full suffrage in Colorado, Idaho, Utah, California,

Washington, Wyoming, Arizona, Kansas and Oregon. In Illinois they can vote for all officials except those specified in the state constitution. In a more or less limited form, relating to taxation and school matters, woman suffrage exists in Delaware, Idaho, Indiana, Iowa, Kentucky, Louisiana, Massachusetts, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, North Dakota, Oklahoma, South Dakota, Texas, Vermont and Wisconsin. The residence requirement is continuous residence immediately prior to election day.

CITIZENSHIP IN THE UNITED STATES.

All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. (Fourteenth amendment to the constitution.)

All persons born in the United States and not subject to any foreign power, excluding Indians not taxed, are declared to be citizens of the United States. (Sec. 1992, U. S. Revised Statutes.)

All children heretofore born or hereafter born out of the limits and jurisdiction of the United States, whose fathers were or may be, at the time of their birth, citizens thereof, are declared to be citizens of the United States; but the rights of citizenship shall not descend to children whose fathers never resided in the United States. (Sec. 1993, U. S. Revised Statutes.)

Any woman who is now or may hereafter be married to a citizen of the United States and who might herself be lawfully naturalized shall be deemed a citizen. (Sec. 1996, U. S. Revised Statutes.)

Children born in the United States of alien parents are citizens of the United States.

When any alien who has formally declared his intention of becoming a citizen of the United States dies before he is actually naturalized the widow and children of such alien are citizens.

Children of Chinese parents who are themselves aliens and incapable of becoming naturalized are citizens of the United States.

Children born in the United States of persons engaged in the diplomatic service of foreign governments are not citizens of the United States.

Children born of alien parents on a vessel of a foreign country while within the waters of the United States are not citizens of the United States, but of the country to which the vessel belongs.

Children born of alien parents in the United States have the right to make an election of nationality when they reach their majority.

Minors and children are citizens within the meaning of the term as used in the constitution.

Deserters from the military or naval service of the United States are liable to loss of citizenship.

Any alien being a free white person, an alien of African nativity or of African descent may become an American citizen by complying with the naturalization laws.

"Hereafter no state court or court of the United States shall admit Chinese to citizenship; and all laws in conflict with this act are repealed." (Sec. 14, act of May 6, 1883.)

The courts have held that neither Chinese, Japanese, Hawaiians, Burmese nor Indians can be naturalized.

The naturalization laws apply to women as well as men. An alien woman who marries a citizen, native or naturalized, becomes a naturalized citizen of the United States.

Allens may become citizens of the United States by treaties with foreign powers, by conquest or by special acts of congress.

In an act approved March 2, 1907, it is provided that any American citizen shall have expatriated himself when he has been naturalized in any foreign state in conformity with its laws, or when he has taken an oath of allegiance to any foreign state.

When any naturalized citizen shall have resided for two years in the foreign state from which he came, or five years in any other foreign state, it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place of residence during said years; provided, however, that such presumption may be overcome on the presentation of satisfactory evidence to a diplomatic or consular officer of the United States, under such rules and regulations as the department of state may prescribe; and, provided also, that no American citizen shall be allowed to expatriate himself when this country is at war.

Any American woman who marries a foreigner shall take the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States, or by returning to reside in the United States, or if residing in the United States at the termination of the marital relation, by continuing to reside therein.

Any foreign woman who acquires American citizenship by marriage to an American citizen shall be assumed to retain the same after the termination of the marital relation if she continues to reside in the United States, unless she makes formal renunciation thereof before a court having jurisdiction to naturalize aliens, or if she resides abroad, she may retain her citizenship by registering as such before a United States consul within one year after the termination of such marital relation.

A child born without the United States, of alien parents, shall be deemed a citizen of the United States by virtue of the naturalization of or resumption of citizenship of the parent; provided that such naturalization or resumption takes place during the minority of such child; and, provided further, that the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the United States.

All children born outside the limits of the United States, who are citizens thereof in accordance with the provisions of section 1993 of the Revised Statutes of the United States (see above), and who continue to reside outside of the United States, shall, in order to receive the protection of the government, be required, upon reaching the age of 18 years, to record at an American consulate their intention to become residents and remain citizens of the United States and shall further be required to take the oath of allegiance to the United States upon attaining their majority.

NATURALIZATION LAWS.

Approved June 29, 1906.

Exclusive jurisdiction to naturalize aliens resident in their districts is conferred upon the United States Circuit and District courts and all courts of record having a seal, a clerk and jurisdiction in actions in law or equity or both in which the amount in controversy is unlimited.

An alien may be admitted to citizenship in the following manner and not otherwise:

1. He shall declare on oath before the clerk of the proper court at least two years before his admission, and after he has reached the age of 18 years, that he is bona fide his intention to become a citizen of the United States and to renounce allegiance to any foreign state or sovereignty. Such declaration shall set forth the same facts as are registered at the time of his arrival.

2. Not less than two years nor more than seven after he has made such declaration he shall file a petition, signed by himself and verified, in

which he shall state his name, place of residence, occupation, date and place of birth, place from which he emigrated, name of the vessel on which he arrived; the time when and the place and name of the court where he declared his intention of becoming a citizen; if he is married, he shall state the name of his wife, the country of her nativity and her place of residence at the time the petition is filed, and if he has children, the name, date and place of birth and place of residence of each child living. The petition shall also set forth that he is not a disbeliever in or opposed to organized government or a member of any body of persons opposed to organized government, and that he is not a polygamist or a believer in polygamy; that he intends to become a citizen of and to live permanently in the United States, and every other fact material to his naturalization and required to be proved upon the final hearing of his application. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens. At the time of the filing of the petition there shall be also filed a certificate from the department of commerce and labor stating the date, place and manner of his arrival in the United States and the declaration of intention of such petitioner, which certificate and declaration shall be attached to and be a part of his petition.

3. He shall, before he is admitted to citizenship, declare on oath in open court that he will support the constitution of the United States, and that he absolutely renounces all allegiance to any foreign prince, potentate, state or sovereignty.

4. It shall be made apparent to the satisfaction of the court admitting any alien to citizenship that immediately preceding the date of his application he has resided continuously within the United States five years at least, and within the state or territory where such court is at the time held one year at least, and that during that time he has behaved as a man of good moral character, attached to the principles of the constitution. In addition to the oath of the applicant, the testimony of at least two witnesses, citizens of the United States, as to the facts of residence, moral character and attaching to the principles of the constitution shall be required.

5. He must renounce any hereditary title, or order of nobility which he may possess.

6. When any alien, who has declared his intention, dies before he is actually naturalized the widow and minor children may, by complying with the other provisions of the act, be naturalized without making any declaration of intention.

Immediately after the filing of the petition the clerk of the court shall give notice thereof by posting in a public place the name, nativity and residence of the alien, the date and place of his arrival in the United States and the date for the final hearing of his petition and the names of the witnesses whom the applicant expects to summon in his behalf. Petitions for naturalization may be filed at any time, but final action thereon shall be had only on stated days and in no case until at least ninety days have elapsed after the filing of the petition. No person shall be naturalized within thirty days preceding a general election within the territorial jurisdiction of the court.

No person who disbelieves in or who is opposed to organized government, or who is a member of or affiliated with any organization entertaining and teaching such disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers of the government of the United States, or of any other organized government, because of his or their official character, or who is a polygamist, shall be naturalized.

No alien shall hereafter be naturalized or admitted as a citizen of the United States who cannot speak the English language. This requirement does not apply to those physically unable to comply with it; or to those making homestead entries upon the public lands of the United States.

ASSASSINATION OF JEAN JAURES.

Jean Leon Jaures, noted as a socialist leader and orator, was assassinated Friday evening, July 31, 1914, as he was dining in a small restaurant near the bourse in Paris, France. He was shot dead by Raoul Villain, 29 years of age and son of a clerk of the civil court in Reims. The assassin on being arrested said he committed the act because Jaures had betrayed France in leading the campaign against the three year military law. Occurring as it did in the midst

of the excitement over war preparations throughout Europe, the murder caused a sensation, particularly as the victim had been laboring energetically to make war impossible.

M. Jean Jaures was born in 1859 at Castres and in 1885 entered politics as a conservative republican. In 1889 he became a socialist and later as a member of the chamber of deputies acquired wide fame as the leader of his party and as an opponent of war.

CAPITAL PUNISHMENT IN THE UNITED STATES.

Capital punishment prevails in all of the states of the union except Kansas, Maine, Minnesota, Rhode Island, Washington and Wisconsin. In Michigan the only crime punishable by death is treason. The death penalty was abolished in the state of Washington in 1913. It was abolished in Iowa in 1872 and restored in 1878. It was

also abolished in Colorado in 1897, but was restored in 1901. Hanging is the ordinary mode of execution, but in Indiana, New York, Nebraska, Ohio, Pennsylvania, Vermont and Virginia electrocution is the legal method. In Nevada hanging or shooting is optional with the condemned.

Sixty-Third Congress.

From March 4, 1913, to March 3, 1915.

SENATE.

President, Thomas R. Marshall, vice-president of the United States; compensation, \$12,000 a year. Democrats, 53; republicans, 42; progressive, 1. Compensation of senators, \$7,500 a year.

DEATH OF LORD ROBERTS.

Field Marshal Earl Roberts died in France Nov. 24, 1914, while on a visit to the Indian troops engaged in fighting with the allies against Germany and Austria. He had been at the front but a short time when he became seriously ill with pneumonia, which, owing to his advanced age, quickly resulted in his death. He was born in Cawnpore, India, in 1832 and consequently was 82 years old when he passed away. From the time

of the Indian mutiny in 1853 to the Boer war in South Africa in 1892-1902 he was a prominent figure in the military history of Great Britain and was one of the empire's most popular heroes. On the outbreak of the war between the powers in August, 1914, Lord Roberts was appointed colonel-in-chief of such forces from the overseas dominions and India as might be brought to Europe to take part in the conflict.

UNITED STATES MILITARY ACADEMY.

West Point, N. Y.

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. When any cadet has completed the course of

four years satisfactorily he is eligible for promotion and commission as a second lieutenant in any arm or corps in the army in which there may be a vacancy, the duties of which he may have been judged competent to perform.

Appointments—Each congressional district and territory, including Porto Rico, Alaska and Hawaii, is entitled to have one cadet at the academy. The District of Columbia has two. Each state is also entitled to have two cadets from the state at large and forty are allowed from the United States at large. The law provides that for six years from July 1, 1910, whenever any cadet shall have finished three years of his course at the academy his successor may be admitted. The appointment from a congressional district is made upon the recommendation of the representative in congress from that district and those from the state at large upon the recommendations of the senators of the state. The appointments for the United States at large are made by the president upon his own selection. The appointments from the District of Columbia are made on the recommendation of the district commissioners and that from Porto Rico on the recommendation of the resident commissioner. Appointments are made

one year in advance of admission. For each candidate appointed two alternates should be nominated. Four cadets from the Philippines are admitted.

Examinations—On the second Tuesday in January of each year the candidate selected for appointment must appear for mental and physical examination before boards of army officers at such places as the war department may designate. Candidates who pass will be admitted to the academy on March 1 following.

Mental Requirements—Each candidate must show that he is well versed in algebra, to include quadratic equations and progressions, plane geometry, English grammar, composition and literature, descriptive and physical geography and general and United States history.

Physical Requirements—No candidate will be admitted who is under 17 or over 22 years of age, or less than five feet four inches in height at the age of 17, or five feet five inches at the age of 18 and upward, or who is deformed or afflicted with any disease or infirmity which would render him unfit for military service. Candidates must be unmarried.

Pay—The pay of a cadet is \$600 a year and one ration a day, or commutation therefor at 30 cents a day. The total is \$709.50, to begin with his admission to the academy. No cadet is allowed to receive money or other supplies from his parents or from any other person without the sanction of the superintendent.

Enlistment—Before receiving his warrant of appointment a candidate for admission is required to sign an agreement to serve in the army of the United States eight years from the time of his admission to the academy.

UNITED STATES NAVAL ACADEMY.

Annapolis, Md.

The United States naval academy is a school for the practical and theoretical training of young men for the naval service of the United States. The students are styled midshipmen. The course

of study is six years—four years at the academy and two years at sea—at the expiration of which time the examination for final graduation takes place. Midshipmen who pass are appointed to fill vacancies in the lower grade of the line of the navy, and occasionally to fill vacancies in the marine corps and in certain of the staff corps of the navy.

Appointments—Two midshipmen are allowed for each senator, representative and delegate in congress, two for the District of Columbia and five each year from the United States at large. The appointments from the District of Columbia and five each year at large are made by the president. One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the president on the recommendation of the governor of Porto Rico. Candidates must be actual residents of the districts from which they are nominated.

Examinations—Two examinations for the admission of midshipmen are held each year. The first is held on the third Tuesday in April under the supervision of the civil service commission at certain specified points in each state and territory. All those qualifying mentally, who are entitled to appointment in order of nomination, will be notified by the superintendent of the naval academy when to report at the academy

for physical examination, and if physically qualified will be appointed. The second and last examination is held on the third Tuesday in June at Annapolis, Md. Alternates are given the privilege of reporting for mental examination at the same time as the principals. Examination papers are all prepared at the academy and the examinations of candidates are finally passed upon by the academic board. Certificates from colleges and high schools will not be accepted in lieu of the entrance examinations at the naval academy.

Mental Requirements—Candidates will be examined in punctuation, spelling, arithmetic, geography, English grammar, United States history, world's history, algebra through quadratic equations and plane geometry (five books of Chauvenet's geometry or an equivalent).

Physical Requirements—All candidates must, at the time of their examination for admission, be between the ages of 16 and 30 years. A candidate is eligible for appointment the day he becomes 16 and is ineligible on the day he becomes 20 years of age. Candidates are required to be of good moral character, physically sound, well formed and of robust constitution. The height of candidates for admission must not be less than five feet two inches between the ages of 16 and 18 years, and not less than five feet four inches between the ages of 18 and 20 years. The minimum weight at 16 years is 105 pounds, with an increase of five pounds for each additional year or fraction of a year over one-half. Candidates must be unmarried.

Pay—The pay of a midshipman is \$600 a year, beginning at the date of his admission. Midshipmen must supply themselves with clothing, books, etc., the total expense of which amounts to \$280.64. Traveling expenses to the academy are paid by the government.

Enlistment—Each midshipman on admission is required to sign articles by which he binds himself to serve in the United States navy eight years (including his time of probation at the naval academy).

LOWEST POINT IN THE UNITED STATES.

By a strange freak of nature the lowest point of dry land in the United States is less than eighty miles from the highest. According to the United States geological survey, the lowest point is in Death Valley, California, and is 276 feet below sea level. It is said that from this place Mount Whitney, the summit of which is 14,501 feet above sea level and the highest point in the country, can be seen on a clear day.

DISASTROUS STORMS IN PARIS.

Paris, France, was visited by one of the most violent rain and thunder storms in its history on the evening of June 15, 1914. Eight lives were lost and the damage to streets and buildings was estimated at millions of dollars. The rain fell for three hours in such torrents that several streets and boulevards caved in, engulfing a number of passers-by. Water and gas mains burst, while telephone and electric light wires were

broken. At the junction of the Rue la Boetie and the Faubourg St. Honore 500 square feet of the roadway heaved up and then sank, carrying down a number of persons who had taken refuge under a cafe awning. In the Place St. Augustin a section of the roadway collapsed under a passing taxicab, causing the death of the chauffeur and a woman passenger. Many other cave-ins occurred in the central part of the city.

PANAMA-PACIFIC EXPOSITION IN SAN FRANCISCO, CAL.

The opening of the Panama canal and the 40th anniversary of the discovery of the Pacific ocean will be celebrated by an international exposition in San Francisco, Cal., in 1915. Steps with that end in view were taken in 1910, when a guaranty fund of \$17,500,000 was raised. Of this amount \$5,000,000 is provided by a special tax levied by the legislature upon all the property in California, an additional \$5,000,000 through the issuance of bonds by the city of San Francisco and

the balance of \$7,500,000 by popular subscriptions. No government aid was asked.

The site is a natural amphitheater within the residential section of San Francisco, covering 635 acres, fronting on San Francisco bay overlooking the Golden Gate. There will be fourteen main exhibit palaces, costing about \$3,000,000. The entire expenditure prior to opening is estimated at \$50,000,000. The exposition opens Feb. 20, 1915, and closes Dec. 4.

PANAMA-CALIFORNIA EXPOSITION IN SAN DIEGO, CAL.

To celebrate the opening of the Panama canal and to show the world what the canal will mean to commerce and the advancement of the west, San Diego, Cal., will hold an exposition during the entire year 1915, opening Jan. 1 and closing Dec. 31. The buildings, which are all to be of the Spanish-Colonial style of architecture, are being constructed on a site of 315 acres in Balboa park. Of this area 100 acres are devoted to the general exhibit and the main buildings,

of which there are fifteen; 100 acres to the state and foreign section; 100 acres to open-air exhibits; 25 acres to buildings for amusement purposes ("The Isthmus"), with 5,000 feet frontage, and 250 acres to landscape gardens and park. Every building on the grounds is to be covered with vines and floriculture. The horticultural exhibit will be one of the striking features of the fair.

DISASTER TO NEWFOUNDLAND SEAL HUNTERS.

One of the worst calamities in the history of the Newfoundland sealing industry occurred March 31 and April 1, 1914, in Belle Isle strait. Four steamers were working in among the ice floes on which the seals are found and about 1,000 men were scattered about killing the animals when at noon of March 31 a storm sprang up without any previous indication of its approach. Most of the sealers got back to their vessels in safety, but the most of the men from the steamer Newfoundland, after taking refuge on the Stephano, the nearest craft, left to go aboard their own ship, as the Stephano had to pick up its own men. The sealers from the Newfoundland lost their way and seventy-seven of them were frozen to death in the blizzard that night or the following day. The storm

did not moderate until the morning of April 2. Fifty of the men were picked up alive by the steamer Bellaventure, but many of them were permanently crippled. Sixty-nine of the dead were recovered and brought to St. John's on the same vessel. The Newfoundland was not wrecked, but was caught in the ice and not released until several days after the storm. The captain supposed that the missing men were safe on one of the other vessels.

The Southern Cross, another sealing steamer with from 170 to 180 men aboard and laden with 17,000 seals, was lost in the same gale with all hands probably on April 1. No trace of the vessel was found and just what happened to it was never learned.

THE GREAT SEAL OF THE UNITED STATES.

July 4, 1776, congress appointed Benjamin Franklin, John Adams and Thomas Jefferson a committee to prepare a device for a seal of the United States. The designs submitted by these statesmen and by several subsequent committees failed to satisfy congress and it was not until June 20, 1782, that a device was officially approved. The design accepted was the joint work of Charles Thomson, the secretary of congress, and William Barton, a citizen of Philadelphia. It is described in the act (of the date given) thus:

"The device for an armorial achievement and reverse of the great seal of the United States in congress assembled is as follows:

"Arms. Paleways of thirteen pieces, argent and gules; a chief, azure; the escutcheon on the breast of the American eagle displayed proper, holding in his dexter talon an olive branch, and in his sinister a bundle of thirteen arrows, all proper, and in his beak a scroll, inscribed with this motto, 'E pluribus unum.'

"For the crest. Over the head of the eagle, which appears above the escutcheon, a glory, or breaking through a cloud, proper, and surrounding thirteen stars, forming a constellation, argent, on an azure field.

"Reverse. A pyramid unfinished. In the zenith, an eye in a triangle, surrounded with a glory proper. Over the eye these words, 'Annuit Cœptis.' On the base of the pyramid the numerical letters MDCCLXXVI. And underneath the following motto, 'Novus ordo seclorum.'

REMARKS AND EXPLANATION.

"The escutcheon is composed of the chief and pale, the two most honorable ordinaries. The pieces, paly, represent the several states, all joined in one solid compact entire, supporting a chief, which unites the whole and represents congress. The motto alludes to this union. The pales in the arms are kept closely united by the chief and the chief depends on that union and the strength resulting from it for its support, to denote the confederacy of the United States of America and the preservation of their union through congress. The colors of the pales are those used in the flag of the United States of America. White signifies purity and innocence; red, hardness and valor; and blue, the color of the chief, signifies vigilance, perseverance and justice. The olive branch and arrows denote the power of peace and war, which is exclusively vested in congress. The constellation denotes a new state taking its place and rank among other sovereign powers. The escutcheon is borne on the breast of an American eagle without any other supporters, to denote that the United States of America ought to rely on their own virtue.

"Reverse. The pyramid signifies strength and duration: The eye over it and the motto allude to the many signal interpositions of Providence in favor of the American cause. The date underneath is that of the declaration of independence and the words under it signify the beginning of the new American era, which commences from that date."

GLOSSARY OF HERALDIC TERMS.

To understand the foregoing description the following glossary of heraldic terms, given in "The History of the Seal of the United States," published by the state department in Washington, D. C., in 1909, will be helpful:

CUSTODY AND USE OF SEAL.

The seal of the United States is in the custody of the secretary of state. It is affixed to the commissions of all cabinet officers and diplomatic and consular officers who are nominated by the president and confirmed by the senate; all ceremonious communications from the president to the heads of foreign governments and formal agreements of the president with foreign powers; all proclamations by the president; all exequaturs to foreign consular officers in the United States who are appointed by the heads of

the governments they represent; to warrants by the president to receive persons surrendered by foreign governments under extradition treaties; and to all miscellaneous commissions of civil

officers appointed by the president, by and with the advice and consent of the senate, whose appointments are not now especially directed by law to be signed under a different seal.

THE SHERMAN ANTITRUST LAW.

Passed by the 51st congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 3. Every contract, combination in form of trust or otherwise or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act: and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition

setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed as soon as may be to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the court before which any proceeding under section 1 of this act may be pending that the ends of justice require that other parties should be brought before the court the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

SENTENCED FOR OLEOMARGARINE FRAUDS.

John F. Jelke, president of the John F. Jelke company of Chicago, was sentenced May 4, 1914, to serve two years in the federal prison at Leavenworth, Kas., and to pay a fine of \$10,000 for conspiring to defraud the government of taxes on colored oleomargarine. Seven fellow defendants were fined \$2,500 each on the same charge. The sentences were imposed by Judge Ferdinand A. Geiger in the United States District court in Chicago, where the trial of the case began Feb. 24, 1914, and ended March 18 in a verdict of guilty. Those who escaped a prison sentence were William M. Steele, general manager of the Jelke company; Hugh D. Camer-

on, Milwaukee representative; Harry E. Hitchcock, salesman; William L. Lillard, a former salesman; D. B. Tullis, a former salesman; Fred Rapp, former salesman; William P. Jackson, former manager of a company absorbed by the Jelke company.

The charge against the defendants was that they sold uncolored butterine to dealers and also coloring matter, which was so used that the oleomargarine might be sold to the public in colored form thus evading the payment by the company of the government tax of 10 cents a pound on colored butterine. The defendants were indicted in the summer of 1911.

FLAG OF THE UNITED STATES.

The national flag of the United States now consists of thirteen alternate red and white stripes, representing the original thirteen states, and a blue field on which are forty-eight white stars arranged in six rows of eight stars each, representing the forty-eight states now constituting the union. The last two stars were

added in 1912 when New Mexico and Arizona were officially admitted as states. June 14 is generally observed as flag display day.

Laws are in force in some of the states forbidding the desecration or mutilation of the flag or its use in any way for advertising purposes. A federal law forbids the use of the national flag on trade marks.

GREAT CHINESE ENCYCLOPEDIA.

The "Yung Lo Ta Tien," or "Great Dictionary of Yung Lo," ranks as the biggest literary undertaking in the world, having had more than 2,000 scholars engaged in the compilation of its

917,490 pages and 366,992,000 characters. It consists of 22,877 separate sections bound up into 11,100 volumes, each half an inch in thickness.

UNITED STATES CIVIL SERVICE.

Civil service act approved Jan. 16, 1883.

Officers—Three commissioners are appointed by the president to assist him in classifying the government offices and positions, formulating rules and enforcing the law. The office is in Washington, D. C. The chief examiner is appointed by the commissioners to secure accuracy, uniformity and justice in the proceedings of the examining boards. The secretary to the commission is appointed by the president.

General Rules—The fundamental rules governing appointments to government positions are found in the civil service act itself. Based upon these are many other regulations formulated by the commission and promulgated by the president from time to time as new contingencies arise. The present rules were approved March 20, 1903, and went into effect April 15, 1903. In a general way they require that there must be free, open examinations of applicants for positions in the public service; that appointments shall be made from those graded highest in the examinations; that appointments to the service in Washington shall be apportioned among the states and territories according to population; that there shall be a period of six months of probation before any absolute appointment is made; that no person in the public service is for that reason obliged to contribute to any political fund or is subject to dismissal for refusing to so contribute; that no person in the public service has any right to use his official authority or influence to coerce the political action of any person. Applicants for positions shall not be questioned as to their political or religious beliefs, and no discrimination shall be exercised against or in favor of any applicant or employee on account of his religion or politics. The classified civil service shall include all officers and employees in the executive civil service of the United States except laborers and persons whose appointments are subject to confirmation by the senate.

Examinations—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year in all the states and territories at convenient places. In Illinois, for example, they are usually held at Cairo, Chicago and Peoria. The dates are announced through the newspapers or by other means. They can always be learned by applying to the commission or to the nearest postoffice or custom house. Those who desire to take examinations are advised to write to the commission in Washington for the "Manual of Examinations," which is sent free to all applicants. It is revised semiannually to Jan. 1 and July 1. The January edition contains a schedule of the spring examinations and the July edition contains a schedule of the fall examinations. Full information is given as to the methods and rules governing examinations, manner of making application, qualifications required, regulations for rating examination papers, certification for and chances of appointment, and as far as possible it outlines the scope of the different subjects of general and technical examinations. These are practical in character and are designed to test the relative capacity and fitness to discharge the duties to be performed. It is necessary to obtain an average percentage of 70 to be eligible for appointment, except that applicants entitled to preference because of honorable discharge from the military or naval service for disability resulting from wounds or sickness incurred in the line of duty need obtain but 65 per cent. The period of eligibility is one year.

Qualifications of Applicants—No person will be examined who is not a citizen of the United States; who is not within the age limitations prescribed; who is physically disqualified for the service which he seeks; who has been guilty of criminal, infamous, dishonest or disgraceful conduct; who has been dismissed from the public service for delinquency and misconduct or has failed to receive absolute appointment after probation; who is addicted to the habitual use of intoxicating liquors to excess, or who has made a false statement in his application. The age

limitations in the more important branches of the public service are: Postoffice, 18 to 45 years; rural letter carriers, 17 to 55; internal revenue, 21 years and over; railway mail, 18 to 35; light-house, 18 to 50; life saving, 18 to 45; general departmental, 30 and over. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerk must be at least 5 feet 6 inches in height, exclusive of boots or shoes, and weigh not less than 135 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment—Whenever a vacancy exists the appointing officer makes requisition upon the civil service commission for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first. If after a probationary period of six months the name of the appointee is continued on the roll of the department in which he serves the appointment is considered absolute.

Removals—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service and for reasons given in writing. No examination of witnesses nor any trial shall be required except in the discretion of the officer making the removal.

Salaries—Entrance to the department service is usually in the lowest grade, the higher grades being generally filled by promotion. The usual entrance grade is about \$300, but the applicant may be appointed at \$340, \$760 or even \$800.

UNITED STATES SUPREME COURT DECISIONS.

Handed down June 22, 1914.

INTERMOUNTAIN RATE CASE.

In the intermountain rate case the United States Supreme court reversed the decision of the Commerce court and upheld the order of the interstate commerce commission. The Commerce court held that the commission had no authority to issue "blanket" or "zone" orders as to rates as had been done in June and July, 1911, but could only act in regard to the reasonableness or unreasonableness of specific rates. The orders in question were issued under authority of the long and short haul section of the interstate commerce act, which clothed the commission with discretion to make exceptions to the general rule. The commission refused to let the railroads charge a higher rate to the protesting cities in the Rocky mountain region than was charged to points beyond them on shipments originating west of a line that would run north and south through St. Paul, but on shipments originating between St. Paul and Chicago the railroads were permitted to charge an increase of not more than 7 per cent; on shipments originating between Chicago and Pittsburgh, not more than 10 per cent, and from the zone between Pittsburgh and the Atlantic, not more than 25 per cent. The Supreme court held that this order was sustained by the facts upon which it was based and did not exceed the powers which the statute conferred or transcend the limits of the sound legal discretion which it lodged in the commission when acting upon the subject before it.

The long and short haul clause was held to be constitutional. The court said:

"The situation under the amendment [to the interstate commerce act] is: Power in the carrier primarily to meet competitive conditions in any point of view by charging a lesser rate for a longer than for a shorter haul has ceased to exist, because to do so in the absence of some authority would not only be inimical to the provision of the fourth section but would be in conflict with the preference and discrimination clauses of the second and third sections.

"But while the public power previously lodged in the carrier is thus withdrawn and reposed in the commission, the right of carriers to seek and obtain, under authorized circumstances, the sanction of the commission to charge a higher rate for a longer than for a shorter haul because of competition or for other adequate reasons is expressly preserved, and if not is in any event by necessary implication granted.

"And as a correlative, the authority of the commission to grant on request; the right sought is made by the statute to depend upon the facts established and the judgment of that body in

the exercise of a sound legal discretion as to whether the request should be granted compatibly with a due consideration of the private and public interests concerned and in view of the preference and discrimination clauses of the second and third sections."

OIL LANDS CASE.

In the oil lands case the court confirmed the title of the Southern Pacific Railroad company to 200,000 acres of oil bearing lands in California, estimated to be worth \$700,000,000. The decision was that the patents involved were irregular but that they could not be attacked collaterally by other claimants; they could only be set aside by a direct attack by the government. The time in which that could be done had expired in 1900 or 1901.

"In every case before this court," said Justice Van Deventer, "we have held that where the law says that only mineral or homestead lands are to be granted by the land officials the officials must do their duty of ascertaining whether that land came within the law, and they could not perform their duty by inserting exceptions that the land should not pass if found later to be within the law."

PIPE LINE CASE.

The pipe line amendment to the Hepburn rate law of 1906 was upheld by the Supreme court. When the interstate commerce commission began to enforce the law it called upon the pipe line companies to file rates, but six of them, including the Standard Oil company, refused to comply. They appealed to the Commerce court and it enjoined the enforcement of the order on the ground that the amendment was unconstitutional. The Supreme court held that pipe lines were common carriers subject to the authority of the interstate commerce commission and that the Hepburn act was necessary to carry out the dissolution of the oil trust.

LUMBER TRUST CASE.

The decree of the New York federal court holding that organizations of retail lumber dealers in the eastern states had violated the Sherman antitrust law by circulating among their members blacklists of wholesalers who sold lumber direct to large consumers was affirmed. The court held that the government may maintain a criminal action under the act against an association of business men for "blacklisting," even if the act of proscription went no further than merely to notify other members of the association that the particular object of the blacklist was the doing of a specific act.

UNITED STATES REVENUE CUTTER SERVICE.

In a general way the duties which the revenue cutter service is called upon to perform may be classified as follows:

1. Assistance of vessels in distress.
2. Co-operation with the navy in times of war.
3. Destruction of derelicts and other menaces to navigation.
4. Protection of the customs revenue.
5. Enforcement of the navigation and other laws governing merchant vessels and motor boats.
6. Regulation and policing of regattas and marine parades.
7. Enforcement of laws relating to anchorage of vessels.
8. Enforcement of the neutrality laws.
9. Enforcement of quarantine and immigration laws.
10. Suppression of mutinies on board merchant vessels.
11. Protection of game and the seal and other fisheries in Alaska; suppression of illegal traffic in firearms, ammunition and spirits in Alaska.
12. Co-operation with the life-saving service by the instruction, drilling and inspection of its crews.

The revenue cutter service, which is organized on a military basis, is under control of the secretary of the treasury, the assistant secretary having supervision. The administration is in charge of a captain commandant, whose office is in Washington, D. C. The authorized commissioned personnel consists of 159 line officers, 81 engineer officers and 2 constructors, a total of 242. The total authorized complement of warrant officers, petty officers and men is 1,576. Commissioned officers are appointed from cadets at the School of Instruction, New London, Conn. The school course extends over three years and embraces instruction in professional and academic subjects. Admission is by competitive examination and candidates must not be less than 18 nor more than 24 years of age. Candidates for the engineer corps must be not less than 21 nor more than 24 years of age.

Warrant officers are appointed by the secretary of the navy and hold their appointments during good behavior. Petty officers and other men are enlisted for periods of one year. After three successive enlistments an increase in pay is allowed; the law also provides an annual sum for uniforms. Efficiency in the enlisted ranks is rewarded by promotion to the several grades of petty officers and the warrant officers are selected from the petty officers as vacancies occur. The pay of the commissioned personnel is fixed by congress to correspond with the pay and allowances of like rank in the army.

By law the officers of the revenue cutter service: rank as follows:

Captain commandant, with colonel in army and captain in navy.

Senior captain and engineer in chief, with lieutenant-colonel in army and commander in the navy.

Captain and captain of engineers, with major in army and lieutenant-commander in navy.

First lieutenant and first lieutenant of engineers, with captain in army and senior lieutenant in navy.

Second lieutenant and second lieutenant of engineers, with first lieutenant in army and junior lieutenant in navy.

Third lieutenant and third lieutenant of engineers, with second lieutenant in army and ensign in navy.

Following are the names, dates of construction (in parentheses), chief dimensions, tonnage, armament, speed and headquarters of the vessels of the revenue cutter service:

INTERNATIONAL RULES FOR SAFETY AT SEA.

Delegates representing fourteen maritime nations, at the conclusion of a long conference on matters relating to the promotion of greater safety at sea, signed a convention in London Jan. 20, 1914, laying down regulations for the future. These are to become effective July 1, 1916, after the governments concerned have given their formal approval. Briefly, the international rules provide:

That all merchant vessels carrying fifty or more persons (passengers or crew) and engaged in international or colonial voyages, must be equipped with wireless apparatus; an exception is made in the case of vessels not going more than 150 miles from land. The apparatus must have a minimum range of 100 miles.

That there must be enough lifeboat accommodations for all persons on board a ship, and that there must be a minimum number of members of the crew holding government certificates that they are competent to handle boats and rafts.

That no dangerous goods shall be carried; each

administration is to issue warnings as to what goods are dangerous.

That there shall be an organized system of patrols for detecting fires and adequate provision for extinguishing them.

That a patrol, under the supervision of the United States, is to be established for making ice observations and destroying derelicts in the North Atlantic; all ship masters must report dangerous ice and derelicts.

That an international code for urgent and important signals be used.

Ships of contracting states which comply with the requirements of the convention will be furnished with certificates. Provision is also made for the interchange of rules relating to safety at sea and for the imposition of penalties by each government for violations of such rules as are specified in the convention.

The convention was ratified by the United States senate March 25, 1914.

LOSS OF OLD DOMINION LINER MONROE.

The liner Monroe of the Old Dominion Steamship company was sunk in a collision with the steamer Nantucket of the Merchants and Miners' line off the coast of Virginia at 1:40 o'clock on the morning of Jan. 30, 1914. Forty-one persons lost their lives. Of these nineteen were passengers and twenty-two members of the crew. The Monroe left Norfolk, Va., at 7:40 p. m., Jan. 29 and ran into a light fog when outside the capes. She was proceeding cautiously on her way to New York, blowing a fog whistle every minute by an automatic time clock, and was about half way between Cape Charles lightship and the Winter Quarter lightship when she stopped on hearing a fog whistle on her starboard bow. Signals were exchanged, but in a few moments the other vessel, which proved to be the Nantucket, crashed into the starboard side of the Monroe. The bow of the Nantucket penetrated

one-third of the width of the Monroe and made sinking inevitable.

Every effort was made by the captain and crew to rescue the passengers. One lifeboat was crushed, another fell into the water and was swamped, while the boats on the port side could not be used on account of the heavy list of the vessel to the starboard. Two lifeboats, however, were successfully loaded and launched and several life rafts were also instrumental in saving many persons. Ferdinand Kuehn, wireless operator on the Monroe, after sending out signals for assistance, gave his life preserver to a woman just as the steamer began to sink, and went down with the ship.

The men and women on the lifeboats and rafts were picked up by the Nantucket and conveyed to Norfolk. They numbered thirty-nine passengers and sixty sailors, making a total of ninety-nine. Two of those picked up died from exposure.

COPYRIGHT LAWS OF THE UNITED STATES.

The act to amend and consolidate the acts respecting copyright, in force July 1, 1909, as amended by the act approved Aug. 24, 1912, provides that any person entitled thereto, upon complying with the provisions of the law, shall have the exclusive right (a) to print, reprint, publish, copy and vend the copyrighted work; (b) to translate the copyrighted work or make any other version of it if it be a literary work; to dramatize it if it be a nondramatic work; to convert it into a novel or other nondramatic work if it be a drama; to arrange or adapt it if it be a musical work; to finish it if it be a model or design for a work of art; (c) to deliver or authorize the delivery of the copyrighted work if it be a lecture, sermon, address or similar production; (d) to perform the copyrighted work publicly if it be a drama or if it be a dramatic work and not reproduced in copies for sale, to vend the manuscript or any record thereof; to make or to procure the making of any transcription or record thereof by which it may in any manner be exhibited, performed or produced, and to exhibit, perform or produce it in any manner whatsoever; (e) to perform the copyrighted work publicly for profit if it be a musical composition and for the purpose of public performance for profit and to make any arrangement or setting of it in any system of notation or any form of record in which the thought of an author may be read or reproduced.

So far as it secures copyright controlling the parts of instruments serving to reproduce mechanically the musical work the law includes only compositions published after the act went into effect; it does not include the works of a foreign author or composer unless the country of which he is a citizen or subject grants similar rights to American citizens. Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the part of instruments serving to reproduce mechanically the musical work, any other person may make a similar use of the work upon the payment to the owner of a royalty of 2 cents on each such part manufactured. The reproduction or rendition of a musical composition by or upon coin-operated machines shall not be deemed a public performance for profit unless a fee is charged for admission to the place where the reproduction occurs.

The works for which copyright may be secured include all the writings of an author.

The application for registration shall specify to which of the following classes the work in which copyright is claimed belongs:

- (a) Books, including composite and cyclopedic works, directories, gazetteers and other compilations.
- (b) Periodicals, including newspapers.
- (c) Lectures, sermons, addresses, prepared for oral delivery.
- (d) Dramatic or dramatic-musical compositions.
- (e) Musical compositions.
- (f) Maps.
- (g) Works of art; models or designs for works of art.
- (h) Reproductions of a work of art.
- (i) Drawings or plastic works of a scientific or technical character.
- (j) Photographs.
- (k) Prints and pictorial illustrations.
- (l) Motion picture photo plays.
- (m) Motion pictures other than photo plays.

These specifications do not, however, limit the subject matter of copyright as defined in the law nor does any error in classification invalidate the copyright protection secured.

Copyright extends to the work of a foreign author or proprietor only in case he is domiciled in the United States at the time of the first publication of his work or if the country of which he is a citizen grants similar copyright protection to citizens of the United States.

Any person entitled thereto by the law may secure copyright for his work by publication thereof with the notice of copyright required by the act, and such notice shall be affixed to each copy published or offered for sale in the United

States. Such person may obtain registration of his claim to copyright by complying with the provisions of the act, including the deposit of copies, whereupon the register of copyrights shall issue to him a certificate as provided for in the law. Copyright may also be had of the works of an author of which copies are not reproduced for sale by the deposit with claim of copyright of one complete copy; if it be a lecture or similar production, or a dramatic or musical composition; of a title and description, with one print taken from each scene or act, if the work be a motion picture photo play; of a photographic print if it be a photograph; of a title and description, with not less than two prints taken from different sections of a complete motion picture, if the work be a motion picture other than a photo play; or of a photograph or other identifying reproduction thereof if it be a work of art or a plastic work or drawing.

After copyright has been secured there must be deposited in the copyright office in Washington, D. C., two complete copies of the best edition thereof, which copies, if the work be a book or periodical, shall have been produced in accordance with the manufacturing provisions of the act, or if such work be a contribution to a periodical for which contribution special registration is requested one copy of the issue or issues containing such contribution. Failure to deposit the copies within a given time after notice from the register of copyrights makes the proprietor of the copyright liable to a fine of \$100 and twice the retail price of the work, and the copyright becomes void.

The text of all books and periodicals specified in paragraphs (a) and (b) above, except the original text of a book of foreign origin in a language other than English, must in order to secure protection be printed from type set within the limits of the United States, either by hand, machinery or other process, and the printing of the text and the binding of the books must also be done within the United States. An affidavit of such manufacture is required.

The notice of copyright required consists either of the word "copyright," the abbreviation "copr.," accompanied by the name of the copyright proprietor, and if the work be a printed literary, musical or dramatic work, the notice must also include the year in which the copyright was secured by publication. In the case, however, of copies of works specified in paragraphs (f) to (k) inclusive (given above) the notice may consist of the letter C inclosed within a circle, accompanied by the initials, monogram, mark or symbol of the copyright proprietor, provided his name appears elsewhere on the copies. In the case of a book or other printed publication the notice shall be applied on the title page or on the page immediately following, or if a periodical either upon the title page or upon the first page of text of each separate number or under the title heading; or if a musical work upon its title page or the first page of music.

Where the copyright proprietor has sought to comply with the law with respect to notice, the omission of such notice by mistake from a particular copy or copies shall not invalidate the copyright or prevent recovery for infringement against any person who, after actual notice of the copyright, begins an undertaking to infringe it, but shall prevent the recovery of damages against an innocent infringer who has been misled by the omission of the notice.

In the case of a book in English published abroad before publication in this country, the deposit in the copyright office within thirty days of one copy of the foreign edition, with a request for the reservation of the copyright, secures for the author or owner an ad interim copyright for thirty days after such deposit is made.

The copyright secured by the act endures for twenty-eight years from the date of the first publication. In the case of any work of a musical work, periodical, encyclopedic or other composite work upon which the copyright was originally secured by the proprietor thereof, or of any work

copyrighted by a corporate body, or by an employer for whom such work is made for hire, the proprietor of such copyright shall be entitled to a renewal of the copyright in such work for the further term of twenty-eight years when application for such renewal shall have been made within one year prior to the expiration of the original term. In the case of any other copyrighted work, including a contribution by an individual author to a periodical or to a cyclopedic or other composite work when such contribution has been separately copyrighted, the author of such work, if living, or the heirs, executors or next of kin, if the author be dead, shall be entitled to a renewal of the copyright for a further term of twenty-eight years. In default of such application for renewal the copyright in any work shall end at the expiration of twenty-eight years.

If any person shall infringe the copyright in any work protected under the copyright laws of the United States, such person shall be liable:

(a) To an injunction restraining such infringement.

(b) To pay to the copyright proprietor such damages as the copyright proprietor may have suffered due to the infringement, as well as all the profits which the infringer shall have made from such infringement, and in proving profits the plaintiff shall be required to prove sales only and the defendant shall be required to prove every element of cost which he claims, or in lieu of actual damages or profits such damages as to the court shall appear to be just, and in assessing such damages the court may, in its discretion, allow the amounts as hereinafter stated (in numbered paragraphs), but in the case of a newspaper reproduction of a copyrighted photograph such damages shall not exceed the sum of \$200 nor be less than \$50, and such damages shall in no other case exceed the sum of \$250 and shall not be regarded as a penalty. In the case of the infringement of an undramatized or nondramatic work by means of motion pictures, where the infringer shows that he was not aware that he was infringing, the damages shall not exceed \$100; in the case of the infringement under like circumstances of a copyrighted dramatic or dramatico-musical work the entire sum recoverable shall not exceed \$5,000 nor be less than \$250.

1. In the case of a painting, statue or sculpture, \$10 for every infringing copy made or sold by or found in the possession of the infringer or his agents or employees.

2. In the case of any work enumerated in the list (given above) of works for which copyright may be asked, except a painting, statue or sculpture, \$1 for every infringing copy.

3. In the case of a lecture, sermon or address, \$50 for every infringing delivery.

4. In the case of dramatic or dramatico-musical or a choral or orchestral composition, \$100 for the first and \$50 for every subsequent infringing performance; in the case of other musical compositions, \$10 for every infringing performance.

(c) To deliver up on oath all articles alleged to infringe a copyright.

(d) To deliver up on oath for destruction all the infringing copies or devices, as well as all plates, molds, matrices or other means for making such infringing copies, as the court may order.

(e) Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the parts of musical instruments serving to reproduce mechanically the musical work then in case of infringement by the unauthorized manufacture, use or sale of interchangeable parts, such as disks, rolls, bands or cylinders for use in mechanical music-producing machines, no criminal action shall be brought, but in a civil action an injunction may be granted upon such terms as the court may impose and the plaintiff shall be entitled to recover in lieu of profits and damages a royalty as provided in the act.

Any person who shall willfully and for profit infringe any copyright, or willfully aid or abet such infringement, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall

be punished by imprisonment for not exceeding one year or by a fine of not less than \$100 nor more than \$1,000, or both, in the discretion of the court. It is provided, however, that nothing in the act shall prevent the performance of religious or secular works, such as oratorios, cantatas, masses or octavo choruses by public schools, church choirs or vocal societies, provided the performance is for charitable or educational purposes and not for profit.

Any person who shall fraudulently place a copyright notice upon any uncopyrighted article, or shall fraudulently remove or alter the notice upon any copyrighted article, shall be deemed guilty of a misdemeanor and shall be subject to a fine of not less than \$100 nor more than \$1,000. Any person who shall knowingly sell or issue any article bearing a notice of United States copyright which has not been copyrighted in this country, or who shall knowingly import any article bearing such notice, shall be liable to a fine of \$100.

During the existence of the American copyright in any book the importation of any piratical copies thereof or of any copies not produced in accordance with the manufacturing provisions of the copyright law, or of any plates of the same not made from type set in this country, or any copies produced by lithographic or photo-engraving process not performed within the United States, is prohibited. Except as to piratical copies this does not apply:

(a) To works in raised characters for the blind;

(b) To a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright owner, unless such newspaper or magazine contains also copyright matter printed without such authorization;

(c) To the authorized edition of a book in a foreign language of which only a translation into English has been copyrighted in this country;

(d) To any book published abroad with the authorization of the author or copyright proprietor under the following circumstances:

1. When imported more than one copy at a time, for individual use and not for sale, but such privilege of importation shall not extend to a foreign reprint of a book by an American author copyrighted in the United States;

2. When imported by or for the use of the United States;

3. When imported for use and not for sale, not more than one copy of any such book in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary, philosophical, scientific or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school or seminary of learning, or for any state school, college, university or free public library in the United States;

4. When such books form parts of libraries or collections purchased en bloc for the use of societies, institutions or libraries, or form parts of the library or personal baggage belonging to persons or families arriving from foreign countries and are not intended for sale.

No criminal actions shall be maintained under the copyright law unless the same be begun within three years after the cause of action arose.

Copyright may be assigned, mortgaged or bequeathed by will.

There shall be appointed by the Librarian of Congress a register of copyrights at a salary of \$4,000 a year and an assistant register at \$3,000 a year.

These with their subordinate assistants shall perform all the duties relating to the registration of copyrights. The register of copyrights shall keep such record books in the copyright office as are required to carry out the provisions of the law, and whenever deposit has been made in the copyright office of a copy of any work under the provisions of the act he shall make entry thereof.

In the case of each entry the person recorded as the claimant of the copyright shall be entitled to a certificate of registration under seal of the copyright office.

The register of copyrights shall receive and the persons to whom the services designated are rendered shall pay the following fees: For the registration of any work subject to copyright, \$1, which sum is to include a certificate of registration under seal: Provided, That in the case of photographs the fee shall be 50 cents where a certificate is not demanded. For every additional certificate of registration made, 50 cents. For recording and certifying any instrument of writing for the assignment of copyright or license, or for any copy of such certificate or license, duly certified, if not over 300 words in length, \$1; if more than 300 and less than 1,000, \$2; if more than 1,000 words in length, \$1 additional for each 1,000 words or fraction thereof over 300 words. For recording the notice of user or acquiescence specified in the act, 25 cents for each notice of not over fifty words and an additional

25 cents for each additional 100 words. For comparing any copy of an assignment with the record of such document in the copyright office and certifying the same under seal, \$1. For recording the extension or renewal of copyright, 50 cents. For recording the transfer of the proprietorship of copyrighted articles, 10 cents for each title of a book or other article in addition to the fee for recording the instrument of assignment. For any requested search of copyright office records, indexes or deposits, 50 cents for each full hour consumed in making such search. Only one registration at one fee shall be required in the case of several volumes of the same book deposited at the same time.

- On income of \$20,000 to \$50,000—2 per cent.
- On income of \$50,000 to \$75,000—3 per cent.
- On income of \$75,000 to \$100,000—4 per cent.
- On income of \$100,000 to \$250,000—5 per cent.
- On income of \$250,000 to \$500,000—6 per cent.
- On income of more than \$500,000—7 per cent.

GENERAL PROVISIONS.

Persons whose net income is less than \$3,000 (\$4,000 if married) per annum are not required to file any returns.

Persons with taxable incomes must file returns with internal revenue collector by March 1 each year, showing sources of income and deductions allowed by law. Incomes are computed for the preceding calendar year.

Notices of taxes assessed are sent out by government before June 1. Taxes must be paid by June 30.

Failure to file return is punishable by a fine of from \$20 to \$1,000.

Making fraudulent returns is punishable by a fine of \$3,000 or imprisonment for one year, or both.

UNITED STATES ARSENALS.

The largest of the United States arsenals are located at Rock Island, Ill., and Springfield, Mass. Others are at Pittsburgh, Pa.; Augusta, Ga.; Benicia, Cal.; Columbia, Tenn.; Fort Monroe, Va.; Philadelphia, Pa.; Indianapolis, Ind.; Governor's Island, N. Y.; Jefferson barracks,

Mo.; Sandy Hook, N. Y.; San Antonio, Tex.; Dover, N. J.; Watertown, Mass., and Watervliet, N. Y. Some of the above are merely powder depots, the principal manufacturing plants being at Rock Island, Springfield and Watervliet. The navy yards are also arsenals.

APPLICATIONS FOR PATENTS.

[Condensed from Rules of Practice in the United States patent office.]

A patent may be obtained by any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof, not previously patented or described in this or any other country, for more than two years prior to his application, unless the same is proved to have been abandoned. A patent may also be obtained for any new design for a manufacture, bust, statue, alto-relievo or bas-relief; for the printing of woollen, silk or other fabrics; for any new impression, ornament, pattern, print or picture to be placed on or woven into any article of manufacture; and for any new, useful and original shape or configuration of any article of manufacture, upon payment of fees and taking the other necessary steps.

Applications for patents must be in writing, in the English language and signed by the inventor if alive. The application must include the first fee of \$15, petition, specification and oath, and drawings, model or specimen when required. The petition must be addressed to the commissioner of patents and must give the name and full address of the applicant, must designate by title the invention sought to be patented, must contain a reference to the specification for a full disclosure of such invention and must be signed by the applicant.

The specification must contain the following in the order named: Name and residence of the applicant with title of invention; a general statement of the object and nature of the invention; a brief description of the several views of the drawings (if the invention admits of such illustration); a detailed description; claim or claims; signature of inventor and signatures of two witnesses. Claims for a machine and its product and claims for a machine and the process in the performance of which the machine is used must be presented in separate applications, but claims for a process and its product may be presented in the same application.

The applicant, if the inventor, must make oath or affirmation that he believes himself to be the first inventor or discoverer of that which he seeks to have patented. The oath or affirmation must also state of what country he is a citizen and where he resides. In every original application the applicant must swear to himself that the invention has not been patented or to affirm that or others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than seven months prior to his application. If application has been made in any foreign country, full and explicit details must be given. The oath or affirmation may be made before any one who is authorized by the laws of his country to administer oaths.

Drawings must be on white paper with India ink and the sheets must be exactly 10x15 inches in size, with a margin of one inch. They must show all details clearly and without the use of superfluous lines.

Applications for reissues must state why the original patent is believed to be defective and tell precisely how the errors were made. Those applications must be accompanied by the original patent and an offer to surrender the same; or, if the original be lost, by an affidavit to that effect and certified copy of the patent. Every applicant whose claims have been twice rejected for the same reasons may appeal from the primary examiners to the examiners in chief upon the payment of a fee of \$10.

The duration of patents is for seventeen years except in the case of design patents, which may be for three and a half, seven or fourteen years, as the inventor may elect.

Caveats or notices given to the patent office of claims to inventions to prevent the issue of patents to other persons upon the same invention, without notice to caveators, may be filed upon the payment of a fee of \$10. Caveats must contain the same information as applications for patents.

REGISTRATION OF TRADE-MARKS.

Under the law passed by congress Feb. 20, 1905, and effective April 1, 1905, citizens of the United States, or foreigners living in countries affording similar privileges to citizens of the United States, may obtain registration of trade-marks used in commerce with foreign nations, or among the several states, or with Indian tribes, by complying with the following requirements: First, by filing in the patent office an application therefor in writing, addressed to the commissioner of patents, signed by the applicant, specifying his name, domicile, location and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used. With this statement shall be filed a drawing of the trade-mark, signed by the applicant or his attorney, and such number of specimens of the trade-mark as may be required by

the commissioner of patents. Second, by paying into the treasury of the United States the sum of \$10 and otherwise complying with the requirements of the law and such regulations as may be prescribed by the commissioner of patents.

The application must be accompanied by a written declaration to the effect that the applicant believes himself to be the owner of the trade-mark sought to be registered and that no other person or corporation has the right to use it; that such trade-mark is in use and that the description and drawing presented are correct. Trade-marks consisting of or comprising immoral or scandalous matter, the coat of arms, flag or other insignia of the United States or of any state or foreign nation cannot be registered. Fees for renewal of trade-marks and for filing opposition to registration are \$10 each, for appeals from examiners to the commissioner of patents, \$15 each.

Further information may be had by applying to the commissioner of patents, Washington, D. C.

RATES OF POSTAGE AND MONEY ORDERS.

The domestic letter rate is 2 cents an ounce or fraction thereof, and it applies to the island possessions of the United States, Cuba, Canada, Newfoundland, Labrador, united kingdom, Germany (direct), Mexico, Shanghai, the Canal Zone and Republic of Panama. The foreign letter rate is 5 cents an ounce or fraction thereof, and it applies to all foreign countries in the universal postal union except those named above.

DOMESTIC.

FIRST CLASS—Letters and all written or partly written matter, whether sealed or unsealed, and all other matter sealed or otherwise closed against inspection, 2 cents per ounce or fraction thereof. Postal cards issued by the government sold at 1 cent each double, or reply cards, 2 cents each. Cards must not be changed or mutilated in any way and no printing or writing other than the address is allowable on the address side. "Private mailing cards" (post cards) require 1 cent postage.

Among the articles requiring first-class postage are blank forms filled out in writing; certificates, checks and receipts filled out in writing; copy (manuscript or typewritten) unaccompanied by proof sheets; plans and drawings containing written words, letters or figures; price lists containing written figures changing individual items; old letters sent singly or in bulk; typewritten matter and manifold copies thereof, and stenographic notes.

SECOND CLASS—All regular newspapers, magazines and other periodicals issued at stated intervals not less frequently than four times a year, when mailed by publishers or news agents, 1 cent a pound or fraction thereof; when mailed by others, 1 cent for each four ounces or fractional part thereof.

THIRD CLASS—Books, circulars, pamphlets and other matter wholly in print (not included in second-class matter), 1 cent for each two ounces or fractional part thereof. The following named articles are among those subject to third-class rate of postage: Almanacs, architectural designs, blue prints, calendars, cards, press clippings with name and date of papers stamped or written in, engravings, samples of grain in its natural condition, imitation of hand or type written matter when mailed at postoffice window in a minimum number of twenty identical copies separately addressed; insurance applications and other blank forms mainly in print; printed labels, lithographs, maps, music books, photographs, tags, proof sheets, periodicals having the character of books, and publications which depend for their circulation upon offers of premiums.

FOURTH CLASS—All matter not in the first, second or third class which is not in its form or nature liable to destroy, deface or otherwise damage the contents of the mailbag or harm the person of any one engaged in the postal service, 1 cent an ounce or fraction thereof. Included in fourth-class mail matter are the following articles: Blank books, blank cards or paper, blotters, playing cards, celluloid, coin, crayon pictures, cut flowers, metal or wood cuts, drawings, dried fruit, dried plants, electrolytic plates, framed engravings, envelopes, geological specimens, letter heads, cloth maps, samples of merchandise, metals, minerals, napkins, oil paintings, paper bags or wrapping paper, photograph albums, printed matter on other material than paper, queen bees properly packed, stationery, tintypes, wall paper and wooden rulers bearing printed advertisements, seeds; cuttings, bulbs, scions, roots and plantlets (8 ounces or less, 1 cent per 2 ounce or fraction thereof).

UNMAILABLE MATTER—Includes that which is prohibited by law, regulation or treaty stipulation and that which by reason of illegible or insufficient address cannot be forwarded to destination. Among the articles prohibited are poisons, explosives or inflammable articles, articles exhalting bad odors, venous, spirituous and mal liquors, specimens of disease germs, lottery letters and circulars, indecent and scurrilous matter.

SPECIAL DELIVERY—Any article of mailable matter bearing a 10-cent special delivery stamp

in addition to the regular postage is entitled to immediate delivery on its arrival at the office of address between the hours of 7 a. m. and 11 p. m., if the office be of the free delivery class, and between the hours of 7 a. m. and 7 p. m., if the office be other than a free delivery office.

REGISTRATION—All mailable matter may be registered at the rate of 10 cents for each package in addition to the regular postage, which must be prepaid. An indemnity not to exceed \$50 will be paid for the loss of first-class registered matter, and 50 francs (\$10) in case of the loss of a registered article addressed to a country in the universal postal union, under certain conditions.

LIMITS OF WEIGHT—No package of third or fourth class matter weighing more than four pounds, except single books, will be received for conveyance by mail. The limit of weight does not apply to second-class matter mailed at the second-class rate of postage, or at the rate of 1 cent for each four ounces, nor is it enforced against matter fully prepaid with postage stamps affixed at the first-class or letter rate of postage.

POST CARDS—A post card must be an unfolded piece of cardboard not exceeding 3 9/16 by 5 9/16 inches, nor less than 2 1/4 by 4 inches in size; it must be in form and quality and weight of paper substantially like the government postal cards; it may be of any color not interfering with the legibility of the address; the face of the card may be divided by a vertical line, the right half to be used for the address only and the left for the message, etc.; very thin sheets of paper may be attached to the card, and such sheets may bear both writing and printing; advertisements may appear on the back of the card and on the left half of the face. Cards bearing particles of glass, metal, mica, sand, flint or similar substances are unmailable except in envelopes.

FOREIGN.

Letter postage to Germany is two (2) cents an ounce or fraction (in direct German steamers only, otherwise the same as other foreign countries); to Newfoundland, Great Britain, Ireland, two (2) cents an ounce or fraction; other articles same as for other foreign countries.

The rates of postage for other foreign countries (except Canada, Mexico, Panama and Cuba, which are the same as domestic rates) are as follows:

Letters for the first ounce or fraction	5 cents
Letters for each additional ounce or fraction of an ounce	3 cents
Postal cards, each	2 cents
Newspapers and other printed matter, for each 2 ounces or fraction	1 cent
Registration fee on letters or other articles	10 cents
Commercial papers, packages not in excess of 10 oz.	5 cents
Commercial paper packages in excess of 10 oz., each 2 oz. or fraction	1 cent
Samples of merchandise, packets not in excess of 4 oz.	2 cents
Samples of merchandise, packets in excess of 4 oz., each 2 oz. or fraction	1 cent

LIMIT OF WEIGHT—Packages of printed matter and commercial papers, 4 lbs. 6 oz.; samples of merchandise, 12 oz.

PREPAYMENT OF POSTAGE—Foreign mail should at all times be fully prepaid. If not fully prepaid double the deficiency will be collected upon delivery.

INTERNATIONAL REPLY COUPONS—These reply coupons, of the denomination of 6 cents each, are issued for the purpose of sending to correspondents in any of the countries named below. The foreign correspondent may exchange the coupons for postage stamps of that country equal in value to a 5 cent United States postage stamp, using the stamp for reply postage. The countries in which the reply coupon is valid are as follows: Argentina, Austria and the Austrian postoffices in the Levant, Belgium, Bosnia-Herzegovina, Brazil, Bulgaria, Chile, Korea, Costa Rica, Egypt, Cuba, Denmark, Danish West Indies, Egypt, France, Germany, Great Britain, British postoffices in Morocco and Turkey, British colonies of

Australia, Bahamas, Bechuanaland, Canada, Cape of Good Hope, Ceylon, Cook Islands, Dominica, East Africa, Ellice, Gibraltar, Gilbert, Gold Coast, Honduras (British), Hongkong and Hongkong offices in China, India, Labuan, Malta, Natal, Newfoundland, New Guinea, New Zealand, Seychelles, Sierra Leone, Solomon, Somaliland, South Rhodesia, Straits Settlements, Tasmania, Transvaal, Trinidad, Uganda, Zululand, Greece, Haiti, Honduras (Republic of), Hungary, Italy, Japan, Liberia, Luxembourg, Mauritius and dependencies, Mexico, Netherlands, Guinea, the Netherlands Indies, Norway, Portugal (including Azores and Madeira), Roumania, Salvador, Siam, Southern Nigeria, Spain, Sweden, Switzerland, Tunisia, Turkey.

PARCEL POST.

DOMESTIC.

Unsealed matter of the fourth class (parcel post), which embraces all mailable merchandise not exceeding in size 72 inches in length and girth combined and not exceeding 50 pounds in weight for delivery within the first and second zones and 20 pounds within the other zones, is mailable at postoffices, branch postoffices, lettered and local named stations and such numbered stations as may be designated by the postmaster. It may also be received by rural and other carriers authorized to receive such matter. Parcels must be so prepared that their contents may easily be examined.

Rates—Parcels weighing 4 ounces or less are mailable at the rate of 1 cent for each ounce or fraction of an ounce, regardless of distance. Parcels weighing more than 4 ounces are mailable at the following pound rates, a fraction of a pound being considered a full pound:

Distinctive stamps are not required. Books may be sent by parcel post; rate on books weighing 8 ounces or less, 1 cent for each 2 ounces; on those weighing more than 8 ounces regular zone rate applies.

The special delivery service includes articles sent by parcel post. The fee is the same—10 cents in special delivery or ordinary stamps.

Packages may be sent C. O. D. by parcel post. Charges, not to exceed \$100 on a single package, are collected from addressees. The fee for collection is 5 cents on parcels up to a value of \$25 and 10 cents on parcels up to a value of not more than \$50. The fee, which is paid by the sender, insures the parcel against loss to the actual value of the contents up to \$25 and \$50 according to the fee paid.

The postage rate on fourth-class matter to the Hawaiian Islands, United States postal agency at Shanghai, Alaska, Canal Zone, Guam, Philippines, Porto Rico, Tutuila, Canada, Mexico, Cuba and Republic of Panama, except for parcels weighing four ounces or less, on which the rate is 1 cent for each ounce or fraction thereof, is 12 cents for the first pound and 12 cents for each additional pound or fraction thereof.

The limit of weight on packages addressed to Canada, Cuba, Mexico and the Republic of Panama is 4 pounds 6 ounces; to the Hawaiian Islands, Shanghai, China, Alaska, Canal Zone, Guam, Philippines, Porto Rico and Tutuila 20 pounds.

Parcels up to 11 pounds in weight may also be sent by foreign parcel post to Mexico and the Republic of Panama under the terms of the parcel post conventions with those countries.

Parcels for Canal Zone, Mexico and Republic of Panama must be accompanied by customs declarations.

SUEZ CANAL TRAFFIC IN 1913.

The total receipts of transit tonnage tolls of the Suez canal in 1913 amounted to \$23,443,643, a decrease of \$1,836,189 as compared with 1912. The decrease was owing to the reduction of the toll rate, which went into effect Jan. 1, 1913. The total toll-paying tonnage for 1913 was 19,166,000 tons, or 484,000 tons in excess of that for 1912.

In 1913 the total number of vessels passing through the Suez canal was 5,085 as against 5,473 in 1912. The average time of vessels going through the canal in 1913 was 16 hours 19 minutes.

ELECTROCUTION OF NEW YORK GUNMEN.

Four men convicted of the murder of Herman Rosenthal, a gambler, in New York city, July 16, 1912, were electrocuted in Sing Sing prison at dawn April 13, 1914. They were Harry Horowitz, Louis Rosenberg, Frank Seidenshner and Frank Crodel. Charles A. Becker, a police lieutenant, who was found guilty of instigating the crime and sentenced to death, was also to have been executed, but the Court of Appeals in February granted his petition for a new trial. It was charged at the trial, which began

Oct. 7 and ended in a verdict of guilty Oct. 23, 1912, that Becker had made use of his position on the police force to collect money from gambling and other disreputable houses, and, fearing that he would be exposed by Rosenthal, on his alleged victim's hired professional criminal, or "gunmen," to kill the gambler. Supreme Court Justice John W. Goff presided at the trial. On his second trial, ending May 22, 1914, Becker was again found guilty.

NOTES ON NATIONAL PARKS.

Antietam—Battle field of the civil war in Washington county, Maryland.

Casa Grande Ruin—Remains of a large prehistoric building near Florence, Ariz.

Chickamauga and Chattanooga—Battle fields of the civil war in the vicinity of Chattanooga, Tenn.

Crater Lake—Park contains remarkable mountain, lake and fine scenery in the Cascade range, Klamath county, Oregon; may be reached from Klamath Falls or from Medford on the Southern Pacific road.

General Grant—In Fresno and Tulare counties, California; forest and mountain scenery; reached from Sanger on the Southern Pacific road.

Gettysburg—Battle field of the civil war in southeastern Pennsylvania.

Glacier—Tract of mountainous country in northern Montana with glaciers, lakes, forests and peaks.

Hot Springs Reservation—Tract of land in Garland county, Arkansas, noted for its springs of warm mineral waters.

Mesa Verde—In the extreme southwestern part of Colorado; contains pueblo and other ruins; reached from Mancos on the Rio Grande Southern road.

Mount Rainier—Mountain district in southern Washington; reached from Ashford on the Tacoma Eastern railroad and from Fairfax on the Northern Pacific road.

Platt—Tract of land containing sulphur springs in Murray county, Oklahoma; reached by Santa Fe and St. Louis & San Francisco railroads.

Rock Creek—Park in outskirts of Washington, D. C.

Sequoia—Mountain tract in Tulare county, California, containing forest of big trees; reached from Visalia.

Shiloh—Battle field of civil war in Hardin county, southern Tennessee.

Sully's Hill—On the shore of Devil's lake, North Dakota; contains elevation on which Gen. Alfred Sully with a few men withstood a band of Indians for several days in 1863; reached from Devil's Lake, Narrows and Tokio stations on the Great Northern railroad.

Vicksburg—Battle field of civil war near city of same name in Mississippi.

Wind Cave—Canyon and extensive cave in Custer county, South Dakota, twelve miles from Hot Springs, on the Northwestern and Burlington roads; in Black Hills region.

Yellowstone—Famous park in Wyoming, Montana and Idaho, containing geysers and many other natural phenomena as well as beautiful mountain, lake and river scenery; reached from stations on the Northern Pacific, Burlington and Oregon Short Line roads.

Yosemite—Splendid valley in the Sierras in Mariposa county, California; reached from Merced on the Santa Fe and Southern Pacific roads by way of the Yosemite Valley railroad.

Zoological—Park in Washington, D. C., devoted to the zoological collection of the government; adjoins Rock Creek park.

PRESERVATION OF AMERICAN ANTIQUITIES.

By law approved June 8, 1906, entitled "An act for the preservation of American antiquities," the president of the United States is authorized, in his discretion, to declare by proclamation historic landmarks, historic and prehistoric structures and other objects of historic or scientific interest that are situated upon lands owned or controlled by the United States, to be national monuments. Under such authority the following monuments have been created:

Name and state.	Year.	Acres.
Big Hole battle field, Mont.	1910	8

NOTES ON NATIONAL MONUMENTS.

Big Hole battle field—Scene of fight at Big Hole pass on Big Hole or Wisdom river, Aug. 9, 1877, between Nez Perce Indians under Chief Joseph and a small force of soldiers commanded by Col. John Gibbon; in Silver Bow county, Montana; reached from Meirrose.

Cabrillo statue—At Point Loma, Cal.; land first sighted by Juan Rodríguez Cabrillo, discoverer of California, when he approached San Diego bay, Sept. 23, 1542; site of about 2½ acres set aside for heroic statue of Cabrillo.

Chaco canyon—Located in San Juan and McKinley counties, New Mexico; contains extensive prehistoric communal or pueblo ruins.

Cinder cone—An elevation in Lassen county in northern California; is of importance as illustrating volcanic activity in the vicinity 300 years ago.

Colorado—Extraordinary examples of erosion in Mesa county, western Colorado; reached from Grand Junction.

Devil postpile—Natural formations, including Rainbow waterfalls, within the Sierra national forest in California; area set aside is on middle fork of San Joaquin river.

Devil's tower—A lofty and isolated rock in Crook county, Wyoming; is an extraordinary example of the effect of erosion in the higher mountains.

El Morro—An elevation near Wingate station on the Santa Fe railroad in New Mexico; contains prehistoric ruins and interesting rock inscriptions.

Gila cliff dwellings—In the Mogollon mountains, New Mexico; known also as the Gila Hot Springs cliff houses; are among the best preserved remains of the cliff dwellers of the southwest.

Gran Quivira—Ruined town not far from Manzano in the central part of New Mexico; remains of large cathedral and chapel and of many houses thought to date from prehistoric times.

Grand canyon—In northwestern Arizona; greatest eroded canyon within the United States.

Jewel cave—A natural formation of scientific interest within the Black Hills national forest in Custer county, South Dakota.

Lassen peak—In natural forest of same name in Shasta county, northern California; marks the southern terminus of the long line of extinct volcanoes in the Cascade range from which one of the greatest volcanic fields in the world extends.

Lewis and Clark cavern—An extraordinary limestone cavern near Limespur, Jefferson county, Montana.

Montezuma castle—Large prehistoric ruin or cliff dwelling on Beaver creek, Arizona.

Mount Olympus—Mountain in the state of Washington; has extensive glaciers and on its slopes are the breeding grounds of the Olympic elk.

Muir woods—In Marin county, California; an extensive growth of redwood trees of great age and size; land presented to the government by William Kent of Chicago.

Mukuntuweap canyon—In southwestern Utah through which flows the north fork of the Rio Virgin or Zion river; an extraordinary example of canyon erosion.

Natural bridges—Rock formations in southeastern Utah extending over streams or chasms; have loftier heights and greater spans than any other similar formations known; reserved as extraordinary examples of stream erosion.

Navajo—Within the Navajo Indian reservation in Arizona; includes the north fork of prehistoric cliff dwellings and pueblo ruins new to science.

Oregon caves—Within the Siskiyou national forest in Oregon; caves are of natural formation and of unusual scientific interest and importance.

Petrified forest—Deposits of fossilized or mineralized wood in Gila and Apache counties, Arizona.

Pinnacles—A series of natural formations of rock with a number of caves underlying them; located within Pinnacles national forest in California.

Rainbow bridge—An extraordinary natural bridge in southeastern Utah, having an arch which in form and appearance is much like a rainbow; is 309 feet high and 278 feet span; of scientific interest as an example of eccentric stream erosion.

Shoshone cavern—A cave in Big Horn county, Wyoming, of unknown extent, but of many windings and ramifications and containing vaulted chambers of large size magnificently decorated with sparkling crystals and beautiful stalactites, and containing pits of unknown depth.

Sitka—Tract of about fifty-seven acres within public park, near Sitka, Alaska; battle ground of Russian conquest of Alaska in 1804; site of former village of Kik-Siti tribe, the most warlike of Alaska Indians; contains numerous totem poles constructed by the Indians, recording the genealogical history of their several clans.

Tonto—Comprises two prehistoric ruins of ancient cliff dwellings in Gila county, Arizona.

Tumacacori—Ruins of an ancient Spanish mission of brick, cement and mortar in Santa Cruz county, Arizona.

Wheeler—Volcanic formations illustrating erratic erosion; in Rio Grande and Cochitopa national forests in southwestern Colorado.

The percentages of the total acreage devoted to important crops on irrigated lands were: Alfalfa, 30.6; wild grasses, 21.1; oats, 10.2; wheat, 7.6; barley, 3.3; orchard fruits, 3.3; other tame or cultivated grasses, 3; grains cut green, 2.9; clover alone, 2.3; sugar beets, 2.5; timothy and clover mixed, 2.5; potatoes, 2.3; corn, 1.8; tropical and subtropical fruits, 1.4. Crops grown on irrigated land show an excess yield of 25.6 per cent over those grown on unirrigated land.

IRRIGATION FOR RICE GROWING.

The total acreage irrigated for rice growing in Louisiana, Texas and Arkansas in 1909 was 694,800, of which 54.7 per cent was in Louisiana, 41.3 per cent in Texas and 4 per cent in Arkansas. The enterprises which were completed or under way in 1910 were reported as capable of irrigating 950,708 acres in that year and of serving ultimately a total of 1,134,322 acres. The total cost of rice irrigation enterprises to July 1, 1910, was \$13,587,636.

USE OF DENATURED ALCOHOL FOR FUEL.

Germany uses between 40,000,000 and 50,000,000 gallons of denatured alcohol a year, of which more than 30,000,000 gallons are sold to the general public for burning purposes. The importance of this fuel in Germany may be appreciated when it is considered that France uses about 18,000,000 gallons, the United States about 10,000,000 gallons, and the United Kingdom only

4,000,000 gallons, according to Charles A. Cramp-ton, commercial agent of the department of commerce, Washington, D. C. Denatured alcohol is not only gaining in favor for general burning purposes, but efforts are being made to find a way of using it as a motor fuel in place of gasoline.

DECLARATION OF LONDON ON LAWS OF NAVAL WAR.

What is popularly known as the "Declaration of London" is the agreement entered into Feb. 28, 1909, at a naval conference closing on that date in London, England, between representatives of the following powers: Germany, United States, Austria-Hungary, Spain, France, Great Britain, Italy, Japan, the Netherlands and Russia. The conference was held at the invitation of Great Britain in order to arrive at an agreement as to what are the generally recognized rules of international law within the meaning of article 7 of the convention of Oct. 18, 1907 (at The Hague), relative to the establishment of an international prize court. The agreement contains nine chapters and seventy-one articles, embodying what the signatory powers declare to correspond in substance with the generally recognized principles

of international law. The subjects of the chapters are as follows: Chapter I., blockade in time of war; chapter II., contraband of war; chapter III., unneutral service; chapter IV., destruction of neutral prizes; chapter V., transfer to a neutral flag; chapter VI., enemy character; chapter VII., convoy; chapter VIII., resistance to search; chapter IX., compensation. The signatory powers undertake to insure the mutual observance of the rules contained in the present declaration in any war in which all the belligerents are parties thereto. Ratifications are to be deposited in London. Powers not represented at the naval conference were requested to accede to the declaration of London, those doing so being placed on the same footing as the signatory powers.

DEATH OF SHELBY M. CULLOM.

Shelby M. Cullom, prominent in Illinois and national affairs for more than half a century, died in his residence in Washington, D. C., Wednesday, Jan. 28, 1914, at the age of 84. He was a native of Kentucky, but came with his parents to Illinois in 1838. In his youth he was a friend and faithful political adherent of Abraham Lincoln and the last work of his old age was in connection with the plans for the great Lincoln memorial in Washington, D. C. He was the last survivor of the funeral

party that accompanied the body of the martyred president to Springfield, Ill. Mr. Cullom served in the Illinois legislature, part of the time as speaker, and was governor of the state from 1871 to 1883, when he resigned to enter the United States senate, in which he remained until 1913. He first came to Washington as a member of the house of representatives in 1865, a few weeks before the assassination of Lincoln.

SPECIAL PROVISIONS.

TRADE AGREEMENTS.

For the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country, the president of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce; Provided, however, That said trade agreements before becoming operative shall be submitted to the congress of the United States for ratification or rejection.

MARKING AND BRANDING.

All articles of foreign manufacture or production which are capable of being marked, stamped, branded or labeled, without injury, shall be marked, stamped, branded or labeled in

legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. All packages containing imported articles shall be marked, stamped, branded or labeled so as to indicate legibly and plainly in English words the country of origin and the quantity of their contents.

DISCRIMINATING DUTIES.

A discriminating duty of 10 per centum ad valorem, in addition to the duties imposed by law, shall be levied, collected and paid on all goods, wares or merchandise which shall be imported in vessels not of the United States, or which, being the production or manufacture of any foreign country not contiguous to the United States, shall come into the United States from such contiguous country; but this discriminating duty shall not apply to goods, wares or merchandise which shall be imported in vessels not of the United States entitled at the time of such importation by treaty or convention or act of congress to be entered in the ports of the United States on payment of the same duties as shall then be payable on goods, wares and merchandise imported in vessels of the United States, nor to such foreign products or manufactures as shall be imported from such contiguous countries in the usual course of strictly retail trade.

No goods, wares or merchandise, unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production or manufacture, or from which such goods, wares or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, shall be forfeited to the United States.

The preceding subsection shall not apply to vessels or goods, wares or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

DISCOUNT FOR AMERICAN SHIPS.

A discount of 5 per centum on all duties imposed by this act shall be allowed on such goods, wares and merchandise as shall be imported in vessels admitted to registration under the laws of the United States. Provided, That nothing in this subsection shall be so construed as to abrogate or in any manner impair or affect the provisions of any treaty concluded between the United States and any foreign nation.

SYNOPSIS OF TARIFF LEGISLATION SINCE 1884.

Morrison Bills—First bill presented to 48th congress during Chester A. Arthur's administration; proposed a horizontal reduction of 20 per cent with free iron ore, coal and lumber; defeated in house April 15, 1884, by vote of 159 to 155; house heavily democratic and senate republican. Second bill presented to 49th congress during Grover Cleveland's first administration; similar to first bill, proposing free wool, salt and lumber; defeated in house June 17, 1886, by a vote of 157 to 140; house democratic, senate republican.

Mills Bill—Presented to 50th congress during Cleveland's first administration; provided for free lumber and wool, reduction on pig iron and abolition of specific duties on cotton; passed by house July 21, 1888, by vote of 162 to 149, but failed in senate; house democratic, senate republican.

McKinley Bill—Passed by 51st congress during Benjamin Harrison's administration; became law Oct. 6, 1890; high protective measure, though remitting duties on sugar and providing for reciprocity treaties; both houses of congress republican.

Wilson Bill—Passed by 53d congress during Cleveland's second administration; became law Aug. 17, 1894, without the president's signature; both houses democratic; measure reduced duties in some cases and made additions to free list, notably wool,

Dingley Bill—Passed by 54th congress during McKinley's administration; approved July 24, 1897; passed by house 206 yeas to 123 nays, 27 members not voting; passed by senate 38 yeas to 28 nays, 23 not voting; house contained 206 republicans and 134 democrats and senate 44 republicans and 34 democrats; measure raised rates to produce more revenue, but was similar in many respects to the McKinley act.

Payne-Aldrich Bill—Passed at extra session of 51st congress in first year of President William H. Taft's administration; approved Aug. 5, 1909; passed the house by a vote of 217 to 161 and the senate by a vote of 45 to 34. The conference vote in the house was 195 yeas to 183 nays, twenty republicans voting in the negative and two democrats in the affirmative. In the senate the vote on the final conference report was 47 to 31, seven republicans voting against it. In general the revision of the Dingley act was in the direction of lower duties, but there were some increases.

Underwood-Stimmons Bill—Passed by 64d congress at extra session called immediately after President Wilson's inauguration in 1913; house and senate democratic. The bill made many reductions in the tariff duties as fixed by the Payne-Aldrich law and placed numerous articles on the free list. It also contained a section establishing a tax on incomes.

BAGGAGE EXAMINATION IN CUSTOM HOUSES.

From "Notice to Passengers" issued by the secretary of the United States treasury.

Paragraph 542, appearing in the free list of the present tariff act, reads as follows:

"Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall include only such articles as were actually owned by them and in their possession abroad at the time of or prior to their departure from a foreign country, and as are necessary and appropriate for the wear and use of such persons and intended for such wear and use, and shall not be held to apply to merchandise or articles intended for other persons or for sale: Provided, That in case of residents of the United States returning from abroad all wearing apparel, personal and household effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the secretary of the treasury: Provided further, That up to but not exceeding \$100 in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission or intended for sale, shall be admitted free of duty."

BAGGAGE DECLARATIONS.

The law requires that every person entering the United States shall make a declaration and entry of personal baggage. The senior member of a family present as a passenger may, however, declare for the entire family.

A failure to declare articles acquired abroad and brought in as baggage renders the articles subject to forfeiture and the passengers liable to criminal prosecution.

Returning residents of the United States should use the form of declaration printed in black; nonresidents should use the form printed in red.

The exact number of pieces of baggage accompanying a passenger must be stated in the declaration, including trunks, valises, boxes, hand bags and packages or bundles of every kind. Forms of baggage declarations will be furnished passengers by the steamship officers. The declaration should be prepared and signed at least one day before the expected arrival of the vessel.

When the declaration has been prepared and signed the coupon at the bottom of the form must be detached and retained by the passenger and the declaration delivered to the ship's officer designated to receive the same. After all the baggage and effects of the passenger have been landed, the coupon which has been retained must be presented at the inspector's desk and an inspector will then be detailed to examine the baggage.

Passengers must acknowledge in person, on the pier, their signatures to the declarations.

RETURNING RESIDENTS OF THE UNITED STATES.

Returning residents of the United States must declare all articles acquired abroad, in their baggage or on their persons, whether by purchase, by gift or otherwise, and whether dutiable or free of duty. Exemption, however, will be allowed by customs officers of articles aggregating not over \$100 in value, if suitable for personal or household use or as souvenirs or curios, and whether intended for the personal use of the passengers or as gifts or presents to others, provided the articles are not bought on commission for another person not intended for sale. Articles so exempt from duty must, nevertheless, be declared.

Articles belonging to one passenger cannot be included in the exemption of another.

Use does not exempt from duty wearing apparel or other articles obtained abroad. Such articles which have been used abroad may, however, be specifically noted on the declaration and due allowance will be made by the appraising officers for depreciation through wear and use

and duties charged upon the articles at their value in their condition as imported.

Passengers must not deduct the \$100 exemption in making out their declarations. Such deductions will be made by customs officers on the pier.

All wearing apparel, personal and household effects taken out of the United States by residents shall be admitted free of duty without regard to their value upon their identity being established. If remodeled, repaired or improved abroad the cost of such remodeling, repairing or improvement must be declared, and receipted bills for such alterations should be presented. The cost of such repairs is subject to duty, but may be included by customs officers within the \$100 exemption. If the cost or value of the repairs be not declared, the articles will be subject to duty upon their entire value.

Citizens of the United States or persons who have at any time resided in this country shall be deemed to be residents of the United States unless they shall have abandoned their residence in this country and acquired an actual bona fide residence in a foreign country. Such citizens or former residents who declare as nonresidents must present satisfactory evidence to the customs officers upon the pier that they have given up their residence in the United States and have become bona fide residents of a foreign country.

The residence of a wife follows that of the husband, and the residence of a minor child follows that of its parents.

The examination of baggage will be facilitated and difficulties avoided if receipted bills for foreign purchases be presented, and if all articles acquired abroad be packed separately in one or more trunks.

NONRESIDENTS OF THE UNITED STATES.

Nonresidents of the United States must declare all articles in their baggage or on their persons which do not constitute wearing apparel, articles of personal adornment, toilet articles or similar personal effects, whether intended for their personal use or for others. They must also declare all articles of wearing apparel, jewelry and other articles of personal adornment, toilet articles and similar effects when not owned by them or when intended for other persons or for sale.

HOUSEHOLD EFFECTS.

Household effects, such as furniture, table linen, bed linen, tableware, etc., imported as baggage, must be declared. If shown to the satisfaction of the customs officers to have been actually owned and used abroad by the passenger not less than one year and not intended for any other person nor for sale, such effects will be admitted free of duty. If not so owned and used abroad, duties must be paid thereon, unless included in the \$100 exemption allowed returning residents.

CIGARS AND CIGARETTES.

Each passenger over 18 years of age may bring in free of duty 50 cigars or 300 cigarettes, or smoking tobacco not exceeding 3 pounds, if for the bona fide use of such passenger. These articles must be declared, but will be passed free by customs officers in addition to the \$100 exemption.

CONTESTED VALUATION.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a re-examination. Application therefor should be made to the officers in charge immediately. If, for any reason, this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisal made to the collector of customs in writing within 10 days after the original appraisement. No request for reappraisal can be entertained after the articles have been removed from customs custody.

Examination of any baggage may be postponed if the passenger requests the officer taking his declaration to have the baggage sent to the appraiser's stores.

Currency or certified checks only can be accepted in payment of duties, but upon request baggage will be retained on the pier for twenty-four hours to enable the owner to secure currency or certified checks.

The offering of gratuities or bribes to customs officers is a violation of law. Customs officers who accept gratuities or bribes will be dismissed from the service, and all parties concerned are liable to criminal prosecution.

Discourtesy or incivility on the part of customs officers should be reported to the collector at the custom house, to the deputy collector or deputy surveyor at the pier, or to the secretary of the treasury. Passengers should not, however, deem customs officers sacrilegious merely because such officers examine baggage thoroughly or appraise articles at a value different from that stated in the passenger's declaration.

BAGGAGE FOR TRANSPORTATION IN BOND.

Baggage containing dutiable articles may be forwarded in bond to any other port of entry upon good reason therefor being shown.

Passengers desiring to have such baggage forwarded in bond should so indicate on their declarations, and also make a request therefor upon the inspector at the time he is assigned to the examination of their baggage. Similar action should be taken when it is desired to have baggage forwarded to another country in transit through the United States.

SEALSKIN GARMENTS.

An act of congress of 1897, as amended in 1912, expressly forbids the importation into the United States of garments made in whole or in part of the skins of seals taken in the waters of the Pacific ocean. Unless the owner is able to establish to the satisfaction of the collector that the garments are not prohibited by said act, they cannot be admitted.

AIGRETTES AND OTHER PLUMAGE.

Paragraph 347 of the present tariff act contains the following proviso:

"The importation of aligrettes, egret plumes or so-called osprey plumes, and the feathers, quills, heads, wings, tails, skins, or parts of skins, of wild birds, either raw or manufactured, and not for scientific or educational purposes, is hereby prohibited; but this provision shall not apply to the feathers or plumes of ostriches or to the feathers or plumes of domestic fowls of any kind.

Any of the above-described prohibited articles will be excluded from entry when brought in by passengers as trimmings on hats or other articles of wearing apparel, and will be confiscated whether found in the baggage or on the person. In cases where there has been no willful intent to violate the law, such prohibited articles may be exported to a foreign country.

WEIGHTS OF DIAMONDS AND FINENESS OF GOLD.

The weight of diamonds and other precious stones is expressed in metric carats. The unit is the international carat of 200 milligrams, which has been officially adopted by the United States and most of the countries in Europe. Until July 1, 1913, there were three different standards in use in the United States, although the one generally accepted was 205.3 milligrams. This was usually subdivided on the binary system, the smallest subdivision being 1-64 of the carat. The new carat is subdivided on the decimal system. The avoirdupois equivalent of 200 milligrams is 3.08 grains.

The fineness of gold is also expressed in carats. Pure gold is said to be twenty-four carats fine. If it contains eight parts of a baser metal or alloy it is only sixteen carats fine. The carats therefore indicate the proportion of pure gold to alloy. Most of the gold used by jewelers is about fourteen carats fine, having ten parts of alloy.

DIAMOND TRADE CENTERS.

For many years Amsterdam was at the head of the diamond industry in Europe, but of late Antwerp has taken first place. Amsterdam specializes in small stones and in cutting these its workmen are unrivaled. Antwerp cuts both large and small diamonds and has a monopoly of

the small stones, called "melees," from German Southwest Africa. The following table of diamond exports to the United States from Amsterdam and Antwerp since 1906 will show the relative importance of these cities in the gem industry:

NOTE.—Estimates of population are required primarily for use in the census bureau in calculating death rates per capita averages for years other than the census year. The so-called arithmetical method was adopted for computing these estimates. It is the simplest and it has been shown by experience to come nearer in accuracy in the majority of cases than any other formula. It rests on the assumption that the increase in population each year since the enumeration is equal to the annual increase from 1900 to 1910.

METROPOLITAN DISTRICTS IN THE UNITED STATES (1910).

Statistics have been compiled by the bureau of the census showing the population of the chief cities of the United States together with their suburbs, comprising what may be termed "metropolitan districts." A district of this character is defined as consisting of the city together with the urban portion of the territory lying within ten miles of the city limits. The following table shows the metropolitan districts of cities having a population of 200,000 or more in 1910:

CENSUS OF 1910 AND 1900.

The thirteenth census of the United States was taken by the bureau of the census as of April 15, 1910. It included continental United States, the territories of Alaska and Hawaii and Porto Rico; also persons in the military and naval service who were stationed abroad. The population according to this division, compared with that in 1900, was:

	1910.	1900.
Alaska.....	64,356	63,592
Hawaii.....	191,909	154,001

Porto Rico.....	1,118,012	*963,243
Soldiers and sailors abroad.....	55,808	91,219

Noncontiguous territory.....	1,429,585	1,263,065
Continental United States.....	31,972,266	75,994,575

United States (area of enu- meration).....	93,402,151	77,256,630
---	------------	------------

*Census of 1899. Includes 953,243 persons enumerated in Porto Rico in 1899.

CENTER OF POPULATION AND MEDIAN LINES.

The center of population, according to the bureau of the census, may be said to represent the center of the gravity of the population. If the surface of the United States be considered as a rigid plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight, and each, therefore, to exert a pressure on any supporting pivotal point directly proportional to his

distance from the point, the pivotal point on which the plane balances would, of course, be its center of gravity, and this is the point referred to by the term "center of population" as used by the census bureau in its reports.

The median point, which may be described as the numerical center of population, is in no sense a center of gravity. In determining the median point distance is not taken into account,

and the location of the units of population is considered only in relation to the intersecting median lines—as being north or south of the median parallel and east and west of the meridian.

The position of the center of population and its movement during each decade since 1790 is shown in the following table:

MEDIAN LINES.

In connection with the definition of the median point another method of presenting facts with regard to the geographical distribution of the population has been noted. Involving the location of median lines. A parallel of latitude is determined which evenly divides the population so that the population north of that parallel is the same as that south. Similarly, a meridian of longitude is determined which divides the population evenly as between east and west. In calculating these median lines it is necessary, in the case of the square degrees of latitude and longitude which are traversed by the lines themselves, to assume that the population is evenly distributed through these square degrees or to make an estimated adjustment where this is obviously not the case.

The eastern terminus of the median parallel, according to the census of 1910, is on the New Jersey coast near Seagirt. In its course west this line passes through central New Jersey, leaving the state near Burlington and entering Pennsylvania a few miles north of Philadelphia, thence passing through Norristown and continu-

ing through southern Pennsylvania and across the northern extremity of West Virginia, leaving the latter state at a point a few miles north of Wheeling. It nearly bisects Ohio, Indiana and Illinois, crossing about ten miles north of Columbus, O.; twenty-five miles north of Indianapolis, Ind.; and about twenty miles north of Springfield, Ill. Through Missouri it runs about thirty miles south of the Iowa and Missouri line, thence passing through Nebraska about ten miles north of its southern boundary, and across the northern part of Colorado, passing about five miles north of Boulder City. Its location in Utah is about forty-five miles south of Salt Lake City. There are no large towns near its course across the northern part of Nevada and California. The western terminus of the median parallel is on the Pacific coast, in Humboldt county, California, about five miles north of Point Delgada and twenty miles south of Cape Mendocino, the point of continental United States extending farthest west.

The median meridian starts at Whitefish point, on the northern peninsula of Michigan, near the eastern end of Lake Superior, thence passing

south about twenty-five miles west of Lansing and through Indiana about ten miles west of the Indiana-Ohio boundary and twenty-five miles west of Cincinnati. South of the Ohio river it bisects Kentucky, crosses eastern Tennessee and leaves that state twenty miles east of Chattanooga. Through Georgia it passes close to the Georgia-Alabama line, about two miles west of Columbus, Ga., leaving the state near the intersection of the Alabama, Georgia and Florida boundary lines. It then crosses the northwestern part of Florida and terminates in the Gulf of Mexico at the city of Apalachicola. The following table shows the movement of the median lines from 1880 to 1910, inclusive:

Census year.	Median parallel, north latitude.			Median meridian, west longitude.			Movement in miles parallel, meridian, westward.

MOTHER TONGUE OF FOREIGN WHITE STOCK (1910).

In the following tables, prepared by the federal census bureau, the foreign white stock referred to is the aggregate white population of the United States which is foreign either by birth or by parentage. It embraces all foreign born whites and all native whites having one or both parents foreign born. It must be remembered that the foreign stock as here defined only includes the first and second generations—immigrants and native children of immigrants—and does not include the grandchildren or great-grandchildren of immigrants. In other words, the figures do not include the exact relative importance of the several ethnic stocks in the total population.

The eight major mother-tongue stocks in the United States, arranged in the order of their importance, are shown in the following table:

Mother tongue.	Number.	†Per cent.

THE SAGE FOUNDATION.

March 12, 1907, Mrs. Russell Sage of New York announced that she had set aside the sum of \$10,000,000 to be known as the Sage Foundation and to be devoted to the improvement of the social and living conditions in the United States. Following is a part of the statement given out by Mrs. Sage as to the object of the gift: "I have set aside \$10,000,000 for the endowment of this foundation. Its object is the improve-

ment of social and living conditions in the United States. The means to that end will include research, publication, education, the establishment and maintenance of charitable and beneficial activities, agencies and institutions and the aid of any such activities, agencies and institutions already established."

The general director of the fund is John M. Glenn. Office, 130 East 22d street, New York, N. Y.

URBAN AND RURAL POPULATION.

The census bureau classifies as urban population that residing in cities and other incorporated places of 2,500 inhabitants or more. The proportion of the total population of continental United States living in urban and rural territory at the censuses of 1910 and 1900 was as follows:

	1910.	1900.		1910.	1900.

THE CITY MANAGER PLAN.

[From report of the National Municipal League's committee on the commission form of government published in the National Municipal Review for January, 1914.]

Definition of city manager plan—A single elective board (commission), representative, supervisory and legislative in function, the members giving only part of their time to municipal work and receiving nominal salaries or none. An appointive chief executive (city manager), hired by the board from anywhere in the country and holding office at the pleasure of the board. The manager appoints and controls the remaining city employees, subject to adequate civil service provisions.

History—The first city manager charter was presented to the legislature of New York in 1911 by the Lockport board of trade. It failed of passage. In 1912 it was adopted by the South Carolina legislature in a special act for the city of Sumter (population 8,109) and subsequently adopted by that city, going into effect Jan. 1, 1913. Among the cities and towns that have since adopted the city manager plan are: Dayton, O.; Phoenix, Ariz.; Hickory, N. C.; La Grande, Ore.; Terrell, Tex.; Amarillo, Tex.; Abilene, Kas.; Morganton, N. C.; Springfield, O.; Morris, Minn.; and Glencoe, Ill. It was adopted as one of three plans in a general optional law by the Ohio legislature, applicable to any city. The Lockport plan remains the model and the Springfield, O., charter is the best yet (up to Jan. 1, 1914) put into effect.

ADVANTAGES CLAIMED FOR PLAN.

1. It creates a single-headed administrative establishment instead of the five separate administrative establishments seen in the Des Moines plan.
2. It permits expertness in administration at the point where it is most valuable, namely, at the head.
3. It permits comparative permanence in the office of the chief executive, whereas in all plans

involving elective executives, long tenures are rare. This permanence tends to substitute experienced experts for amateur and transient executives. It also makes feasible the carrying out of projects extending over long terms of years.

4. The plan permits the summoning of an experienced man from another city, as he does not have to be a resident at the time of his appointment.

5. The plan, while giving a single-headed administration, abolishes the one-man power seen in the old mayor-and-council plan. The city manager is subject to correction and even dismissal by the commission.

6. It abandons all attempts to choose administrators by popular election. It is difficult for voters to gauge executive and administrative ability in candidates. By removing all requirements of technical ability in elective officers, such as commissioners, it leaves the people free to choose candidates for their representative character only.

7. It leaves the lines of responsibility clear.

8. It provides a basis for better discipline and harmony.

9. It is better adapted for large cities as it permits larger commissions and opens the way to a broader and more diversified representation.

10. In very small cities, by having one well-paid manager in place of five or three paid commissioners, it makes possible economy in salaries and overhead expenses.

11. It permits ward elections or proportional representation.

12. It makes membership in city commissions attractive to first class citizens since the service offers opportunities for high usefulness without interruption of their private careers.

EARTHQUAKE IN EASTERN STATES.

The northeastern part of the United States and the lower part of eastern Canada experienced a marked earthquake on the afternoon of Feb. 10, 1914. It lasted from 15 to 30 seconds so far as it was perceptible to man, though seismographs recorded tremors lasting much longer. At the Harvard geological observatory in Cambridge, Mass., the instrument indicated eight faint shocks in the forenoon. In the afternoon the maximum vibration was at 1:33:25 o'clock, and the last shock recorded was at 1:40:34. Tremors were indicated by seismographs as far south as Washington, D. C., and as far west as St. Louis, Mo.

The earthquake was noticed throughout the greater part of New York state and seemed to be especially marked in Albany, where pictures were shaken from the walls in the capitol. In New York city the quaking lasted from 1:36:15 to 1:37:30. No damage was reported from any part of the district affected, though the seismic disturbance was greater than any other recorded in that part of the country.

The last previous earthquake felt in New York was that which partly destroyed Charleston, S. C., in 1886. There was also a general disturbance over the eastern and northeastern states in 1894.

AREA AND POPULATION OF THE BALKAN STATES.

Until the spring of 1914 it was not possible to give with any degree of exactness the area and population of the Balkan states as changed by the war of the allied states against Turkey, by the war between the allies themselves, by Roumanian threats against Bulgaria, by Turkey's attack on Bulgaria when the latter was pressed by the allies and by various treaties and delimiting commissions. The following figures are from the Geographical Journal of the Royal Geographical

society of London, which in May, 1914, issued a new map of the Balkan states:

Country.	Area, sq. miles.	Population.
Albania	11,317	1,000,000
Bulgaria	43,310	4,467,006
Greece	41,933	4,363,000
Montenegro	5,603	516,000
Roumania	53,689	7,514,976
Serbia	34,000	4,547,990
Turkey (Europe)	8,644	1,590,000

THE CAPITOL IN WASHINGTON.

The corner stone of the original capitol building was laid by President Washington Sept. 18, 1793. The north wing was finished in 1810 and the south wing in 1811, a wooden passageway connecting them. The original designs of the structure were made by Dr. William Thornton. The two wings were burned by the British in 1814, but were immediately restored. In 1827 the original building was completed at a cost of

\$2,433,844.13. Extensions of the wings were begun in 1851 and completed in 1859. The dome, which is 287 feet 5 inches in height, was completed in 1865. The capitol stands in latitude 38 degrees 53 minutes, 30.4 seconds north and longitude 77 degrees 00 minutes 35.7 seconds west from Greenwich. The area covered by the building is 153,112 square feet.

ATTEMPT TO ASSASSINATE MAYOR MITCHEL.

Michael P. Mahoney, a demented old blacksmith, tried to kill John P. Mitchel, mayor of New York city, by shooting him with a revolver Friday afternoon, April 17, 1914. The bullet missed its mark by inches only and hit Frank L. Polk, the corporation counsel, in the chin, inflicting a serious but not fatal injury. The mayor, Mr. Polk and George V. Mulvan, tax commissioner, were in an automobile in City Hall park at 1:15 p. m., and Arthur Woods, police commissioner, was about to step into the machine to go with the party to lunch when Mahoney approached from behind and fired at Mr. Mitchel. The aim was poor, but so close was the weapon to the mayor that the side of

his face was slightly powder-burned. Mr. Mulvan's collar, neck and cheek were also burned, but the only one seriously hurt was Mr. Polk. Mahoney was easily overpowered by George J. Neun, the chauffeur, and Commissioner Woods, and turned over to a policeman, who took him to the Tombs. There it was learned that he was 72 years old and a native of Ireland. Examination of his lodgings resulted in the finding of letters written in a rambling and disjointed fashion, but showing that he was a disappointed office-seeker and that he had a fancied grievance against the mayor for his "extravagance." It also appeared that he was agitated at the attempt to get Col. Goethals, the Panama canal engineer, to take the police commissionership.

DWELLINGS AND FAMILIES (1910).

In census usage a "dwelling" is any building in which one or more persons reside. A mere cabin, or room in a warehouse, occupied by a single person, is a census dwelling, while, on the other hand, an apartment house containing many families constitutes only one dwelling. Only occupied dwellings are included in the following tables. The term "family" as used in census reports means a household or group of persons, whether related by blood or not, who share a common abode, usually also sharing the same table. If one person lives alone he constitutes a family, while, on the other hand, those who dwell in a hotel or institution for many people live are also treated as forming a single family. There is, however, no considerable difference between the average size of all families under the census usage and the average size of what are commonly termed families or households in popular speech. In 1900 the difference for the United States as a whole was only 0.1 per cent.

At each census from 1850 to 1910 a decrease was shown in the average number of persons per dwelling and the average number per family. The decrease in the average number per dwelling has been due to the decrease in the average per family, the influence of which has been partly offset by the increased construction of tenements and other dwellings containing more than one family.

In 1910 there were 7,254,242 dwellings and 9,499,765 families in urban communities, while there were 10,551,608 dwellings and 10,755,790 families in rural communities. For urban communities the number of persons to a dwelling averaged 5.9 and to a family 4.5; for rural communities the number of persons to a dwelling averaged 4.7 and to a family 4.6.

RAVAGES OF BOLL WEEVIL.

According to statistics compiled by Director W. J. Harris of the United States census bureau the boll weevil has caused a loss in the production of cotton since 1904 of more than 10,000,000

bales. This at a value of only \$50 a bale represents a loss of \$500,000,000. The states suffering most heavily were Mississippi, Louisiana, Arkansas and Texas.

DECISION AGAINST INTERNATIONAL HARVESTER COMPANY.

In a decision made by the United States District court at St. Paul, Minn., and announced Aug. 12, 1914, the International Harvester company was declared to be a monopoly in restraint of interstate and foreign trade and was ordered dissolved. The company was given ninety days in which to dissolve into at least three independent concerns, in default of which the court would entertain an application for a receivership. The decision of the court was given by Judge Walter I. Smith of Iowa, Judge William C. Hook of Kansas City agreeing and Judge Walter A. Sanborn of Minnesota dissenting.

The majority opinion held that the International Harvester company was from its organization in 1902 in violation of the Sherman law. The original corporation, formed of five concerns, violated the first section of the Sherman

act by restraining competition among themselves. The combined organization also tended to monopolize trade in contravention of the second section of this law. It was further held that the company's treatment of the smaller competitors in general had been fair and just and that the case involved no question of overcapitalization.

Judge Sanborn in his dissenting opinion held that proceedings to punish the company for combinations in restraint of interstate or foreign trade made in 1902, 1903 or 1904 were barred by the provision of the law forbidding prosecution under these acts three years after they are committed. He said it had not been shown that the defendant concern was violating the Sherman law in April, 1912, when the suit was begun nor before that time.

MARRIAGE LAWS.

Marriage may be contracted without the consent of parents by males who are 21 years of age or more. This is the rule in about all the states having laws on the subject. In Arizona the age is 18. For females the age is 21 in Connecticut, Florida, Kentucky, Louisiana, Ohio, Pennsylvania, Rhode Island, South Dakota, Virginia, West Virginia and Wyoming. 18 is the age in Arizona, Maryland and Nebraska and 18 in the other states. Marriages contracted before the age of consent are illegal in nearly all the states.

Marriage licenses are required in practically all the states.

Marriages between whites and negroes are prohibited by law in Alabama, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Idaho, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Nebraska, Nevada, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia and West Virginia. Michigan specifically declares such marriages valid.

Marriages between first cousins are prohibited in Alaska, Arizona, Arkansas, Illinois, Indiana,

Iowa, Kansas, Louisiana, Missouri, Montana, Nevada, New Hampshire, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Washington and Wyoming. Step-relatives are not permitted to intermarry except in Florida, Iowa, Kentucky, Minnesota, New York, Tennessee and Wisconsin.

MARRIAGE RATES.

For the year 1900 the marriage rate based on the total population of continental United States and including the total number of marriages reported was 90 per 10,000 population. In 1890 the rate was 87 per 10,000 population. The rate in 1900 per 10,000 unmarried population 15 years of age and over was 312. In 1890 it was 304. (See also Population by Marital Condition.)

DIVORCE RATES.

The percentage of increase of divorces as compared with the percentage of increase in population is shown by the following figures:

*The only cause for divorce is infidelity to marriage vow, but marriages may be annulled for causes making them void from the beginning. †South Carolina has no divorce law, but marriages may be annulled.

NOTE—It is to be understood that the causes included in the above table are only the principal ones for which divorce is granted. Bigamy and unchastity or infidelity to marriage vows are causes for divorce in practically all the states and hence are omitted from the table.

REQUIREMENTS FOR ADMISSION.

1. Honorable discharge from the United States service.

2. Disability which prevents the applicant from earning a living by.

3. Applicants for admission will be required to abide by all the rules and regulations made by the board of managers, perform all the duties required of them and obey all the lawful orders of the officers of the home.

4. A soldier or sailor to be admitted must forward with his application his discharge paper, his pension certificate if he is a pensioner, and his discharge from a state home if he has been an inmate of such home. These papers are retained at the branch to which he is admitted to prevent their loss or fraud, but are returned to him when he is discharged. Soldiers or sailors whose pensions exceed \$16 a month are not admitted to the home except for special reasons.

The National Home for Disabled Volunteer Soldiers is supported by the United States government. The annual appropriation for that purpose is about \$4,000,000.

STATE SOLDIERS' HOMES.

There are a number of state homes for disabled volunteer soldiers, who, for various reasons, are unable to obtain admission to the national home. The federal government contributes toward the support of the state homes the sum of

\$100 for each soldier, based upon the average attendance for the year; the remainder of the expenses is paid by the states themselves. Some of these homes are on the cottage plan. Following is a list of the state homes:

California—Yountville.	New Hampshire—Tilton.
Colorado—Monte Vista.	New Jersey—Kearny and Vineland.
Connecticut—Noroton Heights.	New York—Bath and Oxford.
Idaho—Boise.	North Dakota—Lisbon.

Michigan—Grand Rapids.	Vermont—Bannington.
Minnesota—Minneapolis.	Washington—Orting and Port Orchard.
Missouri—St. James.	Wisconsin—Waupaca.
Montana—Columbus Falls.	Wyoming—Cheyenne.
Nebraska—Grand Island and Milford.	

HOME FOR REGULAR ARMY SOLDIERS.

The United States maintains a home for disabled and discharged soldiers of the regular army at Washington, D. C. All soldiers who have served twenty years in the army and all soldiers who have incurred such disability, by wounds, disease or injuries in the line of duty while in the regular army as units them for further service are entitled to admission to the home. The home is in charge of a board of commissioners, consisting of the governor of the home, the adjutant-general of the army, the judge-advocate, the commissary-general, the quartermaster-general, the chief of engineers and the surgeon-general. The present governor is Lieut.-Gen. S. B. M. Young (retired).

CONFEDERATE SOLDIERS' HOMES.

Confederate veterans of the civil war have a home at Beauvoir, near Biloxi, Miss. The residence there of Jefferson Davis in his last years was secured in 1902 as a refuge for helpless old southern soldiers by the United Sons of Confederate Veterans. It is supported by that society and the United Daughters of the Confederacy. Another home for confederate veterans was opened in Washington, D. C., May 24, 1913, by the women of the Southern Relief association.

MISSOURI ATHLETIC CLUBHOUSE FIRE.

Thirty lives were lost in the burning of the building occupied by the Missouri Athletic club and the Boatmen's bank at 4th and Washington avenues, St. Louis, Mo., early on the morning of March 9, 1914. It was a seven-story structure, the bank occupying the first and second floors and the club the remainder. On the fifth and sixth floors were apartments used as sleeping quarters for members and guests of the organization. On the night of the fire most of the rooms were occupied, many of them by men from other cities. The blaze started at 1:50 a. m., and the flames swept so rapidly through the building that the exits were cut off. Some of the sleeping men, who were awakened in

time, escaped by means of a rope of bedsheeta knotted together, which enabled them to reach the roof of an adjoining building; others managed to make their way down a fire escape before the fire made it useless. Thirty men, trapped in their rooms, perished. It was nearly a week before all the bodies were recovered from the ruins and several of them could not be identified. The property loss caused by the fire, the origin of which was not definitely ascertained, was estimated at \$466,000.

March 17 a thirty mile wind blew down the west wall of the ruined clubhouse. The debris crushed into the rear half of the adjoining four-story building of the St. Louis Seed company, killing eight persons and injuring a dozen more.

LINCOLN MEMORIAL COMMISSION.

Chairman—William Howard Taft, New Haven, Conn.

Joseph G. Cannon, Danville, Ill.
George P. Wetmore, Newport, R. I.
Samuel W. McCall, Winchester, Mass.
Speaker Champ Clark, Washington, D. C.
Senator Thomas S. Martin, Washington, D. C.
Joseph C. S. Blackburn, Versailles, Ky.
Special Resident Commissioner—Joseph C. S. Blackburn, senate office building, Washington, D. C.

Secretary—Henry A. Vale, 2415 20th street, Washington, D. C.

Executive and Disbursing Officer—Col. William W. Harts, U. S. A.

The Lincoln memorial commission was created by an act of congress approved Feb. 9, 1911, to advise and construct a memorial of Abraham Lincoln in the city of Washington, D. C. A design submitted by Henry Bacon, a New York architect, was formally accepted by congress Feb. 9, 1913. The memorial, which will stand in Potomac park, is to be a colonnaded edifice containing a statue of Abraham Lincoln, a memorial of the Gettysburg speech, a memorial of the second inaugural address and a symbol of the union of the states. Its cost is limited to \$2,000,000. Ground was broken Feb. 12, 1914. The salary of the special resident commissioner is \$5,000 a year.

SHORTAGE OF MEAT ANIMALS.

The bureau of statistics of the department of agriculture issued a report Feb. 7, 1914, calling attention among other things to the decrease in meat animals in the United States. "With regard to meat animals," says the report, "our estimates indicate an accumulated shortage since the census year [1910] of approximately 19.2 per cent, or 8,538,000 head, of cattle; 11.6 per cent, or 6,509,000 head, of sheep; and 5.3 per cent, or 3,214,000 head, of swine. The indicated total shortage of meat animals since the census of 1910 is therefor approximately 18,259,000 head, or nearly nine beef cattle, seven sheep, and over three hogs for each 100 of the total estimated population in January, 1914. Notwithstanding this tremendous shortage in the number of meat animals in the past four years, a shortage of

over 7,000,000 animals, the estimated farm value of the cattle, sheep and swine on farms on Jan. 1, 1914, was \$395,487,000 greater than the estimated value of these animals in the census year of 1910.

"The shortage of meat animals is probably due to a number of contributing causes, such as the encroachment of farms upon the range territory; absence of a proper range-leasing law permitting economical management and utilization of ranges; the shortage in the corn and forage crop due to the severe drought in Kansas, Nebraska and Oklahoma in 1913, which caused the farmers in those states to dispose of their meat animals; the increase in the value of land and the increased cost of labor and stock feed, resulting in greatly increasing the cost of production; the decline in stock raising on farms in the east and south because of poor marketing facilities resulting from many local slaughtering establishments having been driven out of business by the competition of the great central slaughtering establishments of the west and central west; the temptation to sell live stock at the prevailing high prices rather than to continue to carry them with high-priced stock feed, possible loss from disease or accident, and uncertain prices the following year; increased tendency to operate farms under short-term leases, with no incentive to maintain soil fertility through stock raising; possession of leased farms changed at wrong season of year for handling stock economically; enormous losses from cholera in swine; and the competition of higher prices for other farm products."

Mexico (2,087), North Carolina (1,987), Montana (1,146), New York (635), Washington (673), California (628) and Wisconsin (541). There were 512 Chinese and 1,816 Japanese farmers in California.

PUBLIC UTILITY COMMISSIONS.

Commissions for the administrative control of public utilities now exist in nearly all the states but under different names and with different degrees of power and extent of jurisdiction. Some are known as railroad or railroad and warehouse commissions and others as corporation, public service and public utilities commissions. Most of those having large power and jurisdiction have been created since 1907. Among the states providing most recently for commission control of public service corporations are: Arizona, 1912; Connecticut, 1911; Idaho, 1913; Illinois, 1913; Indiana, 1913; Kansas, 1911; Maryland, 1912; Missouri, 1913; Montana, 1913; Nevada, 1911; New Jersey, 1911; New Mexico, 1912; Ohio, 1913; Pennsylvania, 1913; Rhode Island, 1912; Washington, 1911; West Virginia, 1913. The public utility laws of New York and Wisconsin, upon which many of the others are based, have been amended in the last three or four years.

Briefly stated the duties of commissions of this kind include the general supervision of every

company or individual, except municipalities, operating for the public use any plant, equipment or property used in connection with the transportation of persons or property; the transmission of telegraph and telephone messages; the furnishing of heat, cold, light, power, electricity or water; the conveyance of oil or gas by pipe line; or for the storage or warehousing of goods. The commissions have power to approve or disapprove of franchises, issue permits of operation, supervise the issue of stocks and bonds, regulate rates and service, prevent unjust discrimination, hold inquiries, require reports, enforce the provisions of the public utility acts, and, in general, to see that the rights of the public are observed by the corporations under state control.

The number of commissioners varies from three to seven and the term of office from two to ten years. The pay of each member ranges from \$1,500 in South Dakota to \$15,000 in New York. In Pennsylvania and Illinois the salary is \$10,000.

TEN GREATEST MODERN INVENTIONS.

The Scientific American offered prizes for essays naming and describing the ten greatest modern inventions. First prize was awarded to William I. Wyman of Washington, D. C., whose list was as follows:

- Electric furnace.
- Wireless telegraphy.
- Steam turbine.
- Cyanide process.
- Gasoline automobile.
- Induction motor.
- Motion picture.
- Linotype.
- Acroplane.
- Electric welding.

Critics of the list have suggested that the graphophone, or sound reproducing instrument, should have had a place in it.

MINES AND QUARRIES IN THE UNITED STATES.

[From reports of census bureau, 1912 and 1913.]

In 1909 in the United States, exclusive of Alaska, Hawaii, Porto Rico and other outlying noncontiguous territory, 23,493 operators conducted 27,240 mines and quarries and 166,448 petroleum and natural gas wells. Of the operators 3,749 were engaged solely in development work upon which, in 1909, the sum of \$31,548,736 was expended. In Alaska in 1909 there were 673 operators, who employed 8,025 persons, in the mining industry. The total expenses of these operators amounted to \$13,220,200, while the capital invested was reported as \$47,749,164. The total value of products was \$16,833,427, of which amount \$16,327,752 consisted of gold and silver. In Hawaii and Porto Rico the total value of product for the eighteen operators reported was only \$26,414.

The total number of persons engaged in connection with producing mines, quarries and wells, as reported on Dec. 15, 1909, or nearest representative day, was 1,139,332, of whom wage earners numbered 1,065,253, proprietors and firm members 29,922 and salaried employees 44,157. In mines, quarries and wells for which development work only was carried on there was a total of 27,616 persons, of whom 21,499 were wage earners. Of the total number of persons, 1,166,948, employed in productive and nonproductive mines, 1,158,775 were men 16 years of age and over, and 1,173 were boys under 16 years of age. Distributed by sex, 1,162,840 were male and 4,108 female, the latter being employed in supervisory and clerical capacities.

The total capital invested in all mining enterprises on Dec. 31, 1909, as reported, was \$3,662,527,064, of which \$3,380,525,841 was invested in productive enterprises and \$282,001,223 in those in which development work only was carried on.

IRON WORKERS' DYNAMITE CASES.

Forty-six men, chiefly union labor officials and agents, were placed on trial before Federal Judge A. B. Anderson in Indianapolis, Ind., Oct. 1, 1912, on the charge of complicity in nearly 100 dynamite explosions growing out of the strike against the American Bridge company declared by the International Association of Bridge and Structural Iron Workers. These explosions occurred between August, 1906, and April, 1911, and one of them, that in the Los Angeles Times building, Oct. 1, 1910, resulted in the loss of twenty-five lives. For this last crime James Boyd McNamara was sentenced Dec. 5, 1911, to life imprisonment in San Quentin prison, California, his brother, John J. McNamara, receiving a sentence of fifteen years in the same prison for another explosion. Both had pleaded guilty.

The men brought before Judge Anderson were tried on counts charging conspiracy and violation of the law against carrying explosives. Edward S. Clark of Cincinnati, business agent and president of a local union of the bridge workers' organization, pleaded guilty and was given a suspended sentence. The trial ended Dec. 22, 1912, in a verdict of guilty as to thirty-three of the defendants and Dec. 30 Judge Anderson sentenced them to serve terms ranging from one

year and one day to seven years in the federal prison at Leavenworth, Kas. Among those receiving the heaviest sentences were Frank M. Ryan, Chicago; John T. Butler, Buffalo; Herbert S. Hockin, Detroit; Olaf A. Tveitmo, San Francisco; Eugene A. Clancy, San Francisco; Philip A. Cooley, New Orleans, and Michael J. Young, Boston.

Jan. 3, 1913, the defendants were admitted to bail by the United States Circuit Court of Appeals in Chicago, the bonds being fixed at \$10,000 for each year of imprisonment imposed. Jan. 6, 1914, the court decided as to twenty-four of the defendants that they must serve out their sentences and that six were to be given new trials. The latter were: Olaf A. Tveitmo, San Francisco; William McCain, New Orleans; James E. Ray, Peoria; Fred Sherman, Indianapolis; William Bernhardt, Cincinnati, and Richard H. Houlihan, Chicago. March 9, 1914, the Supreme court of the United States announced that it would not review the cases of the defendants who had been denied new trials.

June 24, 1914, President Wilson commuted to expire at once, the sentences imposed on William Shupe of Chicago, Ill.; Michael J. Hannan of Scranton, Pa.; Frank H. Painter of Omaha, Neb., and Fred J. Mooney of Duluth, Minn.

UNION SCALE OF WAGES AND HOURS OF LABOR.

The bureau of labor statistics in Washington, D. C., in a bulletin dated March 4, 1914, reports the union scale of wages prevailing on May 15, 1913, in the principal mechanical trades in forty important industrial cities of the United States. This means such minimum wages and maximum hours as are established in the scale. The following table shows the per cent of increase in rates of wages per week on full time in 1913 as compared with 1907, 1911 and 1912:

RELATIVE HOURS OF LABOR PER WEEK.

In the following table the hours of labor per week in 1913 are taken as the basis, or 100, and the differences in 1907, 1911 and 1912 are indicated by percentages. Thus the regular full-time hours per week of bakers (first hand) in 1907 were 123 per cent of what they were in 1913.

CONFERENCE ON UNEMPLOYMENT.

The first national conference on unemployment was held in New York, N. Y., Feb. 27-28, 1914, under the auspices of the American Association for Labor Legislation. Addresses and reports were made by Mayor John P. Mitchell of New York; Henry B. Seager, president of the association; Charles Richmond Henderson of Chicago; Frederick C. Howe of New York; William M. Leiserson, Wisconsin superintendent of employment offices, and many others. John B. Andrews, secretary of the association,

in an introductory note to a report of the proceedings at the conference, says:

"In the course of the two days' discussion, despite the great diversity of the viewpoints represented, five main points of agreement became clearly defined. These were: (1) the necessity of accurate labor market statistics; (2) the necessity for a widespread system of efficient labor exchanges; (3) the necessity for regularizing business; (4) the necessity for industrial training and vocational guidance; and

(5) the necessity for unemployment insurance." Prof. Charles B. Henderson, chairman of the committee on resolutions, presented the following report, which was adopted:

Whereas, the reports presented to this national conference by delegates representing twenty-five states and fifty-nine cities show a complete lack in most sections of the country of accurate statistical information in reference to the extent and nature of unemployment; and

Whereas, notwithstanding some difference of opinion as to whether unemployment this winter has been more widespread than usual in all sections, there is general agreement that there is a large amount of unemployment and that this and the irregularity of employment at all times are among the most serious problems of modern industry; and

Whereas, there is also general agreement that the first step toward a solution of the problem is the organization of a connected network of free public employment exchanges and that other steps should be taken as soon as agreement can be reached as to what they should be; therefore, be it

Resolved, 1. That this conference urge the establishment in the federal department of labor of a bureau of distribution, with power to establish employment exchanges throughout the country to supplement the work of state and municipal bureaus, to act as a clearing house of information and promote the distribution of labor throughout the country, provided that such distribution shall not cause the deterioration of the present standards of wages, conditions and hours of employment of American workers, or impair their efforts to improve them.

2. That we also urge upon the legislatures of the various states the establishment or reconstruction of free state employment agencies conforming to the following essential principles: First, That appointments and tenure of office be governed by the merit system and be placed beyond the control of political parties.

Second, That appropriations should be sufficient to make the agencies effective in the highest possible degree.

Third, That the agencies constitute a network of central bureaus and branch offices under central control and direction.

Fourth, That these agencies be so administered as to co-operate with municipal and federal bureaus so as to constitute a truly national system.

Fifth, That every bureau or office be required to register every application as well as every position secured.

Sixth, That frequent reports, publications and other notices give prompt information as to those seeking employment.

Seventh, That these agencies may be held true to their character as belonging to the public and remain neutral in all trade disputes.

3. We recommend that municipalities direct

tion and control of the federal government, where they send labor from state to state or to persons or corporations engaged in interstate commerce in case of interstate business, and of the state authority where they are engaged in distributing labor within a state.

6. We recommend that the American Association for Labor Legislation in affiliation with the American Section of the International Association on Unemployment, prosecute a thorough investigation of the following aspects of the problem of unemployment, and at the same time initiate and promote public action:

First, The labor market, exchanges, statistics, facilities for special classes, advertising, emergency measures, relief agencies.

Second, Regularization of industry—seasonal industries, dovetailing of industries, adjustment of large contracts to run longer periods, casual labor, civil service methods.

Third, Vocational guidance.

Fourth, Legislation—employment agencies, unemployment insurance.

IDLENESS AMONG ORGANIZED WAGE EARNERS.

Complaints of unemployment were general throughout the United States in 1914, but official figures were lacking. The New York state department of labor issued a report on "Idleness among organized wage earners," but the figures were for 1913, season of course, were for the state of New York alone. They are interesting, however, as indicating the time when the era of depression in the labor world began and to some extent the cause. Summarizing the situation the Labor Bulletin (February, 1914) said:

"The returns received by the state department of labor from labor organizations indicate: That idleness was more extensive in 1913 than in 1912:

"That the increase in idleness was due chiefly to a lessened demand for labor:

"That in the first half of the year unemployment (idleness due to the condition of trade) was not, for the six months as a whole, markedly different from that in 1912, but after March was considerably higher than the average for recent years:

"That in the second half of the year unemployment was not only greater than in 1912, but was greater than in any other recent year except 1908 and very nearly equaled that year:

"That up to the last two months of the year the increase over former years in unemployment remained practically constant, but that in each of the last two months the increase grew larger:

"That at the close of the year unemployment, especially in New York city, has reached a point in excess of that shown in any of the last nine years."

The following table shows the mean monthly percentage of idleness in representative trade unions in New York state by industries:

their attention to the local problem of unemployment, closely defining its relief and industrial phases with a view to dealing with the latter in a businesslike, efficient way through a central labor bureau which shall distribute employees to its various departments.

4. We recommend that private employment agencies for profit be brought under the inspection

Idleness is due to three principal causes—labor disputes, disability and unemployment caused chiefly by lack of work. The idleness due to disability remained at the usual figure. The mean idleness for the 1913 caused by labor disputes was 3.5 per cent, as compared with 0.9 per cent in 1912, but this was due in great measure to the garment workers' strike in New

York city, lasting from Dec. 30, 1912, to March 12, 1913. The mean percentage of idleness for the year 1913 due to the condition of the trade was 20.9, as against 15.2 for 1912.

UNEMPLOYMENT IN NEW YORK CITY.

Feb. 1, 1914, the Association for Improving the Condition of the Poor estimated that "on any given day this winter there are at least 325,000 men unemployed in this city." These figures were challenged by James M. Mitchell, New York commissioner of labor, and others

also considered them too large, but no authoritative figures were produced.

UNEMPLOYMENT IN CHICAGO.

The police department of Chicago concluded a census of the unemployed in the city March 4, 1914. The number of idle in the city was placed at 45,617, distributed as follows: Residents of the city, 28,793; skilled, 12,774; foreigners, 32,278; honestly seeking work, 32,812. Other estimates of the unemployed ranged as high as 100,000.

COMMISSION ON INDUSTRIAL RELATIONS.

Chairman—Frank P. Walsh, lawyer, Missouri.
John R. Commons, professor, Wisconsin.
Mrs. J. Borden Harriman, philanthropist, New York.
Frederic A. Delano, railway official, Illinois.
Harris Weinstein, merchant, California.
S. Thurston Ballard, miller, Kentucky.
John B. Lennon, labor representative, Illinois.
James O'Connell, labor representative, District of Columbia.
Austin B. Garrettson, president Order Railway Conductors, Iowa.
Managing Expert—W. Jett Lauck, Virginia.
Executive Secretary—R. P. Ritter, Missouri.
Office—Southern building, Washington, D. C.

The duties of the commission are to inquire into the general condition of labor in the principal industries of the United States, including agriculture, especially those which are carried on in corporate forms; the existing relations between employers and employees; the effect of industrial conditions on public welfare and the

rights and powers of the community to deal therewith; the conditions of sanitation and safety of employees and provisions for protecting the life, limb and health of same; the growth of associations of employers and of wage earners, and the effect of such associations upon their relations; the extent and results of methods of collective bargaining; the methods which have been tried in any state or in foreign countries for maintaining mutually satisfactory relations between employees and employers; the methods for avoiding or adjusting labor disputes through peaceful and conciliatory mediation and negotiations; the scope, methods and resources of existing bureaus of labor and ways of increasing their usefulness; the question of illegal entry of Asiatics into the United States or its insular possessions and the methods of such admission, and report to congress recommendations to prevent the same; and also into the underlying causes of dissatisfaction in the industrial situation and report its conclusions thereon. (Act of Aug. 23, 1913.)

Canal opened for general traffic, Aug. 15, 1914.

PLAN OF THE CANAL.

The entire length of the Panama canal from deep water in the Atlantic to deep water in the Pacific is 50.5 miles. Its length on land is 40.5 miles. In passing through the canal from the Atlantic to the Pacific a vessel enters a channel with a bottom width of 500 feet in Limon bay and follows this for about seven miles to Gatun, where it enters a series of three locks in flight and is lifted eighty-five feet to the level of the Gatun lake. It sails at full ocean speed through this lake in a channel varying from 1,000 to 500 feet in width, for a distance of about twenty-four miles, to Bas Obispo, where it enters the Culebra cut. It sails through the cut, a distance of about nine miles, in a channel with a bottom width of 300 feet, to Pedro Miguel. There it enters a lock and is lowered 20½ feet to a small lake at an elevation of 54½ feet above sea level, and sails through this for about 1¼ miles to Miraflores. There it enters two locks in series and is lowered to sea level, passing out into the Pacific through a channel 8¼ miles in length, with a bottom width of 500 feet. The depth of the approach channel on the Atlantic side, where the tidal oscillation does not exceed 1¼ feet, is 41 feet at mean tide.

and on the Pacific side, where the maximum oscillation is 23 feet, the depth is 45 feet at mean tide.

GATUN DAM.

The Gatun dam, which forms Gatun lake by impounding the waters of the Chagres river and other streams, is nearly 1½ miles long measured on its crest, nearly half a mile wide at its base, about 400 feet wide at the water surface, about 100 feet wide at the top and its crest is at an elevation of 115 feet above mean sea level, or 30 feet above the normal level of the lake. The top and upstream slope are riprapped. The spillway is a concrete lined opening 1,200 feet long and 300 feet wide, cut through a hill of rock nearly in the center of the dam, the bottom of the opening being ten feet above sea level. It is fitted with gates and machinery for regulating the water level of the lake.

The water level of Gatun lake, extending through the Culebra cut, is maintained at the south end by an earth dam connecting the locks at Pedro Miguel with the high ground to the westward, about 1,700 feet long, with its crest at an elevation of 105 feet above mean tide. A small lake between the locks at Pedro Miguel and Miraflores is formed by dams connecting the walls of Miraflores locks with the high ground on either side. The dam to the westward is of earth, about 2,700 feet long, having its crest about 15 feet above the water in Miraflores lake. The east dam is of concrete, about 500 feet long, and forms a spillway for Miraflores lake, with crest gates similar to those at the spillway of the Gatun dam.

GATUN LAKE.

Gatun lake covers an area of 164 square miles, with a depth in the ship channel varying from 85 to 45 feet. Throughout the first 16 miles from Gatun the width of the channel is 1,000 feet; then for 4 miles it is 800 feet and for 4 miles more 500 feet, when the entrance to Culebra cut, at Bas Obispo, is reached. The water level in the cut is that of the lake and the bottom width of the channel is 300 feet.

THE LOCKS.

There are twelve locks in the canal, all in duplicate; three pairs in flight at Gatun, with a combined lift of 35 feet; one pair at Pedro Miguel, with a lift of 30½ feet, and two pairs at Miraflores, with a combined lift of 54 feet at mean tide. The dimensions of all are the same: a usable length of 1,000 feet and a usable width of 110 feet. Each lock is a chamber, with walls and floors of concrete and water tight gates at each end.

The side walls are 45 to 50 feet wide at the surface of floor, perpendicular on the face and narrow from the point 2¼ feet above the floor until they are 8 feet wide at the top. The middle wall is 60 feet wide, approximately 81 feet high and each face is vertical. At a point 4¼ feet above the surface of the floor and 15 feet above the top of the middle culvert this wall divides into two parts, leaving a space down the center much like the letter "U," which is 19 feet wide at the bottom. In this center space, which is 44 feet wide at the top, is a tunnel divided into three stories or galleries. The lowest gallery is for drainage; the middle for the wires that carry the electric current to operate the gate and valve machinery, which will be installed in the center wall, and the upper is a passageway for the operators. The lock chambers are filled and emptied through lateral culverts in the floors, connected with main culverts, 18 feet in diameter, in the walls, the water flowing in and out by gravity.

The lock gates are steel structures, 7 feet thick, 65 feet long and from 47 to 82 feet high. They weigh from 300 to 600 tons each. For the entire canal 92 leaves are required, the total weighing 57,000 tons. Intermediate gates are used in the locks to save water and time. If desired, in locking small vessels through the gates, being so fixed as to divide the locks into chambers 600 and 400 feet long respectively. Of the vessels navigating the high seas 96 per cent are less than 600 feet long.

No vessel is permitted to enter or pass through

the locks under its own power. Electricity is used to tow all vessels into and through the locks and to operate all gates and valves, power being generated by water turbines from the head created by Gatun lake. The time required to pass a vessel through all the locks is three hours, one hour and a half in the three locks at Gatun and about the same time in the three locks on the Pacific side. Time of the passage of a vessel through the entire canal varies from ten to twelve hours.

CANAL ZONE.

The Canal Zone contains about 443 square miles. It begins at a point three marine miles from mean low water mark in each ocean and extends for five miles on each side of the center line of the route of the canal. It includes the group of islands in the Bay of Panama, named Perico, Naos, Culebra and Flamenco. The cities of Panama and Colon are excluded from the zone, but the United States has the right to enforce sanitary ordinances and maintain public order there in case the republic of Panama should not be able to do so. Of the 443 square miles in the zone the United States owns 322 and private persons 121. The private property may, however, be acquired at any time by the United States by purchase or by the exercise of the right of eminent domain.

COMPLETION OF CANAL.

The Panama canal would have been completed early in the fall of 1913 so that small vessels could have passed through it but for delays occasioned by slides and breaks in the Culebra cut. This necessitated a large amount of additional excavation by steam shovels and dredges. Dry excavation was completed Sept. 10. The massive Gatun dam was finished June 14 and Sept. 26 the first vessel, a tug, was locked through the gates. At the Pacific end canal vessels passed through the Miraflores and Pedro Miguel locks Oct. 14 and 15, 1913. Dredges were put at work at both ends of the principal slide at Cucaracha on the east bank of the canal, and the Panama Canal Co. to excavate a passage which would permit water communication from the Atlantic to the Pacific. By Aug. 14, 1914, a channel had been excavated wide and deep enough to permit all but vessels of a very large size to pass through and on that date the canal was opened for general traffic. A number of freight barges had passed through as early as May 14.

TOLLS.

Under the Panama canal act, approved Aug. 24, 1912, the president of the United States is authorized to fix the tolls to be charged for use of the canal. He may change them by giving six months' notice. The act provided that no tolls should be levied upon vessels engaged in the coastwise trade of the United States, but this clause was repealed by congress June 15, 1914. (See "Panama Canal Tolls Act" in this volume.) Vessels owned by railroads or by any company or person doing business in violation of antitrust laws are excluded from the use of the canal.

By a proclamation issued Nov. 13, 1912, President Taft fixed the tolls to be paid by foreign shipping for passage through the Panama canal as follows:

On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic feet—of actual earning capacity.

On vessels in ballast without passengers or cargo, 40 per cent less than the rate of tolls for vessels with passengers or cargo.

Upon naval vessels other than transports, colliers, hospital ships and supply ships, 50 cents per displacement ton.

Upon army and navy transports, colliers, hospital ships and supply ships, \$1.20 per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

CANAL FORCE.

The total force at work on the canal and railroad June 24, 1914, was 29,673. Canal employees numbered 25,239. Panama railroad 4,343 and contractors' employees 41. The number of "gold" or white American employees was 4,257. The great majority of laborers were West Indian negroes.

PANAMA CANAL TOLLS ACT.

EXEMPTION CLAUSE REPEALED.

Before the Panama canal bill became a law (Aug. 24, 1912), Great Britain had protested that the paragraph exempting American vessels in the coastwise trade from the payment of tolls was in violation of section 1, article 3, of the Hay-Pauncefote treaty of Nov. 8, 1901, providing for the neutrality of the proposed isthmian canal. This treaty was entered into to remove any objection which might arise under the Clayton-Bulwer treaty of April 19, 1850. Section 1, article 3, of the Hay-Pauncefote treaty provides:

"The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules on terms of entire equality, so that there shall be no discrimination against any nation or its subjects in respect of the conditions or charges of traffic or otherwise. Such conditions and charges of traffic shall be just and reasonable."

After the passage of the Panama canal act with the paragraph exempting American coastwise vessels from paying tolls Great Britain, through Ambassador Bryce, presented a formal protest Dec. 9, 1912, insisting that the exemption was contrary to the Hay-Pauncefote treaty as interpreted in the light of the Clayton-Bulwer treaty. Jan. 23, 1913, Secretary of State Knox replied to the British protest, declaring that the American coastwise trade would not be permitted to extend its operations into foreign competitive fields, and that increased tolls would not be laid on foreign shipping to balance the remission to American ships. He said he could not agree with the British interpretation of the canal treaties so far as they limit the freedom of action of America or infringe on British treaty rights.

CANAL EARNINGS.

The first receipts from the use of the canal were reported in May, 1914, and consisted principally of tolls collected from freight transhipment at Balboa and taken through to Cristobal on barges to relieve the congestion existing at that time on the railroad. The canal was officially opened to commerce Aug. 15, 1914, and for the remainder of that month the receipts amounted to \$91,664.55. The August earnings in detail were:

and out of congress for many months. The opponents of tolls exemption for American coastwise vessels, led by Senator Elihu Root of New York, maintained that national honor required the observance of the Hay-Pauncefote treaty as viewed by Great Britain. The defenders of the exemption clause in the Panama canal act insisted that the hands of the United States were not tied by the treaty. They claimed that the words "all nations" did not apply to the country that built the canal but to foreign nations.

President Wilson after his inauguration March 4, 1913, was occupied with tariff and currency legislation and did not have an opportunity to consider the canal tolls matter until he had been in office a full year. Up to that time, so far as official action was concerned, the subject remained in abeyance.

PRESIDENT'S MESSAGE.

March 5, 1914, President Wilson read the following message to the house and senate in joint session:

"Mr. Speaker, Mr. President, gentlemen of the congress: I have come to you upon an errand which can be very briefly performed, but I beg that you will not measure its importance by the number of sentences in which I state it. No communication I have addressed to the congress carried with it graver or more far-reaching implications as to the interest of the country, and I come now to speak upon a matter with regard to which I am charged in a peculiar degree, by the constitution itself, with personal responsibility.

"I have come to ask you for the repeal of that provision of the Panama canal act of Aug. 24, 1912, which exempts vessels engaged in the coastwise trade of the United States from payment of

tolls, and to urge upon you the justice, the wisdom and the large policy of such a repeal with the utmost earnestness of which I am capable.

"In my own judgment, very fully considered and maturely formed, that exemption constitutes a mistaken economic policy from every point of view, and is, moreover, in plain contravention of the treaty with Great Britain concerning the canal concluded on Nov. 18, 1901. But I have not come to urge upon you my personal views. I have come to state to you a fact and a situation. Whatever may be our own differences of opinion concerning this much-debated measure, its meaning is not debated outside the United States. Everywhere else the language of the treaty is given but one interpretation, and that interpretation precludes the exemption I am asking you to repeal. We consented to the treaty; its language we accepted, if we did not originate; and we are too big, too powerful, too self-respecting a nation to interpret with too strained or refined a reading the words of our own promises just because we have power enough to give us leave to read them as we please. The large thing to do is the only thing that we can afford to do, a voluntary withdrawal from a policy everywhere questioned and misunderstood. We ought to reverse our action without raising the question whether we were right or wrong, and so once more deserve our reputation for generosity and for the redemption of every obligation without quibble or hesitation.

"I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure."

HOUSE PASSES REPEAL BILL.

Bills for the repeal of the tolls exemption clause in the Panama canal act were introduced in both the house and the senate. Action was first taken in the house when on March 26 the committee on rules brought in a resolution limiting the debate on the tolls exemption bill to twenty hours. The resolution was energetically opposed by Speaker Champ Clark of Missouri, Oscar Underwood of Alabama, John J. Fitzgerald of New York and other democrats as well as by many republicans and progressives, but it was adopted the following day by a vote of 200 to 176. Fifty-five democrats voted in opposition to the resolution. Debate on the repeal bill began at once and continued until the evening of March 31, when it was passed by a vote of 247 to 161. The measure, which was introduced by representative T. W. Sims of Tennessee, was as follows:

Be it enacted, etc., That the second sentence in section 5 of the act entitled "An act to provide for the opening, maintenance, protection and operation of the Panama canal, and the sanitation and government of the canal zone," approved Aug. 24, 1912, which reads as follows: "No tolls shall be levied upon vessels engaged in the coastwise trade of the United States," be, and the same is hereby, repealed.

Sec. 2. That the third sentence of the third paragraph of said section of said act be so amended as to read as follows: "When based upon net registered tonnage for ships of commerce the tolls shall not exceed \$1.25 per net registered ton, nor be less than 75 cents per net registered ton, subject, however, to the provisions of article 19 of the convention between the United States and the republic of Panama, entered into Nov. 18, 1903."

The debate on the measure was acrimonious, especially on the part of the democrats opposing it. Most of them denounced the repeal of the exemption clause as an act of cowardice and a surrender to Great Britain. Speaker Clark said he would rather see the canal filled up with bowlders than to see England control it.

Summary of the vote on the passage of the Sims repeal bill: For, democrats, 220; republicans, 25; progressives, 2. Against, democrats, 52; republicans, 92; progressives, 17. The complete vote was as follows:

IN THE SENATE.

The bill was sent to the senate, where it was referred to the committee on interoceanic canals. This committee reported the measure back to the senate April 29 by a vote of 8 to 6 without recommendation. The debate was extended and at times bitter, and it was not until June 11 that a vote upon the passage of the repeal bill was reached. An amendment drawn up by Senators Norris and Simmons declaring that the act shall not be construed as relinquishing any treaty rights to the exemption of American vessels from the payment of Panama canal tolls was adopted June 10 by a vote of 50 to 40. The vote on the passage of the bill as amended was 50 yeas to 35 nays, as follows:

FINAL ACTION IN HOUSE.

The bill as amended and passed by the senate was reported to the house the next day (June 12) and the amendment was concurred in by a vote of 216 to 71. The text of the bill as finally adopted and approved is as follows:

TEXT OF ACT.

Be it enacted by the senate and house of representatives of the United States of America, in congress assembled, That the second sentence in section 5 of the act entitled, "An act to provide for the opening, maintenance, protection and operation of the Panama canal, and the sanitation and government of the canal zone," approved Aug. 24, 1912, which reads as follows: "No tolls shall be levied upon vessels engaged in the coastwise trade of the United States," be and the same is hereby repealed.

Sec. 2. That the third sentence of the third paragraph of said section of said act be so amended as to read as follows: "When based upon net registered tonnage for ships of commerce, the tolls shall not exceed \$1.25 per net registered ton, nor be less than 75 cents per net registered ton, subject, however, to the provisions of article 19 of the convention between the United States and the republic of Panama, entered into Nov. 18, 1903."

Provided, That the passage of this act shall not be construed or held as a waiver of any right the United States may have under any treaty with Great Britain, ratified Feb. 21, 1902, or the treaty with the republic of Panama, ratified Feb. 26, 1904, or otherwise to discriminate in favor of its vessels by exempting the vessels of the United States or its citizens from the payment of tolls for passage through said canal, or as in any way waiving, impairing or affecting any right of the United States under said treaty, or otherwise with respect to the sovereignty over or the ownership, control and management of said canal and the regulation of the conditions or charges of traffic through the same.

REVOLUTIONS IN MEXICO.

PRESIDENTS SINCE MAY 25, 1911.

Francisco I. Madero—Oct. 1, 1911, to Feb. 19, 1913.
Victoriano Huerta—Feb. 19, 1913, to July 15, 1914.
Francisco Carranza—July 15, 1914, to Aug. 14, 1914.
Venustiano Carranza—Aug. 14, 1914.
Eulalio Gutierrez—Nov. 1, 1914.

Turmoil and bloodshed continued in Mexico throughout the year 1914 up to the time this edition of the Almanac and Year-Book went to press. The United States was obliged to take a hand in the conflict and, though no war was formally declared, the military and naval forces of the country were used in taking temporary possession of the port of Vera Cruz. This was not accomplished without an armed struggle in which a number of lives were lost on both sides and it looked for a time as if a serious war could not be averted. The policy of President Wilson to apply peaceful and moral pressure to the situation prevailed and succeeded at least to the extent of finally forcing Victoriano Huerta from the presidential chair in the City of Mexico and sending him into exile.

When the year opened the war between the constitutionalists and the federalists was still in progress. The northern division of the federal army was driven across the American border near Presidio, Tex., Jan. 10, where 2,800 soldiers and 1,500 camp followers surrendered to the American troops. They afterward were interned at Fort Wingate in New Mexico.

While Gen. Venustiano Carranza was nominally the commander in chief of the rebel forces in the north, it became evident early in the year that the real fighting leader was Gen. Francisco Villa, also known as Pancho Villa. He was credited with being ignorant, bloodthirsty and the possessor of a long criminal record, but he had courage and some military ability and managed to acquire great influence over the rank and file of the rebels. He was charmed with aim at the presidency of Mexico himself, but disclaimed any such ambition.

In an effort to bring President Huerta to terms President Wilson issued a proclamation Feb. 3 revoking the embargo on arms applied to Mexico by President Taft. It was officially explained at the white house that the Taft order of March 14, 1912, was intended to discourage incipient revolts against the regularly constituted authorities of Mexico, but that since then the circumstances of the case had radically changed. "There is now no constitutional government in Mexico," declared the president, "and the existence of this order hinders and delays the thing the government of the United States is now insisting upon, namely, that Mexico shall be left free to settle her own affairs and as soon as possible put them upon a constitutional footing by her own force and counsel." The lifting of the embargo was followed by heavy shipments of arms and ammunition to the rebel forces in northern Mexico. At the same time President Huerta took steps to increase the federal forces in the field.

One of the incidents of the guerrilla warfare in the north of Mexico at this time was the deliberate wrecking of a passenger train in the Cumbre railroad tunnel, Feb. 4, resulting in the death by wounds or fire of seventeen Americans and forty-one Mexicans. The crime was laid at the door of a bandit named Maximo Castillo, who was subsequently captured on American soil, near Hachita, N. M.

KILLING OF BENTON.

Feb. 14 Clemente Vergara, an American citizen, was lured over the border into Mexico and killed by federal soldiers at Hidalgo. March 4 his body was exhumed at night from the cemetery and brought to Texas, where it was turned over to his relatives. Before this occurred, however, the excitement along the frontier had been fanned to fever heat by the killing of William S. Benton, a British subject, Feb. 17, at or near Juarez, Mexico. It was at first alleged that he was shot by Gen. Villa himself, but afterward it was claimed that he had been executed after a trial by court-martial. The crime did not become known until three days later, when it was reported in El Paso. The citizens held a meeting

on the evening of Feb. 20 at which resolutions were adopted protesting against the reign of criminal lawlessness in Mexico, the confiscation of the property of foreigners, the murder of Benton and many others, the brutal mistreatment of women and the bloody careers of such men as Gen. Inez Salazar, Maximo Castillo and Francisco Villa, and demanding that steps be taken to make all the facts public and to protect American citizens in Mexico.

Secretary Bryan ordered a full investigation into the killing of Benton and arrangements were made for a commission composed of Maj. W. T. Davidson and C. J. Manley, army surgeons; George C. Carothers, special agent of the state department, and Charles Perceval, British consul at Galveston, to make the inquiry, but nothing was accomplished. Gen. Villa told conflicting stories and, apparently alarmed by the storm he had aroused, left Juarez and went to Chihuahua. He then announced that Benton's body had been brought to the latter city and buried in the cemetery, where it might be disinterred and examined on certain conditions. The British people and parliament were stirred over the affair, but the authorities concluded to rely upon the American government to see that justice was done. Secretary Bryan, getting no satisfaction from Gen. Villa, appealed to Gen. Carranza, who retorted that he should have been called upon in the first place for information, but in any event the American state department had no right to inquire into a matter concerning the British government. He, however, let it be made known that he had ordered an investigation on behalf of the constitutionalists. This was on Feb. 28, and the next day the proposed trip of the Anglo-American commission to Chihuahua to examine Benton's body to determine the manner of his death was countermanded by Secretary Bryan. Both Villa and Carranza firmly declined to permit the inquiry to proceed.

Gen. Carranza appointed a commission March 3 to investigate the Benton killing. This commission reported April 5 that Benton was killed, not at Juarez and not after a court-martial, but at Samalayuca, thirty-two miles south of Juarez, and that the man responsible for his death was Rodolfo Fierro, a rebel major and superintendent of railways for Gen. Villa. The latter, according to the report, had a quarrel in Juarez with Benton, who applied many epithets to him and threatened him. Thereupon Villa had Benton arrested and placed in Maj. Fierro's charge, with instructions to take him to jail in Chihuahua. On the way there Fierro killed his prisoner and reported to Villa that he did it because Benton tried to escape. Villa's legal advisers suggested to him that a fake court-martial be held and that the report be made that Benton had been executed by order of that body. This was done. On his way to Chihuahua Villa had Benton's body disinterred and then discovered pistol and rifle wounds which could not have been made if the man had been trying to escape. He took the body to Chihuahua for burial and then placed Fierro in jail. The report exonerated Villa and held Fierro solely responsible.

March 9 Albert E. Fox of New Mexico made a speech in the United States senate in which he gave a long list of outrages committed in Mexico since the revolution began in which Americans and persons from other countries were the victims of robbery, assault, outrage and murder without any effort having been made by the American government to obtain reparation. Gov. O. B. Colquhitt of Texas added fuel to the flames by declaring that the people along the Mexican border were given inadequate protection and proposing to use state troops for that purpose. "I take the position," he said, "that each state has the right of self-defense and ought to defend that right when the federal government does not afford the necessary protection."

To meet the criticism of Gov. Colquhitt and others holding similar views the Washington authorities ordered two more expeditions to the Mexican border. March 11, making a total of about 18,000 men in the field. Nearly 11,000 of these were in camp at Texas City under command of Brig.-

Gen. Frederick Funston, while the others were scattered along the frontier from Brownsville, Tex., to Nogales, Ariz., under the command of Brig.-Gen. Tasker H. Bliss, the largest garrisons being maintained at El Paso, Nogales, Douglas, Laredo, Eagle Pass and Brownsville.

Gen. Villa left Chihuahua March 16 to take charge of a concentration of rebel troops against Torreon. President Huerta made energetic efforts to send re-enforcements toward the north, but his troops did not appear to be eager for service in that part of the country. Some of them threatened to mutiny and 149 of them were lined up against a stone wall at Jofutla and shot down by firing squads. The Mexican newspapers announced that more men were executed on this occasion than at any other time since "Gen. Scott hanged seventy-eight deserters in the suburbs of the capital in 1847."

CAPTURE OF TORREON.

Fighting for the possession of Torreon began on the afternoon of March 21, the rebels under Gen. Villa, Gen. Benavides and Gen. Garcia taking possession of the towns of Bermejillo, Lerdo and Mapimi to the north and northwest of the city. The federals offered a determined resistance at Gomez Palacio, a few miles out from Torreon, and here, from the 23d to the 26th, one of the first real battles of the revolution was fought. The final assault on the town was delivered on the 26th, and on the 27th Gen. Villa entered the place with his troops. There was no halt in the advance; the federals fell back slowly and it was not until late on the evening of April 2 that the rebels were in full possession of Torreon. Gen. Refugio Velasco, the federal commander, and his troops retreated toward the south and east and most of them escaped. In a telegram to Gen. Carranza announcing the victory Gen. Villa said:

"In this moment the remnants of the federals are leaving Torreon in flight—after eleven days of terrible fighting in which we lost 500 killed and 1,500 wounded, while the federals, from the enormous number of bodies burned, must have had more than 1,000 killed. The number of wounded I am unable to estimate."

Until the capture of Torreon the rebels had suffered severely from thirst, hunger, heat and fatigue. After the town fell into their hands they had an abundant supply of everything. The pursuit of the federals was vigorous and continued until April 13, when Gen. Velasco's fleeing army was defeated at San Pedro de las Colonias, forty miles east of Torreon, after nine days of fighting in which the rebels lost 5,000 in killed and wounded. The federal losses were equally heavy.

One of Gen. Villa's first acts after the capture of Torreon was to order the deportation of some 600 Spanish residents of the city on the ground that they were inimical to the revolution. They were loaded on trains and sent to El Paso, Tex., where they arrived April 8. Appeals by the Spanish government on their behalf were rejected by Gen. Carranza and the other rebel leaders.

AMERICAN FLAG INSULTED.

Following the fall of Torreon the rebels began active operations against Monterey and Tampico, but interest in these ceased when public attention was suddenly centered upon an incident at Tampico, which had most serious consequences. On the morning of April 9 the paymaster of the United States gunboat Dolphin, Charles C. Conn, and seven men in a whaleboat flying the American flag put in at the flutbridge landing in Tampico for a supply of gasoline. The men were in uniform but unarmed. A department of Mexican federals, commanded by Col. Hinojosa, placed the paymaster and his men under arrest, marched them through the streets and then, by order of a superior officer, released them. Later in the day Rear-Admiral Henry T. Mayo, in command of the American naval forces at Tampico, sent the following letter to Gen. Ignacio Morales Zaragoza, the federal commander of the Tampico garrison:

"This morning an officer and squad of men of the Mexican military forces arrested and marched through the streets of Tampico a com-

missioned officer of the United States navy, the paymaster of Dolphin, together with seven men composing the crew of the whaleboat of the Dolphin. At the time of this arrest the officer and men concerned were unarmed and engaged in loading cases of gasoline, which had been purchased on shore. Part of the men were on the shore, but all, including the man or men in the boat, were forced to accompany armed Mexican forces.

"I do not need to tell you that taking men from a boat flying the United States flag is a hostile act not to be excused. I have already received your verbal message of regret that this event has happened and your statement that it was committed by an ignorant officer. The responsibility for a hostile act cannot be avoided by the plea of ignorance.

"In view of the publicity of this occurrence, I must require that you send by suitable members of your staff formal disavowal and apology for the act, together with your assurance that the officer responsible for it will receive severe punishment. Also that you publicly hoist the United States flag in a prominent position on shore and salute it with twenty-one guns. The salute will be returned by this ship.

"Your answer to this communication should reach me and the called for salute be fired within twenty-four hours from 6 p. m. of this date."

Gen. Zaragoza complied with Admiral Mayo's demand for an apology and for the punishment of Col. Hinojosa, but declined to fire the salute to the American flag except by order of Gen. Huerta. The provisional president approved of the apology and the punishment of the subordinate officer, but he maintained that there was no occasion for saluting the flag. The hour set for firing the salute was 6 p. m. Friday, April 10, but as the exchange of dispatches between Admiral Mayo and the authorities in Washington and the Mexican capital were then in progress the time was extended until a definite understanding could be arrived at.

President Wilson and Secretary of the Navy Daniels both approved of Admiral Mayo's action and declared that the salute would be fired, though the element of time was not considered important by them in view of the difficulties of communication between Washington and Mexico. John Lind arrived in Washington April 13 and during the following days and weeks was in frequent conference with the president and Secretary Bryan.

By direction of President Wilson orders were issued April 14 for the concentration of the Atlantic fleet at Tampico and Vera Cruz and of the Pacific fleet at ports on the west coast of Mexico. At the same time Americans in that country were advised to leave as soon as possible. This action followed a cabinet meeting in Washington in which the whole Mexican situation was reviewed. At this time the war vessels at Tampico under command of Rear-Admiral Mayo were the battle ships Utah, Connecticut and Minnesota, the cruisers Chester and Des Moines and the gunboat Dolphin. At Vera Cruz under Rear-Admiral Fletcher were the battle ship Florida, the transport Prairie, the mine depot ship San Francisco, the fuel ship Cyclops and the hospital ship Solace. The other ships of the fleet were at various Atlantic ports of the United States and preparations were at once made to send most of them to Tampico under Rear-Admiral Charles J. Badger, the commander in chief.

Rear-Admiral Badger sailed from Hampton roads at noon, April 15, with the battle ships Arkansas, New Hampshire, Vermont and New Jersey, the collier Lebanon and the naval tugs Patuxent, Sonoma and Patapasco.

On the 16th it was reported that Gen. Huerta had agreed to fire salute of twenty-one guns to the American flag as demanded by Admiral Mayo. This for a time led to the belief that the "Tampico incident" would speedily be closed, but no orders to recall the Atlantic fleet were issued. It soon developed, however, that Huerta would consent to the salute only on condition that it be returned gun for gun by an American warship. On the 17th Charge d'Affaires O'Shaugh-

nessay was instructed to inform Huerta that such a condition was inadmissible, though a return salute would be fired in accordance with custom at the conclusion of the Mexican salute to the flag. This message was duly conveyed to the federal president.

Saturday, April 18, the following statement was issued at the white house in Washington:

"Gen. Huerta is still insisting upon doing something less than had been demanded and something less than would constitute an acknowledgment that his representatives were actively in the wrong in the indignities they have put upon the government of the United States. The president has determined that if Gen. Huerta has not yielded by 6 o'clock on Sunday afternoon he will take the matter to congress on Monday."

MEXICO'S SIDE OF CASE.

This ultimatum was transmitted to Gen. Huerta by Charge O'Shaughnessy and the following reply signed by Senor Portillo y Rojas, Mexican foreign minister, was handed to the American representative at 6 o'clock Sunday evening, April 19.

"On the 9th of the present month, between 11 a. m. and noon, a boat without an American flag and with nine marines and one officer landed at a point called the Beach of Ixturbide in Tampico. Col. Raymond Hinojosa, who has charge of defending that point, detained the marines and officer and conducted them to the presence of the general who had command of the port, Ignacio Morelos Zaragoza. It should be remembered that at this time the port not only was under military control, but was withstanding an attack by rebels.

"Gen. Zaragoza immediately and without even investigating the case put the marines and the officer at liberty, placed Hinojosa in prison, and sent an apology to Rear-Admiral Mayo, the commander of the American fleet.

"We thought the incident was closed, but unfortunately this was not so because Mayo sent to him some time afterward an ultimatum in which he asked that a second apology be presented to him by the staff of the chief of the fort, Gen. Zaragoza; that the American flag be hoisted at a public place in Tampico and saluted by twenty-one guns and besides the severe punishment of Hinojosa, stipulating that all this be done within twenty-four hours. The time was extended when diplomatic pourparlers were begun between the subsecretary of foreign affairs in Mexico, the minister being absent at that date, and continued until now.

"President Huerta, when informed of the case, ordered another investigation of the facts and the punishment of the guilty officer, if it were proved he was blameworthy. He also authorized the minister of foreign affairs to express regret on account of the incident.

"When he became aware that the American government supported the request of Rear-Admiral Mayo relative to a salute to the American flag, which had not been insulted, he proposed to show his good will toward the American people, although he did not think that such a request was just, proposing that the flags of the two nations be hoisted and saluted reciprocally and simultaneously.

"The American government did not agree with that idea, but insisted upon Rear-Admiral Mayo's request, giving assurance that according to international practice the salute would be returned by American cannon after the salute to the American flag. This was not accepted by President Huerta, who insisted upon his proposition.

"Then the American government determined that pourparlers be brought to an end by the final decision of President Huerta within a term which expired at 6 o'clock Sunday night, announcing that if by that time he had not agreed to the salute of the American flag as requested the affair would be presented to the American congress for decision.

"The Mexican government, believing the salute in question was of no importance, unless previously and formally agreed upon by both parties, proposed the signing of a protocol and the minister of foreign affairs presented last night a draft

of such protocol to the American charge d'affaires, Nelson O'Shaughnessy.

"O'Shaughnessy answered that he must consult his government; that he would advise the minister of the nature of this answer and he later communicated to the minister the fact that his government did not accept the idea of a signature of any protocol whatever, but wanted an unconditional salute of the American flag.

"This the Mexican government refused, feeling it had done all possible, in view of the friendly understanding between the two governments, and believing the acceptance of such an imposition would be equivalent to yielding by Mexico to humiliation. The Mexican government is confident that the civilized world will find its conduct has been wise and temperate, that it has observed all the requirements of international law and that the refusal to yield further is inspired only by a regard for its honor and dignity."

PROTOCOL PROPOSED.

The draft of the protocol by Mexico, refused signature by the United States, put into formal shape the proposition that the flags of the United States and Mexico be hoisted and saluted reciprocally and simultaneously.

President Wilson was at White Sulphur Springs, W. Va., when the matter of signing the protocol came up early on Sunday morning, but Secretary Bryan cabled to Mr. O'Shaughnessy that the signature to a protocol was impossible, as it might be construed as a recognition of the Huerta government. Mr. Wilson, informed of Mr. Bryan's reply, telegraphed his emphatic approval and instructed the secretary of state to advise Mr. O'Shaughnessy that the American government's terms were unconditional.

Upon receiving the refusal of President Huerta to accede to the unconditional demand of the government, the United States, Charge O'Shaughnessy informed the Mexican foreign office that so far as the American embassy was concerned the matter was closed.

On return of President Wilson to Washington on the morning of April 20 a conference was held at the white house in which the president, Secretaries Bryan, Garrison and Daniels, Rear-Admirals Blue and Flske, and John Lind took part. It was then decided that the port of Vera Cruz should be seized by the navy and held until the dispute with the Huerta government in Mexico had been settled. This plan had evidently been previously considered, as the Atlantic fleet under Rear-Admiral Badger proceeded directly to Vera Cruz instead of to Tampico. The president advised congress that he would address it on the Mexican situation in the afternoon at 3 o'clock.

LAI'D BEFORE CONGRESS.

When that hour arrived the hall of the house of representatives was completely filled and hundreds were unable to obtain admittance. The president entered at 3 o'clock and after a formal introduction by Speaker Clark read his message, being thrice interrupted by applause. He said:

"Gentlemen of the congress: It is my duty to call your attention to a situation which has arisen in our dealings with Gen. Victoriano Huerta at Mexico City, which calls for action, and to ask your advice and co-operation in acting upon it. On the 9th of April a paymaster of the U. S. S. Dolphin landed at the Ixturbide bridge landing at Tampico with a whaleboat and boat's crew to take off certain supplies needed by his ship, and while engaged in loading the boat was arrested by an officer and squad of men of the army of Gen. Huerta. Neither the paymaster nor any one of the boat's crew was armed. Two of the men were in the boat when the arrest took place, and were obliged to leave it and submit to be taken into custody, notwithstanding the fact that the boat carried, both at her bow and at her stern, the flag of the United States. The officer who made the arrest was proceeding up one of the streets of the town with his prisoners when met by an officer of higher authority, who ordered him to return to the land-

ing and await orders; and within an hour and a half from the time of the arrest orders were received from the commander of the Huertista forces at Tampico for the release of the paymaster and his men. The release was followed by apologies from the commander and later by an expression of regret by Gen. Huerta himself. Gen. Huerta urged that martial law obtained at the time at Tampico; that orders had been issued that no one should be allowed to land at the Iturbide bridge; and that our sailors had no right to land there. Our naval commanders at the port had not been notified of any such prohibition; and, even if they had been, the only justifiable cause open to the local authorities would have been to request the paymaster and his crew to withdraw and to lodge a protest with the commanding officer of the fleet. Admiral Mayo regarded the arrest as so serious an affront that he was not satisfied with the apologies offered, but demanded that the flag of the United States be saluted with special ceremony by the military commander of the port.

"The incident cannot be regarded as a trivial one, especially as two of the men arrested were taken from the boat itself—that is to say, from the territory of the United States. Had it stood by itself it might have been attributed to the ignorance or arrogance of a single officer. Unfortunately, it was not an isolated case. A series of incidents have recently occurred which cannot but create the impression that the representatives of Gen. Huerta were willing to go out of their way to show disregard for the dignity and rights of this government and felt perfectly safe in doing what they pleased, making free to show in many ways their irritation and contempt. A few days after the incident at Tampico an orderly from the U. S. S. *Minnesota* was arrested at Vera Cruz while ashore in uniform to obtain the ship's mail and was for a time thrown into jail. An official dispatch from this government to its embassy at Mexico City was withheld by the authorities of the telegraphic service until peremptorily demanded by our charge d'affaires in person. So far as I can learn, such wrongs and annoyances have been suffered to occur only against representatives of the United States. I have heard of no complaints from other governments of similar treatment. Subsequent explanations and formal apologies did not and could not alter the popular impression, which it is possible it had been the object of the Huertista authorities to create, that the government of the United States was being singled out, and might be singled out with impunity, for slights and affronts in retaliation for its refusal to recognize the pretensions of Gen. Huerta to be regarded as the constitutional provisional president of the republic of Mexico.

"The manifest danger of such a situation was that such offenses might grow from bad to worse until something happened of so gross and intolerable a sort as to lead directly and inevitably to armed conflict. It was necessary that the apologies of Gen. Huerta and his representatives should go much further; that they should be such as to attract the attention of the whole population to their significance and such as to impress upon Gen. Huerta himself the necessity of seeing to it that no further occasion for explanations and professed regrets should arise. I am of the opinion that it my duty to sustain Admiral Mayo in the whole of his demand and to insist that the flag of the United States should be saluted in such a way as to indicate a new spirit and attitude on the part of the Huertistas.

"Such a salute Gen. Huerta has refused, and I have come to ask your approval and support in the course I now purpose to pursue.

"This government can, I earnestly hope, in no circumstances be forced into war with the people of Mexico. Mexico is torn by civil strife. If we are to accept the tests of its own constitution, it has no government. Gen. Huerta has set his power up in the City of Mexico, such as it is, without right and by methods for which there can be no justification. Only part of the

country is under his control. If armed conflict should unhappily come as a result of his attitude of personal resentment toward this government, we should be fighting only Gen. Huerta and those who adhere to him and give him their support, and our object would be only to restore to the people of the distracted republic the opportunity to set up again their own laws and their own government.

"But I earnestly hope that war is not now in question. I believe that I speak for the American people when I say that we do not desire to control in any degree the affairs of our sister republic. Our feeling for the people of Mexico is one of deep and genuine friendship, and everything that we have so far done or are doing from doing has proceeded from our desire to help them, not to hinder or embarrass them. We would not wish even to exercise the good offices of friendship without their welcome and consent. The people of Mexico are entitled to settle their own domestic affairs in their own way, and we sincerely desire to respect their right. The present situation needs have none of the grave implications of interference if we deal with it promptly, firmly and wisely.

"No doubt I could do what is necessary in the circumstances to enforce respect for our government without recourse to the congress and yet not exceed my constitutional powers as president, but I do not wish to act in a matter possibly of so grave consequence except in close conference and co-operation with both the senate and house, and therefore come to ask your approval that I should use the armed forces of the United States in such ways and to such an extent as may be necessary to obtain from Gen. Huerta and his adherents the fullest recognition of the rights and dignity of the United States even amidst the distressing conditions now unhappily obtaining in Mexico.

"There can in what we do be no thought of aggression or of selfish arrangement. We seek to maintain the dignity and authority of the United States only because we wish always to keep our great influence unimpaired for the uses of liberty, both in the United States and wherever else it may be employed for the benefit of mankind."

USE OF ARMED FORCE JUSTIFIED.

Following the reading of the president's message the joint session closed and each house met separately to consider what action should be taken. The house of representatives after a debate of two hours passed the following joint resolution by a vote of 337 to 57:

"A joint resolution justifying the employment of the armed forces of the United States in enforcing certain demands against Victoriano Huerta:

"Resolved, by the senate and house of representatives in congress assembled, That the president of the United States is justified in the employment of the armed forces of the United States to enforce the demands upon Victoriano Huerta for unequivocal amends to the government of the United States for affronts and indignities committed against this government by Gen. Huerta and his representatives.

The negative vote was cast by twenty-nine republicans, five democrats, two progressives and one independent. The opponents of the resolution maintained that the Tampico incident did not justify war and objection was also made to the naming of Victoriano Huerta individually.

When the resolution was received in the senate the same evening it was referred to the committee on foreign relations, which, after debate, voted against the house resolution and in favor of the following substitute, which was reported at 12:10 a. m. Nov. 21:

"Joint resolution justifying the employment by the president of the armed forces of the United States:

"In view of the facts presented by the president of the United States in his address delivered to congress in joint session on the 20th day of April, 1914 in regard to certain affronts and indignities committed against the United States in Mexico, be it

"Resolved, by the senate and house of representatives of the United States in congress assembled, That the president is justified in the employment of the armed forces of the United States to enforce his demands for unequalled amends for the affronts and indignities committed against the United States.

"Be it further resolved, That the United States disclaims any hostility to the Mexican people or any purpose to make war upon them."

The name of Huerta was eliminated with the consent of President Wilson on condition that the resolution be so framed as to show that the action to be taken would be solely against the dictator. This did not satisfy a considerable number of the senators, who favored a substitute offered by Senator Lodge, the preamble of which was as follows:

"That the state of unrest, violence and anarchy which exists in Mexico, the numerous unchecked and unpunished murders of American citizens and the spoliation of their property in that country, the impossibility of securing protection or redress by diplomatic methods in the absence of lawful or effective authority, the inability of Mexico to discharge its international obligations, the unpunished insults and indignities inflicted upon the flag and the uniform of the United States by the armed forces in occupation of large parts of Mexican territory have become intolerable.

"That the self-respect and dignity of the United States and the duty to protect its citizens and its international rights require such course to be followed in Mexico by our government as to compel respect and observance of its rights."

Finding that an extended debate on the resolution was inevitable, the senate adjourned until noon of the same day, when the discussion was resumed. The opposition to the resolution as reported by the foreign relations committee was led by Senator Elihu Root of New York and Senator Henry Cabot Lodge of Massachusetts. Senator Root in the course of a strong speech favoring the Lodge substitute said:

"Lying behind the insult to the American flag are the lives of Americans destroyed, Americans reduced to poverty because of the destruction of their property. Lying behind it is a condition of anarchy in Mexico, a condition which makes it impossible to secure protection for American life and property. It is that which makes necessary the demand that public respect be paid the flag of the United States.

"There is our justification. It is a justification lying not in Victoriano Huerta or in his conduct alone, but in the universal conduct of affairs in Mexico, and the real object to be attained by the course which we are asked to approve is not the gratification of personal pride; it is not the satisfaction of a government or of an admiral; it is the desire of the United States to protect its citizens under these conditions.

"If we omit from this resolution that we are to pass here to-night the matters included in the substitute preamble we omit the real reasons behind the action. On the facts in the resolution as reported by the committee we would be everlastingly wrong. On the facts in the substitute we could rest, before the world, and before history, secure."

The committee resolution was vigorously defended by Senators Benjamin F. Shively of Indiana, John Sharp Williams of Mississippi, and others. Mr. Williams said: "I want this resolution to be so worded that the world shall know that it shall be war on Huerta until either Huerta salutes that flag or Huerta becomes an American prisoner or Huerta dies."

It was not until 3:21 a. m. of the 22d that a vote was reached on the committee resolution, which was passed by seventy-two yeas to thirteen nays. The senators, all republicans, voting against the resolution were: Brandegee, Bristow, Dillingham, Gallinger, La Follette, Lippitt, Lodge, Norris, Oliver, Root, Smoot, Weeks and Weeks. The resolution was engrossed, taken to the house and there adopted by a viva voce

vote almost without opposition. It was signed by the president the same day.

AMERICANS TAKE VERA CRUZ.

In the meantime decisive action had been taken at Vera Cruz by the fleet under command of Rear-Admiral Frank F. Fletcher. Acting on information that the Hamburg-American steamer *Xpiranza* was outside the Mexican seaport with a cargo of arms and ammunition for President Huerta, the authorities in Washington directed the admiral to take possession of the custom house and prevent the delivery of the war material.

Early in the forenoon of Tuesday, April 21, Admiral Fletcher made a demand through the American consul, W. W. Canada, on Gen. Gustavo Maas, commander of the Vera Cruz garrison, that he permit the occupation of the custom house by the forces of the United States. Gen. Maas refused to comply with the demand, whereupon the admiral ordered the landing of marines and sailors and the seizure of the custom house. Ten whaleboats loaded with 390 marines were sent ashore from the transport *Prairie* and a landing was effected at 11 a. m. A little later sixty-five marines and 150 bluejackets from the *Florida* and a detachment from the *Utah* were ashore. The landing party was under command of Capt. William R. Bush of the *Florida*, who ordered the men to deploy along the approaches to the central plaza, where the Mexican troops were concentrated. Other marines and sailors were stationed along the water front and before the American consulate. No opposition was made at first, but soon the Mexican troops began firing upon the marines, who replied at once. Several volleys were exchanged two blocks from the main plaza and in Montesinos street, where a squad of Mexicans were posted. Gen. Maas' troops withdrew outside the city and apparently attempted a flanking movement, which was prevented by shells fired from the heavy and light guns of the *Prairie*. This ended the fighting between the regular troops, but shooting continued from the housetops at the marines and sailors through the afternoon and night. The "snipers" were soldiers and some civilians. Much of the shooting was done from the top of the Diligencia hotel and the old Benito Juarez tower, which was partially destroyed by shells from the *Prairie*.

Within a short time after the landing the American forces were in full possession of the postoffice, government telegraph office, cable office, custom house and all that part of the city in the vicinity of these structures. After this had been accomplished the marines and sailors were ordered to remain strictly on the defensive until further orders.

In the preliminary fighting the casualties on the American side were four killed and twenty wounded. Those killed were: Daniel Haggerty, private marine, Cambridge, Mass.; Samuel Martin or Melsenberg, private marine, Chicago, Ill.; George Poinsett, seaman, Philadelphia, Pa.; John F. Schumacher, coxswain, Brooklyn, N. Y. The Mexican loss was 12 killed and 185 wounded.

Members of the American colony in Vera Cruz, together with many who arrived from Mexico City on the forenoon of April 21, were taken aboard the steamers *Esperanza* and *Mexico*, which had been chartered for that purpose. Others found refuge on the warships.

Rear-Admiral Charles J. Badger, commanding the Atlantic fleet, arrived at Vera Cruz in the afternoon with the battle ships *Louisiana*, *New Hampshire*, *Vermont*, *New Jersey*, *South Carolina* and *Michigan*, having been diverted from Tampico. It was arranged that Admiral Fletcher was to have charge of the land operations while Admiral Badger brought his flag into the harbor on the battle ship *Minnesota*.

CITY IS OCCUPIED.

On the morning of the 22d orders were given to occupy the whole city. Firing was begun at daybreak, the ships shelling the southern part of the town. Many additional marines and sailors were landed before sunrise and by 8 o'clock Admiral Fletcher had nearly 3,000 men under his

command, enabling him to make effective dispositions. Detachments of marines and sailors under Lieut.-Col. Wendell C. Neville, Lieutenant-Commander Allen Buchanan and Lieutenant-Commander Arthur B. Keating advanced toward the main plaza, clearing the streets with rifle and machine gun fire. The Prairie, Chester and San Francisco supported the movement with shell fire directed against the roofs and houses from which Mexicans were firing. The building of the naval college was captured only after a brisk engagement in which a number of casualties occurred. The walls were shattered by shells fired from the supporting warships. By 10 o'clock in the forenoon the entire city was in the hands of the Americans, though occasional shots continued to be fired. Squads of marines and bluejackets were sent through the streets with orders to enter all houses and search for concealed arms. This work was done thoroughly at the cost of a few casualties.

In the course of the fighting on this day (the 22d) nine Americans were killed, twenty-six seriously wounded and eighteen slightly wounded, making the total casualties for the two days of fighting thirteen killed and sixty-four wounded. One of the marines was killed before daylight through the mistake of a young sailor on sentry duty. No reliable information as to the casualties on the other side was obtainable. It was officially reported later that the American casualties at the occupation of Vera Cruz were:

Killed—Eleven sailors, four marines, one service unidentified. Total, sixteen.

Wounded—Two naval officers, fifty-one sailors, fourteen marines, three service unidentified. Total, seventy.

For the purpose of quieting the city Admiral Fletcher issued a proclamation directed to the civil officers and inhabitants asking them to co-operate in the preservation of order, calling their attention to the fact that while it had become necessary for the naval forces of the United States to assume control of the customs wharves of Vera Cruz it was not the intention to interfere with the civil administration any more than was necessary to enforce the law and such sanitary requirements as were needed to meet military requirements and enjoining upon the people to prevent firing by individuals from their houses upon the United States forces, contrary to the rules of war.

While the American congress was taking action to give President Wilson a free hand in dealing with the Mexican situation and while the naval forces of the United States took forcible possession of Vera Cruz, President Huerta in Mexico City took steps to resist the American "invasion" with all the forces at his command. He announced that foreigners in the capital were safe and would be given every protection. He reiterated his assertion that all the reparation for the Tampico flag incident consistent with the dignity of the Mexican republic had been made and that no salute would be fired as demanded.

Communication with Mexico City was practically cut off on the 20th, 21st and 22d, but early on the morning of the 23d the state department in Washington received a dispatch from Charge d'Affaires O'Shaughnessy, announcing that he had been given his passports by Gen. Huerta on Wednesday, the 22d, and that he had arranged to leave the capital. On the 24th Mr. O'Shaughnessy, with his family and the embassy staff, arrived in Vera Cruz, where they placed themselves to Washington. Señor Don A. Alzate R. de Terreros, the Mexican charge d'affaires in the American capital, was given his passports on the 23d. American interests in the Mexican capital were placed in charge of the Brazilian ambassador there.

Replying to a telegram from Secretary Bryan explaining that the action taken by congress did not amount to a declaration of war, but was merely a declaration justifying the president in using armed forces to compel redress for a specific indignity, Gen. Carranza sent a long dispatch from Chihuahua on the 22d to President Wilson declaring that the United States was not justified in occupying Mexican territory. He referred to the action of the naval authorities in

Vera Cruz as a violation of national sovereignty and requested the evacuation of the city. President Wilson replied that the United States was dealing with those actually in control of the government of Mexico and that the action was not directed against the Mexican people, the sovereignty and independence of which would be respected.

Re-enforced by battalions from the Minnesota, Michigan and South Carolina, the marines and sailors ashore at Vera Cruz proceeded to extend their lines on the 23d so as to include the entire city, the sand hills to the west of it and the railroad tracks for a distance of three miles beyond the town. Maj. Smedley D. Butler of the marine corps occupied some defensive works which had just been abandoned by the Mexicans. In the course of the skirmishing west of the city and in the work of clearing the houses of "snipers" four Americans were killed and fourteen wounded. The naval force on shore before the close of the day was increased to 6,000 men. This was considered large enough for the time being, but Rear-Admiral Badger cabled to Washington requesting that infantry and artillery be sent to Vera Cruz at the earliest possible moment.

In the evening a refugee train arrived from Mexico City carrying 150 Americans, 100 Germans, 300 Spaniards and Mexicans and fifty Englishmen. The party was in charge of Thomas B. Hohner, charge d'affaires of the British legation at the capital. There were fourteen cars in the train, which had been provided by the Mexican war office at the request of the British and German diplomatic officials. Three miles from Vera Cruz the refugees had to leave the cars and walk a mile where the track had been torn up to a train on the Vera Cruz end of the break. A detachment of British marines, unarmed, with the permission of the American officials, acted as escort to the passengers when they entered Vera Cruz.

INFANTRY SENT TO VERA CRUZ.

In compliance with the request of Rear-Admiral Badger orders were given by Secretary of War Garrison to Brig.-Gen. Frederick Funston to embark the 5th brigade of about 5,000 men, infantry, artillery and cavalry, on transports at Galveston and proceed to Vera Cruz. At the same time three regiments of infantry at the Presidio, San Francisco, and the 6th field artillery at Fort Riley, Kas., were ordered to the Mexican border. By orders from the war department the shipment of arms to the constitutionalist forces was stopped, although no embargo was declared by the state department.

Three thousand four hundred men of the 5th U. S. infantry, comprising the 4th, 7th, 19th and 28th regiments, under Brig.-Gen. Funston sailed on the transports Sumner, McClellan, Kilpatrick and Meade from Galveston on the afternoon of April 23.

MEDIATION OFFERED AND ACCEPTED.

Saturday, April 25, the plenipotentiaries in Washington of Argentina, Brazil and Chile, on behalf of their respective governments, formally offered their good offices to the American government for the settlement of the conflict with Mexico, and the offer was promptly accepted by President Wilson. The text of the note proffering mediation was as follows:

"Mr. Secretary of State: With the purpose of subserving the interest of peace and civilization in our continent and with the earnest desire to prevent any further bloodshed to the prejudice of the cordiality and union which have always surrounded the relations of the governments and the people of America, we the plenipotentiaries of Brazil, Argentina and Chile, duly authorized hereto, have the honor to tender to your excellency's government our good offices for the peaceful and friendly settlement of the conflict between the United States and Mexico.

"This offer puts in due form the suggestions which we have had occasion to offer heretofore on this subject to the secretary, to whom we

renew our highest and most distinguished consideration.

"DOMICIO DA GAMA, Brazil.

"EDUARDO S. NAON, Argentina.

"EDUARDO SUAREZ MUJICA, Chile."

President Wilson's reply, made through Secretary Bryan, to each of the diplomatic representatives was as follows:

"The government of the United States is deeply sensible of the friendliness, the good feeling and the generous concern for the peace and welfare of America manifested in the joint note just received from your excellencies offering the good offices of your governments to effect if possible a settlement of the present difficulty between the government of the United States and those who now claim to represent our sister republic of Mexico. Conscious of the purpose with which the proffer is made, this government does not feel at liberty to decline it. Its own chief interest is in the peace of America, the cordial intercourse of her republics and their people, and the happiness and prosperity which can spring only out of frank, mutual understanding and the friendship which is created by common purpose.

"The generous offer of your governments is therefore accepted. This government hopes most earnestly that you may find those who speak for the several elements of the Mexican people willing and ready to discuss terms of satisfactory and therefore permanent settlement. If you should find them willing, this government will be glad to take up with you for discussion in the frankest and most conciliatory spirit any proposals that may be authoritatively formulated, and will hope that they may prove feasible and prophetic of a new day of mutual co-operation and confidence in America.

"This government feels bound in candor to say that its diplomatic relations with Mexico being for the present severed, it is not possible for it to make sure of an uninterrupted opportunity to carry out the plan of intermediation which you propose. It is, of course, possible that some act of aggression on the part of those who control the military forces of Mexico might oblige the United States to act to the upsetting of the hopes of immediate peace, but this does not justify us in hesitating to accept your generous suggestion. We shall hope for the best results within a brief time, enough to relieve our anxiety lest most ill considered hostile demonstrations should interrupt negotiations and disappoint our hopes of peace."

Prior to the acceptance of the offer of mediation a conference took place in the white house between the president, the secretary of state and Senators Stone, Shively and Lodge of the senate foreign relations committee, and it was determined that the negotiations should not be limited to President Huerta, but should include such rebel leaders as Carranza, Zapata and Villa, and that as a condition of the cessation of warlike measures by the United States Gen. Huerta should be required to resign as president, that an orderly government should be set up, that peace should be re-established throughout Mexico and that reparation should be made for all insults to the American flag.

Immediately after the acceptance of the mediation offer by the American government the South American envoys cabled it through the Spanish ambassador to the Spanish legation in Mexico City for presentation to Gen. Huerta, and on the following day it was announced unofficially that he had also agreed to the proposal. Formal acceptance was cabled April 27. The South American press was emphatic in its approval of the peace move and its prompt acceptance by the United States. Preparations for war were not discontinued by the American naval and military authorities and it was announced that they would continue until it became apparent that the peace negotiations would be successful.

In response to a letter from the mediators Gen. Carranza signified his willingness to listen to peace proposals, but omitted to say anything about the "pacification of Mexico." This was considered significant in view of the fact that the next step in the programme of mediation was

to ask the United States, Gen. Huerta and the chief of the constitutionalists to cease all hostilities pending the outcome of the negotiations. President Wilson accepted the proposition with the understanding that there would be no aggressive act on the part of anyone in control of the military forces in Mexico that would compel the United States to act. President Huerta announced April 30 that he was willing to suspend hostilities, but Gen. Carranza sent a message to the mediators May 3 that he could not agree to an armistice on the ground that it would accrue only to the benefit of Gen. Huerta. This response caused the mediators to withdraw their invitation to the constitutionalist leader to send a representative to the peace conference.

The peace conference opened at Niagara Falls, Canada, May 20. The representatives of the United States were Joseph R. Lamar of the Supreme court, Washington, D. C., and Frederick W. Lehmann of St. Louis, Mo., former solicitor-general of the United States. H. Percival Dodge was the secretary. The Huerta government was represented by Augustin Rodriguez, Louis Elguero and Senor Emilio Rabasa. The rules of procedure adopted provided that the deliberations should be secret, that the Brazilian ambassador should direct the proceedings and that the minutes should be drafted in English, Spanish and Portuguese.

The conference did not result in a solution of the Mexican problem, at least so far as concerned the internal troubles of the republic. It was announced June 17, after the mediators had been in session nearly a month, that the American and Mexican delegates could not agree in the matter of a provisional government for Mexico. According to an open statement made by Senor Rabasa the Mexican delegation agreed to the designation of a neutral as provisional president, while the American delegation insisted that he must be a constitutionalist, a condition which the Mexicans could not accept. The American delegates issued a statement June 18 in which they said that the effort should be to find not a neutral for president, but one whose attitude on the controlling issues would make him acceptable to the constitutionalists. The delegates also differed as to the method of electing a president.

PROTOCOL IS SIGNED.

June 24 a protocol was signed by all the delegates and the mediators. The text of the document follows:

"Article 1. The provisional government referred to in the protocol No. 3 shall be constituted by agreement of the delegates representing the parties between which the internal argument in Mexico is taking place."

"Art. 2, section A. Upon the constitution of the provisional government in the City of Mexico the government of the United States of America will recognize it immediately and thereupon diplomatic relations between the two countries will be restored.

"Art. 2, section B. The government of the United States of America will not in any form whatsoever claim a war indemnity or other international satisfaction."

"Art. 2, section C. The provisional government will proclaim an absolute amnesty to all foreigners for any and all political offenses committed during the period of civil war in Mexico.

"Art. 2, section D. The provisional government will negotiate for the constitution of internal commissions for the settlement of the claims of foreigners of account of damages sustained during the period of civil war as a consequence of military acts or the acts of national authorities.

"Art. 3. The three mediating governments agree on their part to recognize the provisional government organized as provided by section 1 of this protocol."

The adoption of the protocol was the only concrete result of the peace conference, which ended July 1. The mediators maintained, however, that the international side of the controversy had been settled by their efforts and that it had been established as a principle of American policy that national problems in the western hemisphere should be settled after a fair examination

and without foreign interference. This, it was declared, was all that the mediators had set out to do.

While the proposal for a peace conference was being considered and while the mediators were in session many things were happening in Mexico. State department officials received a long report April 26 from Consul-General Philip C. Hanna, at Monterey. His telegram, dated April 24, told of the tearing down of the American flag at the consulate April 21 by a federal military officer, Capt. Alvarez del Castillo, and a mob. They tore down all the American flags in the city, trampled on them and tore them to pieces. A police guard was placed before the consulate and its occupants were made prisoners. The next day (April 22) the consulate was searched by a police lieutenant, the consul-general arrested and taken through the streets to the state government palace, where he was locked up and kept a close prisoner until the federals evacuated Monterey on the evening of April 23. The following morning Mr. Hanna was released by order of Gen. Pablo Gonzales, Gen. Antonio Villalera and Gen. Castro, leaders of the constitutionalist forces, who had captured the city after a five days' attack.

Gen. Villa left Juarez April 27 to consult Gen. Carranza at Chihuahua. There were rumors of differences between the two, especially as to what attitude the constitutionalists should assume toward the Americans and the mediation proposal. It was reported on the 28th that Gen. Carranza was disposed to reject the mediation plan if it involved any compromise or truce that would interfere with the purpose of the constitutionalists to obtain power in the City of Mexico.

Gen. Funston and the 5th brigade arrived at Vera Cruz on the morning of the 28th from Galveston. The general went ashore and consulted with Rear-Admiral Fletcher and then, in his company, visited Rear-Admiral Badger on the flagship Arkansas. Arrangements were made for the substitution of infantry for the bluejackets doing duty ashore, but no soldiers were landed until the 29th. It was decided, however, to appoint at once a number of civilians to administer the government of the city under martial law. Those selected were: Civil governor, Robert J. Kerr of Chicago, Ill.; treasurer, Charles E. Stewart of Indianapolis, Ind.; administrator of justice, William F. Buckle of Austin, Tex. This administration came to an end May 2, not having been approved by the authorities in Washington. Commander H. O. Stickney of the Prairie was named inspector of customs. Orders were also issued from Washington detaching the marines at Vera Cruz from the navy and placing them under Gen. Funston's command.

There was fierce fighting between the rebels and federals around Tampico on the 29th. The former fired on the Cuban steamer Antilla, which brought a consignment of arms and supplies for the federal troops.

GEN. FUNSTON IN CONTROL.

On the last day of April Vera Cruz was placed under the military control of Gen. Funston and the United States army. The ceremony of transfer was effected on the pier of the health department wharf. Admiral Fletcher and his staff and Gen. Funston and his staff, all attired in service uniforms, and attended by a battalion of infantrymen and a battalion of marines, took positions and stood in attention while a column of 3,600 sailors marched past to the wharf, where they entered boats to proceed to their respective ships. They bore many marks of hard service in the streets and trenches. When they broke ranks they were cheered loudly by the marines and soldiers and by thousands of spectators. Admiral Fletcher and Gen. Funston exchanged salutes, after which the former went aboard his ship, the Florida, and the general to the headquarters formerly occupied by Gen. Maas, the Mexican commander.

The first man in the regular army to meet death after the occupation of Vera Cruz was Private Samuel Parks of the 28th Infantry. On the afternoon of May 7, while, presumably, dazed by the heat, he wandered outside the American lines

and two fine horses he had with him were taken by a Mexican patrol. Parks was taken to the commandant's house at Teters and locked up and the horses, which belonged to Lieut.-Col. Elmore F. Taggart, were given to Gen. Maas for his use. The following morning at daylight, by order of the post commander, Parks was shot by a file of soldiers and his body burned.

May 12 public funeral services for the sailors and marines who fell at the taking of Vera Cruz were held in the navy yard in Brooklyn. Seventeen five-gaped coffins were carried on caissons from the Battery and through lower New York and over the Manhattan bridge to the navy yard. The procession was watched by thousands of silent spectators with bared heads as it wended its way through Broadway and other thoroughfares. President Wilson took part in the exercises of the day, riding in the procession and making an address at the navy yard, in which he extolled the services of the dead to their country. Secretary of the Navy Daniels read the hero roll, prayers were said and the ceremony ended with the firing of three volleys and the sounding of "taps." Later the coffins were sent to the various cities from which the dead came, where individual memorial exercises were held May 13 and 14.

The rebel forces besieging Tampico began a heavy bombardment May 12; the losses on both sides were reported heavy. The fighting continued on the 13th, when the federals began to evacuate the city along the railroad in the direction of San Luis Potosi. The federal gunboats left the river and the rebels seized such Mexican craft as they could lay their hands on. Early on the morning of the 14th Tampico was completely occupied by the constitutionalist forces under Gen. Pablo Gonzales. Most of the foreigners in the city had taken refuge on war and other vessels in the harbor. Order was restored and foreigners were told that they might return in safety. On the following day the rebels occupied Tuxpam unopposed.

Efforts were made May 16 to induce Rear-Admiral Mayo to join with the British, German, French and Dutch naval commands at Tampico to land troops to establish an order in the fields. On instructions from Washington he declined to join in the movement, but marines were nevertheless landed from a Dutch cruiser and sent in to guard Dutch interests in the oil fields. Gen. Gonzales, the constitutionalist commander, demanded that the Dutch withdraw, but they declined to do so. May 20 the state department announced that Tampico would be an open port and that property in the oil fields would be guarded by the United States, Great Britain and the Netherlands.

News was received May 20 that Gen. Villa, with 4,000 constitutionalists, had defeated 4,500 federals at Paredon, taking 900 prisoners, nine pieces of artillery and 1,000,000 rounds of ammunition. Miguel Alvarez and Ignacio Munoz, federal officers, were killed, and Gen. Osorno and other federal officials were executed. At Zertuche the rebels captured a federal general and his staff, numbering thirty-two, who were executed. The troops that were defeated evacuated Miniclova May 15 and were on their way to join the federals at Saltillo when they fell into a trap laid for them by Gen. Villa.

Landing of war material for Gen. Huerta by the German steamers Ypiranga and Bavaria in the latter part of May led to some trouble with the American government on account of the failure of the officers to observe the Mexican regulations concerning manifests and invoices. Capt. Herman O. Stickney, acting port collector at Vera Cruz, imposed a fine of 118,685 pesos (\$59,342) on the Bavaria for having discharged a large portion of her cargo consigned to Vera Cruz at Puerto Mexico and correcting her manifest after arriving at Vera Cruz. The Ypiranga was fined \$84,930 pesos (\$47,465) for failure to correct invoices accordingly and discharging her cargo at a port (Puerto Mexico) other than that to which consigned. The vessels were permitted to clear after giving bonds.

Throughout the month of June the constitutionalists continued their successful campaign against

the federals, capturing Colima on the 3d and Zacatecas on the 23d. This was accomplished in spite of the fact that the differences between Gen. Carranza and Gen. Villa, which had developed early in the year, became more accentuated. It was reported on several occasions that they were on the point of fighting each other, but while undoubtedly jealous of each other they continued to make war on their common enemy.

GEN. HUERTA RESIGNS.

July 5 Gen. Huerta and Gen. Blanquet had themselves "elected" president and vice-president, respectively, of the Mexican republic. The voting, of course, was confined to that part of the country still under the control of the federals. The Huerta regime, however, was nearing its end. With finances depleted, with the United States uncompromisingly hostile, with Vera Cruz, the chief port and source of customs revenue, in the hands of American troops, with the rebels advancing close to the capital on all sides and with dissensions in the ranks of his own followers, Gen. Huerta finally had to yield to the inevitable. He resigned the presidency July 15 and, with his chief aid, Gen. Blanquet, went to Puerto Mexico and thence to the German cruiser Dresden to Jamaica. Thence they went to England and finally to Spain. In his farewell address to the chamber of deputies in the City of Mexico Gen. Huerta said that for seventeen months he had been trying to bring peace to Mexico, but that his efforts had been thwarted by the protection given the rebels by a great power. He referred to the peace conference in Niagara Falls which had adjusted "the petty Tampico incident," but had not resulted in the withdrawal of the Americans from Vera Cruz or of their support from the rebels. Some had said, he continued, that he would, come what may, seek his personal interest, and to refute that allegation with a fact he formally resigned the presidency of the republic.

CARRANZA ENTERS CITY OF MEXICO.

At the same session of the chamber of deputies Francisco Carbajal, minister of foreign relations, was called upon to assume the presidency. Carbajal accepted the office and thereafter was the spokesman for the federals. The departure of Huerta made no difference to the constitutionalists, who continued their operations in the field. Carranza demanded the unconditional surrender of Carbajal, but the latter decided to continue the struggle. Aug. 10 the constitutionalists occupied Mazatlan and won other successes. On the following day the federal troops evacuated the City of Mexico, and on Aug. 13 a peace pact between the Carranzista forces and the federal government was signed. Gen. Carranza was named provisional president of Mexico in an agreement signed Aug. 14 by Gen. Obregon and Gov. Iturbide. Carbajal retired from the presidency and Aug. 20 Gen. Carranza entered the City of Mexico in triumph.

The troubles of the republic were not yet ended. In the north Gen. Villa, who had come out openly in opposition to Carranza, was organizing his followers for a new rebellion. Then a convention of constitutionalists was called to settle upon a permanent government for the republic. This convention, which opened Oct. 10 in Aguascalientes, was composed of delegates supposed to represent the various factions within the constitutional party. It at once proceeded to vote itself supreme power and to demand the elimination of both Carranza and Villa. Neither would yield, and Nov. 1 Eulalio Gutierrez was chosen by the convention to act as president of the republic for twenty days. Carranza refused to accept Gutierrez his successor, and so for the time being the country had two provisional presidents.

As early as Sept. 15 President Wilson had ordered the evacuation of Vera Cruz, but the lack of guarantees for the safety of the persons for whose safety the United States had made itself responsible prevented the order from being carried out. These persons included a number of priests and nuns who subsequently took refuge in the United States. The various factions also gave the required assurances, and Nov. 13 it was

announced that the troops would evacuate Vera Cruz Nov. 23.

This plan was carried out and Gen. Funston and his troops sailed for Galveston, at which port they arrived Nov. 26. They were succeeded in Vera Cruz by constitutionalist troops. Nov. 24 Gen. Blanco evacuated the City of Mexico.

CHRONOLOGY OF REVOLUTIONS.

Following is a chronology of the main events in the political history of Mexico since the overthrow of President Porfirio Diaz:

June 28, 1910—Porfirio Diaz elected president for eighth successive term.

Nov. 18, 1910—Revolution started by anti-re-electionists.

Nov. 23, 1910—Francisco I. Madero proclaims himself provisional president of Mexico.

May 25, 1911—Porfirio Diaz resigns presidency of Mexico.

May 31, 1911—Gen. Diaz and family sail from Vera Cruz for Europe.

Oct. 1, 1911—Francisco I. Madero elected president of Mexico.

Oct. 16, 1912—Gen. Felix Diaz begins new revolution.

Oct. 27, 1912—Gen. Diaz captured by federal troops.

Feb. 9, 1913—Military uprising in City of Mexico; Gen. Diaz liberated; rebels seize arsenal.

Feb. 11-19, 1913—Bombardment in heart of City of Mexico, rebels firing from arsenal and federals from national palace.

Feb. 19, 1913—President Madero's own troops revolt; he is arrested and Gen. Victoriano Huerta is proclaimed provisional president; Gustavo Madero executed.

Feb. 21, 1913—New revolution started by Venustiano Carranza, governor of Coahuila.

Feb. 23-24, 1913—President Francisco I. Madero and Vice-President Jose Pino Suarez shot to death about midnight of Feb. 23-24.

May 8, 1913—Rebels under Gen. Carranza in control of larger part of northern Mexico.

July 16, 1913—Ambassador Henry Lane Wilson summoned to Washington.

Aug. 4, 1913—Resignation of Ambassador Wilson accepted to take effect Oct. 14; John Lind of Minnesota sent to Mexico as personal representative of President Wilson.

Aug. 19, 1913—President Huerta rejects all proposals made by Mr. Lind.

Oct. 26, 1913—Presidential and congressional elections take place; Gen. Huerta elected president and Gen. Blanquet vice-president.

Oct. 27-28, 1913—Gen. Felix Diaz flees to Havana.

Nov. 2, 1913—Gen. Huerta notified that he must resign the presidency of Mexico.

Nov. 15, 1913—New Mexican congress begins its sessions.

Dec. 31, 1913—Year closes with rebels generally victorious in northern Mexico and Gen. Huerta still in presidential office in the City of Mexico.

1914.

Jan. 1—Mexican federal army at Ojinaga defeated by rebels.

Jan. 2—President Wilson and John Lind have conference on scout cruiser Chester near Pass Christian, Miss.

Jan. 10—Rebels under Gen. Francisco Villa enter Ojinaga; federal generals, soldiers and camp followers to the number of several thousand cross to the American side of the Rio Grande near Presidio, Tex., and surrender to United States troops.

Jan. 27—Banquet given to officers of Japanese cruiser at national palace in the City of Mexico.

Feb. 3—President Wilson issues a proclamation ending the embargo on the exportation of arms and ammunition to Mexico.

Feb. 4—Tunnels burned by bandit leader Maximo Castillo; seventeen Americans and forty-one Mexicans killed by wreck of passenger train in obstructed tunnel.

- Feb. 14—Clemente Vergara lured into Mexico and killed by federal soldiers at Hidalgo.
- Feb. 17—Maximo Castillo and six of his followers captured by American troops near Hachita, N. M.
- Feb. 17—William S. Benton, ranchman, an English subject, killed by revolutionists at or near Juarez, Mexico.
- Feb. 20—News of killing of Benton causes excitement on becoming known in El Paso and Washington; Gen. Villa reported to claim that Benton tried to kill him and was shot after a court-martial hearing.
- Feb. 21—Secretary of State William J. Bryan orders a full inquiry into Benton killing.
- Feb. 28—Gen. Carranza says the United States has no right to inquire into death of Benton, a British subject; declares that investigation will be made by revolutionists.
- March 2—Carranza appoints commission to investigate Benton killing; Great Britain refuses to take any action.
- March 8—Body of Clemente Vergara exhumed at night from Hidalgo cemetery and brought across Rio Grande to Texas.
- March 9—Senator Albert B. Fall of New Mexico makes a speech in the United States senate giving details of between seventy and eighty outrages on Americans in Mexico; severely criticizes state department for its lack of action.
- March 10—Two more regiments sent to patrol Texas-Mexico border to prevent raids.
- March 14—Mexican raiders burn store and post-office at Tecate, Cal., and murder Frank Johnston, the postmaster.
- March 17—Gen. Villa, with rebel force of 12,000 men, marches on Torreon.
- March 18—Mutineers to the number of 149 shot down by federals at Joluitla.
- March 23—Bloody battle at Gomez Palacio, near Torreon; victory for rebels.
- April 2—Gen. Villa's forces take Torreon after eleven days of fighting; losses heavy on both sides.
- April 4—Gen. Villa orders 600 Spaniards in Torreon to be deported to the United States.
- April 6—John Lind, President Wilson's representative, leaves Vera Cruz for Washington.
- April 9—Paymaster and seven sailors of the U. S. Gunboat Dolphin arrested at boat landing in Tampico by Mexican soldiers; after their release Rear-Admiral Mayo demands an apology, punishment of the officer responsible and a public salute of twenty-one guns to the United States flag within twenty-four hours.
- April 10—Apology for arrest of sailors at Tampico made and officer responsible is punished, but salute to flag is not fired.
- April 11—Charge O'Shaughnessy in Mexico City directed by President Wilson to inform President Huerta that the salute to the flag must be fired as demanded by Rear-Admiral Mayo.
- April 12—President Huerta replies that the apology for the arrest and the arrest of the officer concerned are sufficient and that no salute will be fired.
- April 13—President Wilson insists upon the salute; Lind arrives in Washington; town of San Pedras de Colonias captured by rebels after six days of fighting; losses heavy.
- April 14—Atlantic and Pacific fleets ordered to Mexican waters.
- April 15—Warships start for Mexican ports; Washington administration issues official statement of situation.
- April 16—President Huerta promises Charge O'Shaughnessy that United States flag will be saluted at Tampico on condition that American fleet return the salute in acknowledgment; Washington officials agree to condition as conforming to international usage.

LOSS OF THE LINER EMPRESS OF IRELAND.

Date—May 29, 1914.

Place—St. Lawrence river, near Father Point, Que.

Persons aboard—1,479.

Lives lost—1,027.

Persons saved—452.

Cause of disaster—Collision with steamer.

The steamship *Empress of Ireland*, one of the finest vessels in the Atlantic service of the Canadian Pacific Railway company, was sunk in the St. Lawrence river near Father Point, Que., early on the morning of May 29, 1914, in a collision with the Norwegian collier *Storstad*. Of the 1,479 persons on board the liner 1,027 were lost. The *Empress of Ireland* left Quebec for Liverpool at 4:20 p. m., Thursday, May 28, with Lieut. H. G. Kendall of the royal navy reserve and well known as a sea captain in command. The first stop was made at Rimouski, Que., about 180 miles northeast of Quebec, where mail was taken aboard. At this point the river widens and is generally known as the Gulf of St. Lawrence. The channel for ocean going craft is about ten miles from the southern and twenty miles from the northern shore. The river was somewhat obscured by smoke from forest fires and Capt. Kendall proceeded carefully at reduced speed.

After leaving Rimouski and when about opposite Father Point the men on the bridge saw the lights of a steamer coming up the river and about two miles away. Signals were exchanged and then a blanket of fog settled down on the

of the passengers, nearly all of whom were asleep when the two vessels came together. A considerable number of them, it is believed, were killed in their berths in that part of the ship penetrated by the bow of the *Storstad*. The wireless operators on the *Empress of Ireland* sent out calls for assistance immediately after the crash. The government steamers *Eureka* and *Lady Evelyn* at Rimouski hurried to the scene and did what they could to pick up and care for the survivors in the lifeboats and on the wreckage. They were too late to do anything more, as the *Empress of Ireland* sank within seventeen minutes after it was struck. Capt. Kendall jumped from the bridge and was injured by striking a floating hatch, but he was picked up by a lifeboat which was near at hand and was saved. The officers and crew of the *Storstad*, though their own vessel was badly damaged, did all they could to save the people struggling in the water.

The fate of the passengers and crew of the *Empress of Ireland* is told by the following figures:

First class passengers—Total sailing, 92; rescued, 36; dead, 56.

Second class passengers—Total sailing, 256; rescued, 47; dead, 209.

Third class passengers—Total sailing, 718; rescued, 136; dead, 582.

Crew—Total sailing, 413; rescued, 233; dead, 180.

Among those who lost their lives were Laurence Irving, son of the late Sir Henry Irving.

THE EMPRESS OF IRELAND.

water, shutting out everything from view. The tide was running in strongly. At 1:45 a. m. the vessel whose lights had been seen suddenly appeared close at hand. It was the Norwegian collier *Storstad*, commanded by Capt. Thomas Anderson, on its way to Montreal. As soon as Capt. Kendall saw the *Storstad* he shouted to the man on its bridge to have his vessel go full speed astern and gave orders to have the *Empress of Ireland* go full speed ahead with the helm hard a port with the object of avoiding a collision. It was too late and in a moment the *Storstad* crashed into the port side of the liner almost amidships, tearing a big hole through which the water poured in torrents. Capt. Kendall shouted to the collier to keep full speed ahead so as to stay in the hole, but this was found to be impossible and the vessels drifted apart.

It was at once seen that the *Empress of Ireland* was sinking and desperate efforts were made to save as many lives as possible. The ship listed heavily toward the side which had been rammed and great difficulty was found in launching the lifeboats. Nine of these succeeded in reaching the water and they carried practically all who were saved except a few who were picked up clinging to bits of wreckage. The lights on the liner went out at the time of the collision and the darkness added to the confusion

and himself a well known actor: his wife Mabel Hackney Irving and Sir Henry Seton Carr, a famous hunter of big game and prominent at the English bar. Commissioner Rees and many other officers and members of the salvation army in Canada, who were on their way to London to take part in the world's congress of the army, were drowned. The saving of such a large proportion of the crew was explained by the fact that owing to the difficulties of navigation in the St. Lawrence river many of them were on duty at the time of the collision.

With its bows crumpled in and twisted around at an acute angle to port, the *Storstad* arrived in Montreal May 31 and was at once seized on a claim for \$2,000,000 damages made by the Canadian Pacific Railway company.

The disaster aroused much controversy as to where the responsibility should be placed. Contradictory statements were made by the captains of both vessels as to what was done between the time when the vessels came within sight of each other and the collision. June 1 a royal commission to investigate the wreck was appointed with Lord Mersey as its chairman. The inquiry was begun in Quebec June 16 and came to an end July 11. The commission held that the disaster was due to the *Storstad's* change of course ordered by Alfred Tuftenes, the third officer, who was in charge of the collier at the time.

"We can" said the finding, "come to no other conclusion than that Mr. Tuftenes was wrong and negligent in altering his course in the fog, as he undoubtedly did, and that he was wrong and negligent in keeping the navigation of the vessel in his own hands and failing to call the captain when he saw the fog coming on."

LOSS OF THE LINER TITANIC.

BOARD OF MEDIATION AND CONCILIATION.

Commissioner of Mediation—William L. Chambers.

Assistant Commissioner of Mediation—G. W. W. Hangar.

Board of Mediation and Conciliation—Martin A. Knapp, chairman; William L. Chambers, G. W. W. Hangar, secretary.

Office—Southern building, Washington, D. C.

The board of mediation and conciliation, created by act of congress approved July 15, 1913, was established to settle by mediation, conciliation and arbitration controversies concerning wages, hours of labor or conditions of employ-

ment that may arise between common carriers engaged in interstate transportation and their employees engaged in train operation or train service. Whenever such a controversy arises, interrupting or threatening to interrupt the operation of trains to the serious detriment of the public interest, upon the request of either party the board of mediation is required to use its best efforts by mediation and conciliation to bring about an agreement. If such efforts are unsuccessful, the board endeavors to induce the parties to submit their controversy to arbitration and, if successful, makes the necessary arrangements for such arbitration. The board is an independent office.

HOME RULE FOR IRELAND.

CHRONOLOGY.

- 1886—Gladstone's first Irish home rule bill defeated in house of commons June 7 by vote of 343 to 313.
- 1892—Gladstone's second home rule bill passed by house of commons Sept. 1 by vote of 301 to 267; defeated in house of lords.
- 1903—Irish nationalists and liberals make alliance, the former agreeing to support government budget and other measures on understanding that home rule bill is to be passed.
- 1911—Parliament act passed limiting veto power of house of lords.
- 1912—Home rule bill introduced April 11; passed first reading April 16; passed second reading May 9.
- 1913—Home rule bill passed third reading Jan. 16 by vote of 367 to 250; rejected by house of lords Jan. 30; bill reintroduced and passed by commons July 8, 352 to 243; again rejected by lords July 15.
- 1914—Home rule bill introduced for third time March 6; passed by house of commons May 25 by vote of 351 to 274; signed by King George and placed on statute book Sept. 18.

The second parliament of King George V. was elected in December, 1910, and was made up of 272 liberals, 84 nationalists, 42 labor members and 272 conservatives and unionists. This gave the Irish party the balance of power and made it possible by means of coalition and the so-called parliament act of Aug. 10, 1911, to secure the enactment of a law giving a large measure of home rule to Ireland. The parliament act was framed primarily to enable the government to pass a budget which the conservatives had rejected on the ground that it was "socialistic and confiscatory," but the law as adopted permitted the party in power to pass other measures, such as Welsh church disestablishment and Irish home rule, even if vetoed by the house of lords. All that was required was that a bill should be passed at three successive sessions by the house of commons and be signed by the king to become a law. The Irish nationalists, under the leadership of John Edward Redmond, agreed to help pass the budget and other administration measures in return for government help in passing a home rule bill. The coalition was successful and the government, assisted by the nationalists and labor members, passed its budgets, the Welsh disestablishment measure and the Irish home rule bill. The coalition majority was somewhat reduced by defections and defeats in by-elections, but it remained sufficiently large to carry out the programme as originally made.

H. H. Asquith, premier and leader of the house of commons, introduced the home rule bill, officially entitled "The government of Ireland bill," April 11, 1912. It passed its first reading April 16 and its second reading May 9. It passed its third reading Jan. 16, 1913, by a vote of 367 to 250 and was rejected in the house of lords Jan. 30, 326 to 69. Parliament was prorogued March 7 and met again three days later. The home rule bill was reintroduced and passed by the commons July 8 by a vote of 352 to 253. The measure was again rejected by the house of lords July 15 by a vote of 302 to 64. The session ended Aug. 16. The fourth session of parliament began Feb. 10, 1914, and March 6 the Irish home rule bill was introduced for the third time. April 6 an amendment for the rejection of the bill was defeated, 356 to 276, and the measure went to its second reading. May 26 it was passed by the house of commons for the third and last time and was sent to the house of lords, requiring, however, only the king's signature to become a law.

The most serious opposition to the granting of self-government to Ireland came from the unionists of Ulster, who, for commercial and religious reasons, did not wish to come under the jurisdiction of a parliament in Dublin. English conservatives and unionists saw in this a chance to defeat Irish home rule and helped to fan the

flame of discontent in the north of Ireland. Led by Sir Edward Carson, the unionists of Ulster made preparations in 1913 for armed resistance. Delegates met in Belfast Sept. 24 and formed what they called a provisional government to take over the administration of Ulster in case the home rule bill became a law. Drilling of volunteers was actively engaged in by large numbers of men in Belfast and vicinity.

So tense was the situation that the government felt the same step should be taken to placate the opponents of home rule and March 9, 1914, Premier Asquith announced a plan for conciliation. It was that a poll should be taken of the parliamentary electors of each county in Ulster to decide whether it should be excised from the operation of the law for a period of six years from the first meeting of the new Irish parliament. The proposition was not acceptable to the Ulster unionists, who continued to prepare for "war" with increased energy. "Gun running" on a large scale was reported and the drilling of volunteers was carried on day and night. The newspapers in London used the caption "War in Ulster" over their dispatches from Belfast.

March 20 the government began certain military movements in Ireland and at once the cry was raised that Ulster was to be coerced. Officers of regiments in the vicinity of Belfast began to resign their commissions rather than face the prospect of being called upon to serve against the Ulster men. An army council was held in London and a memorandum was given to Brig.-Gen. Hubert Gough, commander of the 3d cavalry brigade, in which most of the resignations had been offered to take back to Ireland. In this memorandum, which was signed by Col. J. E. B. Seely, secretary of war; Field Marshal Sir John French, chief of the imperial staff of the British army, and others, it was said:

"The government must retain its right to use all the forces of the crown in Ireland or elsewhere to maintain order and support the civil powers in the ordinary execution of their duty, but has no intention whatever of taking advantage of this right in order to crush political opposition to the policy or the principles of the home rule bill."

This pledge to the disaffected officers of the army was repudiated by the government as having been given without its knowledge or consent. This was acknowledged to be true by Col. Seely, who offered his resignation. Field Marshal French and Sir John Spencer Ewart, adjutant-general, also resigned. Their resignations were accepted March 30, when Premier Asquith announced that he himself would take the post of secretary of war and for that purpose would resign from the house and seek re-election from his old constituency. This he did and was returned without opposition. His act strengthened the administration and correspondingly weakened the opposition, which was placed on the defensive by the action of the army officers. The passage of the home rule bill was not followed by the violent outbreak in Ulster that had been predicted. The unionists there contented themselves with declaring that home rule would never be applied to Ulster. The Irish nationalists began recruiting a volunteer army to oppose the Ulsterites, but the outbreak of the great European war in August brought the home rule controversy in Ireland to a close, both factions agreeing to support the government in the crisis. Sept. 15 the house of commons passed a bill suspending the operation of the home rule and Welsh disestablishment bills until after the close of the war. King George signed the home rule bill Sept. 18 and it was placed on the statute book.

SYNOPSIS OF ACT.

The home rule act provides for an Irish senate of forty members and an Irish house of commons of 164 members. Ireland will send forty-two members to the British house of commons in London. The senators will be chosen from the four provinces and according to the principle of proportional representation. In a constituency which returns three or more members to the

house of commons the election shall also be held on the proportional principle. The term of both senators and members of the commons is five years. Appropriation and tax bills shall originate only in the house of commons and the senate may not reject any such bill or amend it so as to increase the burden on the people. If the two houses fail to agree on any bill the lord lieutenant may convene a joint sitting. The act exempts specifically the following matters from the jurisdiction of the Irish parliament:

The crown or its succession.
The making of peace or war.
The navy, the army or the defense of the realm.
Treaties or foreign relations.
Dignities or titles.
Treason, allegiance or naturalization.
Trade with any place out of Ireland, except as it affects the powers of taxation of parliament.
Postal services and rates.
Coinage, legal tender, weights and measures.
Trade marks, copyrights and patents.

Customs duties unless already levied by imperial act.

The rate of the income tax may not be varied.
Establishment, prohibition or free exercise of privilege of any religion.

If a resolution is passed by both houses of the Irish parliament the following reserved services may be transferred to Ireland after six years:
All public services connected with the old pensions act.

Services connected with the national insurance act.

Services connected with the labor exchanges act.
Services connected with postoffice savings banks, trustee savings banks and friendly societies.

The direction of the royal Irish constabulary is arbitrarily transferred to the Irish parliament after six years.

The Irish parliament shall meet at least once a year, when called by the lord lieutenant. The latter shall give or withhold the assent of his majesty to bills passed by parliament.

DEATH OF POPE PIUS X.

Pope Pius X. died in the Vatican, Rome, at 1:20 o'clock on the morning of Thursday, Aug. 20, 1914. He was born at Riese, in the province of Treviso, June 2, 1835, and was thus 79 years of age when he passed away. Elected supreme head of the Roman catholic church Aug. 4, 1903, he occupied the papal chair eleven years and sixteen days. Giuseppe Sarto was ordained priest Sept. 18, 1858; consecrated bishop of Mantua Nov. 10, 1884; created and proclaimed cardinal and patriarch of Venice June 15, 1893; elected pope Aug. 4 and crowned Aug. 9, 1903. His title in full was: "Bishop of Rome and vicar of Jesus Christ; successor of St. Peter, prince of the apostles; supreme pontiff of the universal church; patriarch of the west; primate of Italy; archbishop and metropolitan of the Roman province and sovereign of the temporal dominions of the holy Roman church." Pius was not of robust physique and in the course of the last years of his life passed through a number of serious illnesses. He was a sufferer from bronchial catarrh and gout and had much difficulty in breathing. It was recognized on Tuesday, Aug. 18, that he was seriously ill, but it was not until the following day that hope of his recovery was given up. The bronchitis was diffused to the lower lobe of the left lung and symptoms of heart weakness developed. Stimulants were injected and oxygen was administered, but he grew steadily weaker until the end came. His death was unquestionably hastened by his intense grief over the great European war which had broken out. Some hours before he breathed his last he said: "Now I begin to think as the end is approaching that the Almighty in His inexhaustible goodness wishes to spare me the horrors Europe is undergoing." His last official act was to issue the following plea for peace:

"At this moment, when nearly the whole of Europe is being dragged into the vortex of a most terrible war, with its present dangers and miseries and the consequences to follow, the thought of which must strike every one with grief and horror, we whose care is the life and welfare of so many citizens and peoples cannot but be deeply moved and our heart wrung with the bitterest sorrow.

"And in the midst of this universal confusion and peril, we feel and know that both fatherly love and apostolic ministry demand of us that we should with all earnestness turn the thoughts

of Christendom thither, 'whence cometh help'—to Christ, the Prince of Peace and the most powerful mediator between God and man.

"We charge, therefore, the catholics of the whole world to approach the throne of Grace and Mercy, each and all of them, and more especially the clergy, whose duty furthermore it will be to make in every parish, as their bishops shall direct, public supplication, so that the merciful God may, as it were, be wearied with the prayers of His children and speedily remove the evil causes of war, giving to them who rule to think the thoughts of peace and not of affliction.

"From the palace of the Vatican, the second day of August, 1914.

"PIUS X., Pontifex Maximus."

The entombment of Pope Pius took place at sunset Aug. 22, the ceremony being witnessed by about 1,000 persons, including the diplomatic representatives accredited to the holy see, the prelates and members of the Roman aristocracy. The body of the pontiff, resting in a cypress coffin incased in zinc and oak, was placed in a crypt close to the tomb of Pius VI., in St. Peter's basilica.

ELECTION OF POPE BENEDICT XV.

The college of cardinals began its conclave for the election of a successor to Pope Pius X. Aug. 31 at the Vatican, in Rome, and the first ballot was taken on the following day. It was indecisive, as were also the second, third, fourth and fifth ballots, as the watching spectators outside the Vatican learned from seeing smoke from the burned ballots ascend from the chimney of the Sistine chapel in Cardinals Machi, Ferrata, Gasparri and Serafini were most frequently mentioned as leading candidates for the papacy and it was supposed that the choice would fall upon one of them. The result, as had often been the case at previous conclaves, was a surprise, as the supreme honor of the church was conferred upon a cardinal who had not publicly been mentioned in connection with the exalted office. On the sixth ballot, which was taken, Sept. 3, Giacomo della Chiesa, archbishop of Bologna and a cardinal only since May 25, 1914, was elected pope. He took the title of Benedict XV. His coronation took place Sunday, Sept. 6, and he held his first consistory Sept. 8.

VOLCANIC ERUPTION AND EARTHQUAKE IN JAPAN.

The volcano Sakurajima on the little island of Sakura, situated in the Bay of Kagoshima at the southern extremity of Japan, burst into violent eruption Jan. 12, 1914. Great quantities of rock, ashes and lava were thrown out over the surrounding country, which, in addition, was subjected to a series of severe earthquakes. For a time it was believed that hundreds if not thousands of persons had perished, but fortunately the loss of life was comparatively small. So far as could be ascertained, not more than twenty-five lives were lost on Sakura. In the city of Kagoshima, separated from the volcano by a narrow strait, eighteen persons were killed, eighty-seven severely injured and seventy-one slightly hurt as the result of the earthquakes. The worst of which occurred at 6:35 p. m. on the 12th. The people on Sakura island were warned

by the activity of the volcano on the 11th and most of them were enabled to make their escape to the mainland. Nine villages composed of 840 houses were destroyed out of the total of eighteen villages on Sakura.

In Kagoshima thirty-five houses collapsed, 118 were partly destroyed and many others slightly damaged. In Kimotsu and Kisa counties the damage caused by falling ashes and pumice stone affected 20,000 persons, to whom temporary assistance had to be given. No attempt was made to estimate the money value of the property destroyed by the eruption and earthquake.

EARTHQUAKE IN AKITA PREFECTURE.

The towns of Omagari, Yokote and Izume in the prefecture of Akita, island of Honshu, Japan, were wrecked by an earthquake March 15, 1914. Fifty-three persons were killed and 500 injured.

EARTHQUAKES IN SICILY.

The east coast of Sicily was visited by a series of earthquakes May 8 and 9, 1914, the most serious occurring at 7 o'clock on the evening of the 8th. The zone affected was that extending from Zaffarana, the highest village on Mount Etna, to the sea between Aci Reale on the south and Giarre on the north. The center of the disturbance seemed to be at Linera, where 110 persons were killed and about 300 injured. The village, which contained 800 inhabitants,

was completely destroyed. The deaths at other places, so far as reported, were: Bongiarlo, 13; Passopomo, 12; Cosentini, 16; Malati, 12; Santa Veneri, 6; Santa Tecla, 3; Santa Maria Vergine, 8; Garbati, 4. In Catania the heaviest shock lasted 6 seconds, but no fatalities occurred there. The total number of deaths in the whole district affected was estimated at 200 and the injured at more than 1,000.

REVOLUTION IN PERU.

Guillermo Billinghurst, installed as president of Peru Sept. 24, 1912, for the term ending in 1916, was taken prisoner by military revolutionists led by Col. Benavides early on the morning of Feb. 4, 1914. The rebels attacked the presidential palace and after a sharp fight in which Gen. Enrique Varila, premier and minister of war, was killed, captured the execu-

tive mansion. It was taken possession of by Dr. Augusto Durand, a former revolutionary leader. President Billinghurst was taken to Callao immediately and confined in the penitentiary until Feb. 18, when with his son George and his minister of the interior, Don Gonzalo Girondo, he was placed on board the Peruvian cruiser Lima, which conveyed him to Panama.

THE SMITHSONIAN INSTITUTION IN WASHINGTON.

The Smithsonian institution was established by statute in 1846, under the terms of the will of James Smithson, who bequeathed his fortune in 1826 to the United States for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian building, was erected in Washington, D. C., on land given by the United States. The institution is legally an establishment having as its members the president and vice-president of the United States, the chief justice and the president's cabinet. It is governed by a board of regents consisting of the vice-president, the chief justice, three members of the United States senate, three members of the house of representatives and six citizens appointed by

joint resolution of congress. It is under the immediate direction of the secretary of the Smithsonian institution, who is the executive officer of the board and the director of the institution's activities. The institution aids investigators by making grants for research and exploration, providing for lectures, initiating scientific projects and publishing scientific papers. It has administrative charge of the national museum, the national gallery of art, the international exchange service, the national zoological park, the astronomical observatory and the regional bureau for the international catalogue of scientific literature. The institution's original endowment of \$541,000 has been increased by gifts and accumulated interest. The secretary of the institution is Charles D. Walcott.

THE CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

The Carnegie Foundation for the Advancement of Teaching was founded by Andrew Carnegie in 1906 and incorporated by the congress of the United States in 1906 for the purpose of providing retiring allowances for teachers and officers of universities, colleges and technical schools in the United States, Canada and Newfoundland, and, in general, of advancing the profession of the teacher and the cause of higher education. By the eighth annual meeting of the trustees in 1913, 316 allowances were being paid to teachers and eighty-eight pensions to widows of teachers. The amount of the average allowance being \$1,703.34, the total annual cost being \$618,120, and

the average age of retirement being about 69 years.

In the administration of its endowment, which now amounts to \$15,000,000, the foundation has restricted its allowances to professors and officers in a list of seventy-three institutions, selected for their educational standing, and has published a series of widely influential reports and bulletins concerning educational conditions. The president of the foundation is Henry S. Pritchett; its trustees are presidents of universities and colleges, and financiers. Further information may be had by addressing the secretary, Clyde Furst, 676 5th avenue, New York.

STATES AND TERRITORIES IN THE UNION.

There are forty-eight states in the union and three territories, the latter including Hawaii, the District of Columbia and Alaska. The District of Columbia is governed by three commissioners, appointed by the president of the United States, under laws passed directly by congress.

Alaska has a governor, appointed by the president, and a legislature. Porto Rico, the Philippines and other island possessions of the United States are not technically territories, each having a special form of government.

DEATH OF LORD STRATHCONA AND MOUNT ROYAL.

Lord Strathcona and Mount Royal, high commissioner for Canada, died in London, England, early on the morning of Jan. 21, 1914. He was born in Scotland in 1820 and until created a baron in 1897 was known by his baptismal name, Donald Alexander Smith. Much the greater part of his life was spent in Canada, in the develop-

ment of which he was an important factor. He was the last resident governor of Hudson Bay company and was credited with having pressed to completion the Canadian Pacific railroad across the continent. Through his railroad and banking interests Lord Strathcona accumulated a large fortune. His services as lord high commissioner for Canada began in 1896.

WIRELESS TELEGRAPH SERVICE IN THE UNITED STATES.

[From department of commerce report, March 26, 1914.]

Practically the whole commercial value of the wireless telegraph service in the United States is for communicating between ship and shore, or between ship and ship. Transatlantic communication has been established between the government station at Arlington, Va., and the Eiffel tower in Paris as well as stations at Panama and San Francisco, but this is only occasional and is not open to commercial business. Press messages are sent from the united kingdom to Glace Bay, N. S., and vice versa and relayed by cable or overland telegraph to New York, Chicago, London and other centers. The most important present service which the wireless offers to the commercial world is probably in enabling shippers, insurance men and others on shore to keep track of vessels and shipments of goods, change their destination, etc., or in keeping men on shipboard informed as to market and other conditions on shore.

Wireless stations are divided into ship and land stations, the latter including (1) restricted and amateur stations and (2) commercial, special, army, navy and all other land stations. The department of commerce (bureau of navigation), has compiled and published a complete list of all land stations with the location, call number, nature of service, hours of operation and company or individual controlling each one. According to this list there are in the United States and possessions 186 stations of the second named class and of these eighty are partly or wholly open to public use. Of these eighty the United States army and navy control forty-nine, and the rest are in the hands principally of four or five private companies, of which the Marconi company is the largest. Of the stations controlled by the navy in the United States and possessions the following are of public business: Charleston, S. C.; St. Augustine, Jupiter, Pensacola and Key West, Fla.; Guantanamo bay, Cuba; San Juan, P. R.; Colon, Panama; Balboa, Canal Zone; Tatoochi Island and North Head, Wash.; Cape Blanco, Ore.; Eureka, Point Arguello and San Diego, Cal.; Guam; Fribilof Islands (two stations, St. Paul and St. George), Unalga, Dutch Harbor, Kodiak, Cordova and Sitka, Alaska. The ships of the navy are also open to commercial business for the convenience of the personnel on board.

All charges for radiograms must be prepaid and no collect commercial message is accepted. It should be remembered that for any message between ship and an interior point on land three separate charges are involved—the charge at the wireless station on shipboard, the wireless coast station charge and the charge of the cable line or land telegraph line. The coast

station and ship station rates vary, being different for the different companies and the navy. With navy coast stations on the Atlantic the usual charge for radiograms to vessels is 6 cents a word. At Key West the charge is 12 cents. On the Pacific coast the usual charge is 8 cents a word. The Marconi rates in 1914 were: Coast and ship station..... Per word. Min. Atlantic coast and Gulf of Mexico:

Coast station charges to—		
Vessels in transatlantic service.....	\$0.12	\$1.20
Vessels in North and South American service.....	.06	.60
Ship station charges—		
Vessels plying the Atlantic and Gulf of Mexico, when in transatlantic service.....	.08	.80
Vessels plying the Atlantic and Gulf of Mexico, when in North and South American service.....	.04	.40
Great lakes:		
Coast station charges.....	.03	.30
Ship station charges.....	.02	.20
Pacific coast:		
Coast station charges to—		
Vessels in transpacific service.....	.12	1.20
Vessels in North and South American service.....	.03	.30
Ship station charges—		
Vessels plying the Pacific, when in transpacific service.....	.08	.80
Vessels plying the Pacific, when in North and South American service.....	.02	.20

At Sayville, L. I., and South Wellfleet, Mass., are high-power stations capable of communicating with vessels 400 miles or more away, and for messages at that or greater distances a coast station charge of 30 cents a word is made.

The third rate, that of the ship station, is regulated within certain limits by each vessel for itself and the average rate can hardly be given. An international convention, which met in London in 1912 to agree on various provisions governing the use of wireless on the oceans, and the articles of agreement of which have been accepted by the United States, prescribed a standard maximum rate of 3 cents per word for ship station charges and 12 cents per word for coast station charges. It also established a bureau at Bern, Switzerland, known as the International Telegraph bureau, which publishes regularly full and complete information in regard to all the wireless stations established, both on shore and on shipboard, by all the nations subscribing to the agreement.

AMERICAN HALL OF FAME.

"The Hall of Fame for Great Americans" is the name of a building on University Heights in New York city, in which are inscribed on bronze tablets the names of famous American men and women. Nominations for the honor are made by the public and are submitted to a committee of 100 eminent citizens. In the case of men fifty-one votes are required and in the case of women forty-seven. The first balloting took place in October, 1900, when the following were chosen: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Thomas S. Grant, John Marshall, Thomas Jefferson, Ralph W. Emerson, H. W. Longfellow,

IMPEACHMENT CASES IN THE UNITED STATES.

BEFORE UNITED STATES SENATE.

The senate has sat as a court of impeachment in the cases of the following accused officials, with the result stated:

William Blount, senator from Tennessee, in 1799; charges dismissed for want of jurisdiction, Blount having resigned previously.

John Pickens, judge of the United States District court for New Hampshire; removed from office in 1804.

Samuel Chase, associate justice of the Supreme court of the United States; acquitted 1805.

James H. Peck, judge of the United States District court for Missouri; acquitted 1831.

West H. Humphreys, judge of the United States District court for Tennessee; removed from office, 1862.

Andrew Johnson, president of the United States; acquitted 1868.

William W. Belknap, secretary of war; acquitted 1876.

Charles Swayne, judge of the United States District court for the northern district of Florida; acquitted 1905.

Robert W. Archbald, associate judge of the United States Commerce court; convicted 1913.

AGAINST GOVERNORS.

Eight governors in the United States have faced impeachment proceedings. These men and the results that followed were:

Charles Robinson, Kansas, 1862; acquitted.

Harrison Reed, Florida, 1868; charges dropped.

William W. Holden, North Carolina, 1870; removed.

Powell Clayton, Arkansas, 1871; charges dropped.

David Butler, Nebraska, 1871; removed.

Henry C. Warmoth, Louisiana, 1872; term expired and proceedings dropped.

Adelbert Ames, Mississippi, 1876; resigned.

William Sulzer, New York, 1913; removed.

LORIMER ELECTION CASE CHRONOLOGY.

William Lorimer chosen United States senator by Illinois legislature May 26, 1909.

Validity of election challenged in United States senate Jan. 9, 1911.

Beveridge resolution declaring Lorimer not legally elected defeated in senate by a vote of 46 to 40 March 1, 1911.

Senate committee in Illinois legislature reports, after investigation, that in its opinion the election of Lorimer would not have occurred but for bribery and corruption and that a new investigation by the United States senate is demanded. Report made May 17, 1911.

United States senate by a vote of 48 to 20 decides, June 1, 1911, to reopen Lorimer investigation.

Senate investigation ended Feb. 9, 1912.

Majority and minority reports submitted by investigating committee to senate May 20, 1912; majority report finds that the election was not brought about by corrupt means; minority report declares that at least ten of the Lorimer votes were corruptly cast.

Resolution offered by Senator Luke Lea of Tennessee (May 20) declaring that corrupt methods and practices were employed in the election of William Lorimer to the senate of the United States from the state of Illinois, and that his election therefore was invalid.

Lea resolution adopted by United States senate by a vote of 55 to 28, July 14, 1912.

WORK OF THE 63D CONGRESS—SECOND SESSION.

Session began Dec. 1, 1913; ended Oct. 24, 1914.

VOLUNTEER ARMY LAW.

The land forces of the United States shall consist of the regular army, the organized land militia while in the service of the United States and such volunteer forces as congress may authorize.

The volunteer forces shall be raised, organized and maintained, as in this act provided, only during the existence of war, or while war is imminent, and only after congress shall have authorized the president to raise such a force. The term of enlistment in the volunteer forces shall be the same as that for the regular army, exclusive of reserve periods, and all officers and enlisted men composing such volunteer forces shall be mustered out of the service as soon as practicable after the president shall have issued a proclamation announcing the termination of the war or the passing of the imminence thereof.

When volunteer forces are to be raised the president shall issue his proclamation, stating the number of men desired, their arm or arms and department, within such limits as may be fixed by law, and he shall prescribe such rules and regulations, not inconsistent with the terms of the act, as may be necessary for the purpose of examining, organizing and receiving into the service the men called for. The power to organize volunteer forces shall include the power to provide, within the limits prescribed by law, the officers and enlisted men of all grades and classes, and the trained male and female nurses that may be necessary. When three-fourths of the prescribed minimum enlisted strength of any company, troop or battery, or of each company, troop or battery in any battalion or regiment of the organized land militia of any state or territory, shall volunteer and be accepted for service in the volunteer army such organization may be received into the volunteer forces in advance of other organizations of the same arm or class from the same state or territory, and the officers with such organization may then, within the limits prescribed by law, be appointed by the president, with the consent of the senate, as officers of corresponding grades in the volunteer army and be assigned to the same grades in the organization or elsewhere as the president may direct. All enlisted men received into the volunteer forces shall as far as may be practicable be taken from the several states and territories in proportion to the respective populations thereof.

The volunteer forces shall be subject to the laws, orders and regulations governing the regular army in so far as they are applicable to officers or enlisted men whose permanent retention in the military service, either on the active list or on the retired list, is not contemplated by existing law, and no distinction shall be made between the regular army, the organized militia while in the military service of the United States and the volunteer forces in respect to promotion or to the conferring upon officers or enlisted men

of brevet rank, medals of honor, certificates of merit or other rewards for distinguished service, nor in respect to the eligibility of any officer of the army, militia or volunteer forces for service upon any court martial, court of inquiry or military commission. The organization of all units of the line and of the signal troops of the volunteer forces shall be the same as that prescribed by law and regulations for the corresponding units of the regular army.

Except as otherwise provided herein, the president is authorized to appoint all volunteer officers required by this act, but the number and grade of such officers shall not exceed the number and grade of like officers provided for a like force of the regular army.

To provide the staff officers that will be necessary in the various staff corps and departments in time of war or while war is imminent and that are not otherwise provided for in this act, the president is authorized to appoint such number of volunteer staff officers of grades authorized for the regular army as he may find necessary. The total number of such officers so appointed, including officers of the organized militia called into the military service of the United States, shall not exceed the ratio of one officer to 200 enlisted men of all the militia and volunteer forces called into the military service of the United States. The number of volunteer staff officers shall not exceed in any staff corps or department the proportionate strength of regular officers of the corresponding grade as established by law for the corresponding staff corps or department of the regular army.

In appointing the volunteer officers authorized by the act the president may select them from the regular army, from those duly qualified and registered according to the act of July 21, 1903, from the country at large, from the organized land militia of the District of Columbia and, upon the recommendation of the various governors, from the organized land militia of the several states and territories in proportion to their respective populations and, as far as compatible with the interests of the military service, from the localities from which the troops with which the officers are to serve shall have been recruited. In appointments from the country at large preference shall be given those who have had honorable service in the regular army, the national guard or the volunteer forces, or who shall have been graduated from educational institutions in which military education is compulsory.

All returns and muster rolls of organizations of the volunteer forces and of militia organizations while in the service of the United States shall be rendered to the adjutant-general of the army, and upon the muster out of such organizations the records pertaining to them shall be transferred to and filed in the adjutant-general's office.

In time of war or while war is imminent all organizations of the land forces in the military service of the United States shall be recruited and maintained as near their prescribed strength as practicable. For this purpose the necessary rendezvous and depots shall be established by the secretary of war for the enlistment and training of all recruits, and in order that officers may be available for recruiting duty the president is authorized, with consent of the senate, to appoint officers of volunteers of the proper arm of the service, additional to those elsewhere herein authorized, in numbers not to exceed at the rate of one major, four captains, five first lieutenants and five second lieutenants for each organized regiment of cavalry, field artillery or infantry, each three battalions of engineers or each twelve companies of coast artillery. For purpose of instruction and discipline the troops at recruit depots may be organized into companies and battalions, at the discretion of the secretary of war, with noncommissioned officers and privates of such grades and numbers as may be prescribed by the president.

In the organization of a recruiting system, after congress shall have authorized the raising of volunteer forces, the president is authorized to employ retired officers, noncommissioned officers and privates of the regular army, or he may appoint and employ retired officers below the grade of colonel.

Except as otherwise specifically prescribed by law, all officers provided for in this act shall be subject to such assignments of duty and such transfers as the president may direct.

All officers and enlisted men of the volunteer forces shall be in all respects on the same footing as to pay, allowances and pensions as officers and enlisted men of corresponding grades in the regular army.

All laws and parts of laws in conflict with the provisions of this act are repealed. (Approved April 25, 1914.)

ORGANIZED NAVAL MILITIA.

Of the organized militia as provided for by law such part as may be duly prescribed in each state shall constitute a naval militia. On and after three years from the date of the passage of this act the organization of the naval militia shall be units of convenient size, in each of which the number and ranks of officers and the distribution of the total enlisted strength among the several ratings of petty officers and other enlisted men shall be established by the secretary of the navy, who shall also establish the number of officers and enlisted men required for the organization of such units into larger bodies for administrative and other purposes. The arms and equipment of the naval militia shall be the same as those prescribed for the landing forces of the vessels of the United States navy.

The secretary of the navy is authorized to issue to the governors of the several states and territories or other proper officers, as a loan, vessels and equipment and may detail to the vessels such number of officers and enlisted men as he may deem desirable for duty as shipkeepers.

In the event of war, actual or threatened, with any foreign nation involving danger of invasion, or of rebellion against the government, or whenever the president is, in his judgment, unable with the regular forces at his command to execute the laws of the United States, he shall be lawful for the president to call forth such numbers of the naval militia as he may deem necessary. He may specify in his call the period for which such service is required and the militia so called shall continue to serve during the period so specified, either within or without the territory of the United States, unless sooner relieved by order of the president. If no period is named the militia shall serve during the emergency, of which the president shall be the sole judge.

Every officer and enlisted man of the naval militia who shall be called forth shall be mustered for service without further appointment or enlistment and without further professional examination previous to such muster except for those states and territories which have not adopted a standard of professional and physical examination prescribed by the secretary of the navy for the naval militia, and whose officers and petty officers shall not have been examined and found qualified by boards of officers which shall be appointed by the secretary. Any officer or enlisted man of the naval militia so qualified who shall refuse or neglect to present himself for such muster upon being called forth shall be subject to trial by court martial.

Naval militia officers mustered as such into the service of the United States shall rank with but after officers of the regular navy in the same grade and rank, except that for the purpose of determining who shall exercise command over a combined force, composed of vessels commanded by naval militia officers and of vessels commanded by officers of the navy acting in conjunction, all officers of the naval militia of or above the rank of lieutenant-commander will be regarded as junior to lieutenant-commanders of the navy. The naval militia when called into the service of the United States shall be governed by the navy regulations and shall be entitled to the same pay and allowances as are provided by law for the regular navy.

The secretary of the navy is authorized to issue to the naval militia such number of United States service arms, accessories, equipment, uniforms and military and naval stores of all kinds as are necessary to arm, uniform and equip all of the naval militia in the several states and territories without charging the cost or value

thereof to such states and territories. The property shall belong to the United States and shall be accounted for annually by the proper state authority. The secretary of the navy is authorized to provide for the participation of the naval militia in any cruise, maneuvers, field instruction or encampment of the regular navy, afloat or ashore.

The secretary of the navy may, upon request, detail one or more officers or enlisted men of the navy to report to the governor or other official making the request for duty in connection with the naval militia. The secretary of the navy is authorized to appoint a board of five officers of the naval militia which shall from time to time proceed to Washington, D. C., for consultation respecting the condition, status and needs of the whole body of naval militia.

The sum of \$200,000 is appropriated for the purpose of meeting the expenditures authorized by the act. (Approved Feb. 16, 1914.)

INCREASE OF THE NAVY.

For the purpose of further increasing the naval establishment of the United States, the president is authorized to have constructed two first-class battle ships carrying as heavy armament and as powerful armament as any vessel of their class, to have the highest practicable speed and greatest desirable radius of action, and to cost, exclusive of armor and armament, not to exceed \$7,800,000 each. One of the battle ships authorized shall be built and constructed at a government navy yard.

Six torpedo boat destroyers, to have the highest practicable speed, to cost, exclusive of armor and armament, not to exceed \$925,000 each.

Eight or more submarines, one to be of seagoing type, to have surface speed of not less than twenty knots, seven or more to be of coast and harbor defense type; to cost not exceeding in the aggregate \$4,460,000, and the sum of \$1,825,000 is appropriated for said purpose, to be available until expended. The appropriation made in the naval act approved March 4, 1913, for the construction or purchase of a testing and wrecking pontoon for submarines, to be available until expended, is made available until expended for the construction of the eight or more submarine boats. (Approved June 30, 1914.)

ARMY AVIATION SERVICE.

There is created an aviation section, which shall be a part of the signal corps of the army and which shall be charged with the duty of operating or supervising the operation of all military air craft, including balloons and aeroplanes, all appliances pertaining to such craft and all signaling apparatus of any kind when installed on such craft; also with the duty of training officers and enlisted men in matters pertaining to military aviation.

In addition to such officers and enlisted men as shall be assigned from the signal corps at large to executive, administrative or other duty in or for the aviation section, there shall be in that section aviation officers not to exceed sixty in number and 200 enlisted aviation men. Such officers and men shall be additional to the officers and men allotted by law to the signal corps, the strength of which is accordingly increased.

The aviation officers provided for by the act shall, with certain specific exceptions, be selected from among officers holding commissions in the army below the rank of captain and their term of duty as aviation officers shall be four years.

There shall be constantly attached to the aviation section a sufficient number of aviation students to make, with the aviation officers actually detailed under the provisions of the act, a total number of sixty aviation officers and aviation students constantly under detail in the section. The students shall be selected on the recommendation of the chief signal officer from among the unmarried lieutenants of the line of the army not more than two years of age and shall remain for a sufficient time, but not exceeding one year, in the aviation section to determine their fitness or unfitness for detail as aviation officer. No person, except in time of war, shall be assigned to duty in the aviation service against his will.

Aviation officers shall be rated in two classes—junior military aviators and military aviators.

Each aviation student while on duty that requires him to participate regularly and frequently in aerial flights shall receive an increase of 25 per cent in the pay of his grade. Each junior military officer while so serving shall have the rank, pay and allowances of one grade higher than that held by him under his line commission, and while on duty requiring him to take part regularly and frequently in aerial flights shall receive an increase of 50 per cent in the pay of his grade. The rating of military aviator shall not hereafter be conferred upon or held by any person except as provided in the act, and the number of officers with that rating shall at no time exceed fifteen. Each military aviator shall, while so serving, have the rank, pay and allowances of one grade higher than that held by him under his line commission, provided that his rank be not higher than that of first lieutenant, and, while on duty requiring him to participate regularly and frequently in aerial flights, he shall receive in addition an increase of 75 per cent of the pay of his grade and length of service under his line commission.

The aviation enlisted men provided for shall consist of twelve master signal electricians, twelve first class sergeants, twenty-four sergeants, seventy-eight corporals, eight cooks, eighty-two first class privates and forty-four privates. Not to exceed forty of such enlisted men shall at any one time have the rating of aviation mechanic, which rating is hereby established. Twelve enlisted men at a time shall, in the discretion of the officer in command of the aviation section, be instructed in the art of flying. Each aviation enlisted man, while on duty that requires him to participate regularly and frequently in aerial flights, or while holding the rating of aviation mechanic, shall receive an increase of 50 per cent in his pay.

There shall be paid to the widow of any officer or enlisted man who shall die as the result of an aviation accident, not the result of his own misconduct, or to any other person designated by him in writing, an amount equal to one year's pay at the rate to which such officer or enlisted man was entitled at the time of the accident resulting in his death. (Approved July 18, 1914.)

FEDERAL TRADE COMMISSION.

There is created a federal trade commission of five members, who shall be appointed by the president with the consent of the senate. Not more than three of the members shall be of the same political party. The first commissioners shall continue in office for three, four, five, six and seven years, respectively, but their successors shall each be appointed for seven years. No commissioner shall engage in any other business. Each commissioner shall receive a salary of \$10,000 a year, and the secretary to be appointed by the commission shall receive \$5,000 a year. When the commission has been organized the bureau of corporations and the offices of commissioner and deputy commissioner of corporations shall cease to exist.

The principal office of the commission shall be in Washington, D. C., but it may meet and exercise its powers anywhere else.

Unfair methods of competition in commerce are declared unlawful. The commission is empowered and directed to prevent persons, partnerships or corporations, except banks and common carriers, from using unfair methods of competition in commerce. Whenever the commission shall have reason to believe any such person, partnership or corporation has been or is using any unfair method of competition it shall issue a complaint and fix a day for hearing at which the person, partnership or corporation so complained of shall have a right to appear and show cause why an order to desist from such competition should not be entered. If upon such hearing the commission shall be of the opinion that the method of competition is unfair under this act, it shall issue an order for its discontinuance. If this order is not obeyed the commission may apply to the Circuit Court of Appeals of the United States for the enforcement of its order. The court named shall have exclusive jurisdiction to enforce, set aside or modify the orders of the commission. Such proceedings shall be expedited and have

precedence over other cases. No order of the commission or judgment of the court to enforce the same shall absolve any person, partnership or corporation from any liability under the antitrust laws.

The commission shall also have the power to investigate and compile information concerning the organization and business methods of any corporation engaged in commerce, except banks and common carriers, and its relation to other corporations or individuals: to require such corporations to file such reports as may be required; to investigate and report to the attorney-general in what manner any decree entered against any defendant corporation is being carried out, such investigation being mandatory if asked for by the attorney-general; to investigate, by direction of either house of congress or the president, alleged violations of the antitrust acts by any corporation; upon application of the attorney-general, to investigate and make recommendations for the readjustment of the business of any corporation alleged to be violating the antitrust acts; to make annual and special reports to congress and to make public such information as it shall deem expedient in the public interest; to classify corporations; to investigate trade conditions in foreign countries where associations or practices of manufacturers, merchants or traders may affect the foreign trade of the United States and to report thereon to congress. (Approved Sept. 26, 1914.)

CLAYTON ANTITRUST LAW.

It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly to discriminate in price between different purchasers of commodities, which commodities are sold for use, consumption or resale within the United States or any territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce: Provided, That nothing herein contained shall prevent discrimination in price between purchasers on account of differences in grade, quality or quantity of the commodity sold, or that makes due allowance for differences in the cost of selling or transportation, or discrimination in price in the same or different communities made in good faith to meet competition: And, provided further, That nothing herein contained shall prevent persons engaged in selling goods, wares or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade.

It shall be unlawful for any person engaged in commerce to lease or make a sale or contract for sale of commodities, whether patented or unpatented, for use, consumption or resale within the United States or any territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in commodities of a competitor or competitors of the lessor or seller, where the effect may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any District court of the United States for the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

(Sec. 6.) "That the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural or horticultural organizations, instituted for the purposes of mutual help and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organiza-

tions, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws."

No corporation engaged in commerce shall acquire the whole or any part of the stock or share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition, to restrain commerce or tend to create a monopoly. The acquisition by any corporation of stock in two or more corporations under like conditions is forbidden. The section does not apply to corporations purchasing such stock solely for investment and not for the purpose of lessening competition. Subsidiary corporations may be formed for carrying on the lawful business of the parent corporation where the effect is not substantially to lessen competition. Railroads or common carriers may also in the construction of branches or feeders or may acquire such from independent companies, provided the effect is not to lessen competition.

From and after two years after the approval of the act no person shall be a director or other officer or employee of more than one bank or trust company organized under the laws of the United States, either of which has deposits, capital, surplus and undivided profits aggregating more than \$5,000,000, and no private banker or other who is a director in any bank or trust company, organized and operating under the laws of a state, having deposits, capital, surplus and undivided profits aggregating more than \$5,000,000, shall be eligible to be a director in any bank or banking association organized or operating under the laws of the United States.

No bank, banking association or trust company, organized or operating under the laws of the United States in any city or incorporated town or village of more than 200,000 inhabitants, as shown by the last preceding decennial census of the United States, shall have as a director or other officer or employee any private banker or other director or other officer or employee of any other bank, banking association or trust company located in the same place: Provided, That nothing in this section shall apply to mutual savings banks not having a capital stock represented by shares: Provided further, That a director or other officer or employee of such bank, banking association or trust company may be a director or other officer or employee of not more than one other bank or trust company organized under the laws of the United States or any state where the entire capital stock of one is owned by stockholders in the other: And provided further, That nothing contained in this section shall forbid a director of class A of a federal reserve bank, as defined in the federal reserve act, from being an officer or director or both an officer and director in one member bank.

From and after two years from the date of the approval of this act no person at the same time shall be a director in any two or more corporations any one of which has capital, surplus and undivided profits aggregating more than \$1,000,000, engaged in whole or in part in commerce other than banks, banking associations, trust companies and common carriers subject to the act to regulate commerce, approved Feb. 4, 1897, if such corporations are or shall have been theretofore, by virtue of their business and location of operation, competitors, so that the elimination of competition by agreement between them would constitute a violation of any of the provisions of any of the antitrust laws.

Every president, director, officer or manager of any firm, association or corporation engaged in commerce as a common carrier who embezzles, steals or otherwise willfully misapplies or permits to be misapplied any of the moneys, funds, credits, securities or assets of such firm, corporation or association shall be deemed guilty of a felony and upon conviction shall be fined not less than \$500 or confined in the penitentiary not less than one year nor more than ten years or both.

After two years from the approval of this act no common carrier engaged in commerce shall have any dealings in securities, supplies or other articles of commerce, or shall make contracts for construction or maintenance of any kind, to the

amount of more than \$50,000 in the aggregate in any one year with another corporation, firm, partnership or association when the said common carrier shall have upon its board of directors or as its president, manager or as its purchasing or selling officer or agent in the particular transaction any person who is at the same time a director, manager or purchasing or selling officer of such other corporation, unless such purchases shall be made from or such dealings shall be with the bidder whose bid is the most favorable to such common carrier, to be ascertained by competitive bidding under regulations to be prescribed by the interstate commerce commission. Any person who shall attempt to prevent free and fair competition shall be punished as prescribed in the case of an officer or director. If any common carrier shall violate this section it shall be fined not exceeding \$25,000, and every such director, agent, manager or officer thereof who shall have knowingly voted for or directed the act constituting such violation or who shall have aided or abetted in such violation shall be deemed guilty of a misdemeanor and shall be fined not exceeding \$5,000, or confined in jail not exceeding one year, or both, in the discretion of the court.

Authority to enforce compliance with this act by the persons subject thereto is vested in the interstate commerce commission where applicable to common carriers, in the federal reserve board where applicable to banks, banking associations and trust companies, and in the federal trade commission where applicable to all other character of commerce. (Approved Oct. 15, 1914.)

AGRICULTURAL EXTENSION WORK. (Smith-Lever Act.)

In order to aid in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics, and to encourage the application of the same, there may be inaugurated in connection with the college or colleges in each state now receiving, or which may hereafter receive, the benefits of the act of congress approved July 2, 1862, entitled "An act donating public lands to the several states and territories to provide colleges for the benefit of agriculture and the mechanic arts," and of the act of congress approved Aug. 30, 1890, agricultural extension which shall be carried on in co-operation with the United States department of agriculture: Provided, That in any state in which two or more such colleges have been or hereafter may be established the appropriations hereinafter made to such state shall be administered by such college or colleges as the legislature of such state may direct: Provided further, That pending the inauguration and development of the co-operative extension work herein authorized, nothing in this act shall be construed to discontinue either the farm management work or the farmers' co-operative demonstration work as now conducted by the bureau of plant industry of the department of agriculture.

2. Co-operative agricultural extension work shall consist of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities, and imparting to such persons information on said subjects through field demonstrations, publications and otherwise, and this work shall be carried on in such manner as shall be mutually agreed upon by the secretary of agriculture and the state agricultural college or colleges receiving the benefits of this act.

3. For the purpose of paying the expenses of the co-operative agricultural extension work and the necessary printing and distributing of information in connection with the same, there is permanently appropriated the sum of \$400,000 for each year, \$100,000 of which shall be paid annually in the manner hereinafter provided to each state which shall by action of its legislature assent to the provisions of this act: Provided, That payment of such installments of the appropriation hereinbefore made as shall become due to any state before the adjournment of the regular session of the legislature meeting next after the passage of this act may, in the absence of prior legislative assent, be made upon the assent of

the governor thereof, duly certified to the secretary of the treasury: Provided further, That there is also appropriated an additional sum of \$600,000 for the fiscal year following that in which the foregoing appropriation first becomes available and for each year thereafter for seven years a sum exceeding by \$500,000 the sum appropriated for each preceding year and for each year thereafter there is permanently appropriated for each year the sum of \$4,100,000 in addition to the sum of \$400,000 hereinbefore provided. Such additional sums shall be used until the purposes hereinbefore stated and shall be allotted annually to each state by the secretary of agriculture and paid in the manner hereinbefore provided, in the proportion which the rural population of each state bears to the total rural population of all the states as determined by the next preceding federal census: Provided further, That no payment out of the additional appropriations herein provided shall be made in any year to any state until an equal sum has been appropriated for that year by the legislature of such state, or provided by state, county, college, local authority or individual contributions from within the state, for the maintenance of the co-operative agricultural extension work provided for in this act.

5. If any portion of the moneys received by the designated officer of any state for the support and maintenance of co-operative agricultural extension work, as provided in this act, shall by any action or contingency be diminished or lost or be misapplied, it shall be replaced by the state to which it belongs, and until so replaced no subsequent appropriation shall be apportioned or paid to such state, and no portion of said moneys shall be applied, directly or indirectly, to the purchase, erection, preservation or repair of any building or buildings, or the purchase or rental of land, or in college-course teaching, lectures in colleges, promoting agricultural trains or any other purpose not specified in this act, and not more than 5 per centum of each annual appropriation shall be applied to the printing and distribution of publications. It shall be the duty of each of such colleges annually, on or before the first day of January, to report to the governor of the state in which it is located a full and detailed report of its operations in the direction of extension work as defined in this act, including a detailed statement of receipts and expenditures from all sources for this purpose, a copy of which report shall be sent to the secretary of agriculture and to the secretary of the treasury of the United States.

6. On or before the first day of July in each year after the passage of this act the secretary of agriculture shall ascertain and certify to the secretary of the treasury as to each state whether it is entitled to receive its share of the annual appropriation for co-operative agricultural extension work under this act and the amount which it is entitled to receive. (Approved May 8, 1914.)

RAILROADS IN ALASKA.

The president of the United States is empowered and directed to designate and cause to be located a route or routes for a line or lines of railroads in the territory of Alaska not to exceed in the aggregate 1,000 miles, to be so located as to connect one or more of the open Pacific ocean harbors on the southern coast of Alaska with the navigable waters in the interior of Alaska and with the coal fields, so as best to aid in the development of the agricultural and mineral or other resources of Alaska and the settlement of the public lands therein, and so as to provide transportation of coal for the army and navy, transportation of troops, arms, munitions of war, the mails and for other governmental and public uses and for the transportation of passengers and property. The president is authorized to designate one or more of the railroad, to employ such officers, agents and employees as may be necessary and to fix their compensation. He is to construct a railroad or railroads along such route or routes as he may designate, with the necessary branch lines, sidings, switches and spurs; to purchase or otherwise acquire rights of way, terminal grounds and all other rights to purchase the equipment necessary for the construction and operation; to fix, change or modify rates; to

build or buy docks, wharves, terminal facilities and all necessary structures and to perform all the usual duties of a common carrier by railroad. He is empowered to lease the road or roads with telegraph and telephone lines for not more than twenty years, or, in the event of failure to lease, to operate the same until further action by congress.

The president is authorized to utilize in the construction of such railroad or railroads any and all machinery, equipment, instruments and material used in the construction of the Panama canal. He is given power to withdraw, locate and dispose of such areas of the public domain for townsite purposes as he may designate. The cost of the work authorized by the act must not exceed \$35,000,000. (Approved March 12, 1914.)

LEASING ALASKA COAL LANDS.

The secretary of the interior is authorized to survey the coal lands in Alaska, for which purpose the sum of \$100,000 is appropriated. The president of the United States shall reserve not exceeding 5,121 acres of such land in the Bering river field, 7,680 acres in the Matanuska field and not to exceed one-half of the other coal lands in Alaska. The unreserved coal lands and coal deposits shall be divided into sections of the interior into leasing blocks of forty acres each, or multiples thereof, and in such form as will permit the most economical mining, but in no case exceeding 2,560 acres in any one leasing tract, and thereafter he may award leases thereof under conditions specified in the act. The lessee in each case shall pay to the United States a royalty of not less than 2 cents a ton and an annual rental of 25 cents an acre for the first year, 50 cents an acre for the next four years and after that \$1 an acre, except that the rental for any year shall be credited against the royalties for that year. Leases may be for terms not exceeding fifty years each, subject to renewal. (Approved Oct. 20, 1914.)

REGULATION OF OPIUM TRAFFIC.

The act of Feb. 9, 1909, prohibiting the importation and use of opium for other than medicinal purposes, is amended by the addition of six new sections. These provide that on and after July 1, 1913, all smoking opium found within the United States shall be subject to the laws hereinafter provided. After April 1, 1909, and the burden of proof shall be on the claimant or the accused to rebut such presumption; that any person subject to the jurisdiction of the United States who shall have in his possession or conceal on board of or transport on any foreign or domestic vessel or railroad car destined to or bound from the United States any smoking opium shall be subject to a fine of not more than \$5,000 nor less than \$50 or by imprisonment for any term not exceeding two years, or both; that no smoking opium shall be admitted into the United States or into any territory under the control or jurisdiction thereof, for transportation to another country, nor shall such opium be transferred from one vessel to another vessel within any waters of the United States for immediate exportation or any other purpose; that hereafter it shall be unlawful for any person subject to the jurisdiction of the United States to export from the United States, or from territory under its control, or from countries in which the United States exercises extraterritorial jurisdiction, any opium or cocaine, or any salt derivative or preparation of opium or cocaine to any other country. Provided, That opium or cocaine and salts, derivatives or preparations thereof, except smoking opium, the export of which is absolutely prohibited, may be exported to countries regulating their entry, such regulations to be promulgated from time to time by the secretary of state of the United States.

Any person who exports or causes to be exported any of the aforesaid drugs in violation of the act shall be fined in any sum not exceeding \$5,000 nor less than \$50, or by imprisonment for any time not exceeding two years, or both. (Approved Jan. 17, 1914.)

TAX ON SMOKING OPIUM.

An internal revenue tax of \$300 a pound shall be levied and collected upon all opium manufactured in the United States, and no person shall

engage in such manufacture who is not a citizen of the United States and who has not given the bond required by the commissioner of internal revenue. Every manufacturer of opium shall file with the collector of internal revenue of the district in which his manufactory is located, such notices, inventories and bonds, shall keep such books and render such returns of material and products, shall put up such signs and affix such number to his factory and conduct his business under such surveillance of officers and agents as the commissioner of internal revenue, with the approval of the secretary of the treasury, may by regulation require. But the bond required of such manufacturer shall be with sureties satisfactory to the collector of internal revenue and in a penal sum of not less than \$100,000, and the sum of the bond may be increased from time to time and additional sureties required, at the discretion of the collector or under instructions of the commissioner of internal revenue. All opium prepared for smoking manufactured in the United States shall be duly stamped in such a permanent manner as to denote the payment of the internal revenue tax thereon. A penalty of not less than \$10,000 or imprisonment for not less than five years, or both, in the discretion of the court, shall be imposed for each and every violation of the sections of this act relating to opium by any person or persons, and all opium prepared for smoking wherever found within the United States without the stamps required by this act shall be forfeited and destroyed. (Approved Jan. 17, 1914.)

HOURS OF WOMAN EMPLOYEES.

The act provides that no female shall be employed in any manufacturing, mechanical or mercantile establishment, laundry, hotel or restaurant, or telegraph or telephone establishment or office, or by any express or transportation company in the District of Columbia more than eight hours in any one day or more than six days more than forty-eight hours in any one week; that no female under 18 years of age shall be employed or permitted to work in or in connection with any of the establishments or occupations named in this act before the hour of 7 a. m. or after the hour of 6 p. m. of any one day; that no female shall be employed or permitted to work for more than six hours continuously at one time in any establishment or occupation named in this act in which three or more such females are employed without an interval of at least three-quarters of an hour; except that such female may be so employed for not more than six and one-half hours continuously at one time if such employment ends not later than 1:30 p. m. and if she is then dismissed for the remainder of the day.

Any person who violates or does not comply with any of the provisions of this act shall upon conviction be punished for a first offense by a fine of not less than \$20 nor more than \$50; for second offense, by a fine of not less than \$50 nor more than \$200; for a third offense, by a fine of not less than \$250. (Approved Feb. 24, 1914.)

MOTHERS' DAY.

Whereas, the service rendered the United States by the American mother is the greatest source of the country's strength and inspiration; and,

Whereas, we honor ourselves and the mothers of America when we do anything to give emphasis to the home as the fountain head of the state; and,

Whereas, the American mother is doing so much for the home, the moral uplift and religion, hence so much for good government and humanity; therefore, be it

Resolved by the senate and house of representatives of the United States of America in congress assembled That the president of the United States is hereby authorized and requested to issue a proclamation calling upon the government officials to display the United States flag on all government buildings, and the people of the United States to display the flag at their homes or other suitable places on the second Sunday in May as a public expression of our love and reverence for the mothers of our country.

Sec. 2 That the second Sunday in May shall hereafter be designated and known as Mothers'

day, and it shall be the duty of the president to request its observance as provided for in this resolution. (Approved May 8, 1914.)

METHOD OF ELECTING SENATORS.

At the regular election held in any state next preceding the expiration of the term for which any senator was elected to represent such state in congress, at which election a representative to congress is regularly by law to be chosen, a United States senator shall be elected by the people for the term commencing on the 4th day of March next thereafter.

Sec. 2. In any state wherein a United States senator is hereafter to be elected either at a general election or at any special election called by the executive authority thereof to fill a vacancy, until otherwise specially provided by the legislature thereof, the nomination of candidates for such office not heretofore made shall be made, the election to fill the same conducted and the result thereof determined as near as may be in accordance with the laws of such state regulating the nomination of candidates for and election of members at large of the national house of representatives: Provided, That in case no provision is made in any state for the nomination or election of representatives at large, the procedure shall be in accordance with the laws of such state respecting the ordinary executive and administrative officers thereof who are elected by the vote of the people of the entire state: And provided further, That in any case the candidate for senator receiving the highest number of votes shall be deemed elected.

Sec. 3. That section 2 of this act shall expire by limitation at the end of three years from the date of its approval. (Approved June 4, 1914.)

MEDALS FOR KROONLAND HEROES.

By joint resolution the thanks of congress are extended to Capt. Paul H. Kreibohm and the crew of the Red Star line steamer Kroonland for promptly going to the relief of the burning steamer Voltorno in the north Atlantic ocean Oct. 9 and 10, 1913, and heroically rescuing eighty-nine people on board the craft. In addition, the secretary of commerce is authorized to present to the captain a gold watch and to the other officers and men five gold, five silver and twenty-nine bronze medals, the watch and medals to be appropriately inscribed to express the high admiration in which congress holds the serv-

ices of the recipients on the occasion named. (Approved March 19, 1914.)

MINISTERS TO PARAGUAY AND URUGUAY.

The president is authorized to appoint, as the representative of the United States, an envoy extraordinary and minister plenipotentiary to Paraguay, who shall receive \$10,000 per annum.

The president is further authorized to appoint, as the representative of the United States, an envoy extraordinary and minister plenipotentiary to Uruguay, who shall receive \$10,000 per annum. (Approved Dec. 6, 1913.)

AMBASSADOR TO ARGENTINA.

The president is authorized to appoint, as the representative of the United States, an ambassador to Argentina, who shall receive as his compensation the sum of \$17,500 per annum. (Approved May 16, 1914.)

AMBASSADOR TO CHILE.

The president is authorized to appoint, as the representative of the United States, an ambassador to the republic of Chile, who shall receive as his compensation the sum of \$17,500 per annum. (Approved May 16, 1914.)

TAX ON COTTON FUTURES.

Upon each contract of sale of any cotton for future delivery made at, in or on any exchange, board of trade or similar institution or place of business there is levied a tax in the nature of an excise of 2 cents for each pound of cotton involved in the contract. No tax, however, is to be levied in case the contract complies with the requirements, rules and regulations laid down in the act. (Approved Aug. 18, 1914.)

RELIEF OF AMERICANS IN MEXICO.

For the relief of American citizens in Mexico, including transportation to their homes in the United States, there is appropriated the sum of \$500,000, to be expended at the discretion of the president. (Approved April 24, 1914.)

PRESENT OF STEAM LAUNCH TO FRANCE.

As a mark of appreciation of the sacrifices and services of the French people in the construction of the Panama canal, the steam launch Louise, built in France in 1885 and employed in the construction of the canal successively by the French Canal company and by the United States, is to be put in good condition and presented to the French government. To meet expenses \$6,000 is appropriated. (Approved Aug. 25, 1914.)

WEATHER FORECASTS AND SIGNALS.

The operations of the weather bureau of the department of agriculture are based on observations of the weather taken at about 200 observatories throughout the United States at the same moment of time and telegraphed daily to Washington, D. C., and to other important cities. These observations, comprising barometric pressure, temperature, precipitation, winds and

sons in the United States to whom the weather forecasts are available is more than 4,000,000.

When No. 4 is placed above No. 1, 2 or 3 it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary. During the late spring and early fall the cold-wave flag is used to indicate anticipated frosts.

No. 1.
White flag.

Clear or fair weather.

No. 2.

clouds, are entered upon outline charts of the United States by means of symbols, forming the "daily weather map," from which the forecasts are made. These forecasts are issued every day for every state in the union, and whenever necessary special warnings are sent out of storms, frosts, cold waves, heavy snows and floods. In addition to the main office in Washington, there are subordinate forecast centers in Chicago, New Orleans, Denver, San Francisco and Portland, Ore. Weather forecasts for a week in advance are now sent out from Washington and published each Monday.

The forecasts are first telegraphed to about 2,300 principal distributing points, whence they are further disseminated by telegraph, telephone and through the mail by means of forecast cards, rural free delivery slips and newspapers.

It is estimated that the total number of per-

sonal craft warning—A red pennant indicates that moderately strong winds are expected.

Storm warnings—A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: Red, easterly; white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds and a white light above a red light westerly winds.

Two red flags, with black centers, displayed one above the other, indicate the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the lakes and northern Atlantic coast. Hurricane warnings are not displayed at night.

UNITED STATES PASSPORT REGULATIONS.

Passports are issued to citizens of the United States upon application to the state department in Washington. The application must be accompanied by an affidavit, attested by a notary public or other officer empowered to administer oaths, stating that the applicant is a citizen and giving the place of birth and age, and it must be accompanied by the certificate of one other citizen to whom he is personally known that the declaration made by the applicant is true. The application must also be accompanied by a description of the person, particularly as to age, height, complexion, forehead, eyes, nose, mouth,

chin, hair and face. Blank forms are furnished by the state department upon application. The fee for each passport is \$1. Citizens traveling abroad may also in some cases obtain passports by applying to United States ambassadors and ministers. Where any person has made a declaration of intention to become a citizen of the United States and has resided in the United States for three years a passport valid for six months may be issued to him. [Owing to European war special regulations for identification were issued in November, 1914. Apply to state department for further information.]

Membership goes to the eldest male descendant, if worthy; in case there is no direct male descendant, then to male descendants through intervening female descendants. The present membership is about 890. George Washington was the first president-general until his decease and Alexander Hamilton the second.

SOCIETY OF THE WAR OF 1812.

Organized Sept. 14, 1814.

President-General—John Cadwalader (of Pennsylvania society).

Secretary-General—Herbert M. Leland, Massachusetts.

Assistant Secretary-General—John Mason Dulany, 1320 Linden avenue, Baltimore, Md.

In the United States District court in Hartford, Conn., Oct. 11, 1912, a jury returned a verdict for \$80,000 and costs against the United Hatters of North America in the suit brought by D. E. Loewe & Co., hat manufacturers in Danbury, Conn., charging the defendants with conducting a boycott against hats made by the firm. Under the Sherman antitrust law the damages are trebled, making the award in this instance equivalent to \$240,000.

The suit was originally brought in the Circuit court in 1903, when Loewe & Co. filed a bill alleging that the labor organization had undertaken to unionize the company's hat factory in Danbury, and, failing to do so, had gone on a strike. This act was followed by the declaration of a boycott against the firm's hats wherever they were found, and as it controlled an extensive trade throughout many states the boycott, in the language of the bill, constituted a combination to limit and restrain interstate commerce. On a demurrer by the hatters' union the Circuit

Chaplain-General—Henry Branch, D. D., Maryland.

State societies have been formed in Pennsylvania, Maryland, Massachusetts, Connecticut, Illinois, District of Columbia, New York and New Jersey. Membership is made up of male persons above the age of 21 years who participated in or are lineal descendants of one who served during the war of 1812 in the army, navy, revenue, marine or privateer service of the United States, upon offering proof thereof satisfactory to the state society to which they may make application for membership, and who are of good moral character and reputation.

MILITARY ORDER OF FOREIGN WARS OF THE UNITED STATES.

Instituted Dec. 27, 1894.

OFFICERS OF THE NATIONAL COMMANDERY.

Commander-in-Chief—Maj.-Gen. Charles F. Roe, New York, N. Y.

Secretary-General—Maj. David Banks, 23 Park place, New York, N. Y.

Deputy Secretary-General—Capt. B. H. Dalley, South Bend, Ind.

Treasurer-General—Gen. Oliver C. Bosbyshell, 4048 Chestnut street, Philadelphia, Pa.

Registrar-General—Rev. Henry N. Wayne, Tuckahoe, N. Y.

Judge-Advocate-General—H. W. Lamberton, Harrisburg, Pa.

Deputy Treasurer-General—Col. O. D. Clark, Montpelier, Vt.

Chaplain-General—Capt. Henry A. F. Hoyt, Cynwyd, Pa.

Historian-General—Capt. Edw. H. Smith, U. S. V., Oshkosh, Wis.

Recorder-General—Maj. Guy A. Boyle, Indianapolis, Ind.

Commanderies have been established in twenty-one states. Total membership about 1,400.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names as well as the services of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain or shall serve in future campaigns recognized by the United States government as war with foreign powers. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

THE DANBURY HATTERS' CASE.

court decided that the Sherman law was inapplicable and dismissed the case. The Court of Appeals, however, certified the suit to the United States Supreme court, and that tribunal, Feb. 3, 1908, reversed the decision of the Circuit court, deciding, without a dissenting voice, that boycotting, where it affected interstate commerce, was in violation of the Sherman antitrust act.

The case then went back to the Circuit court, and after a trial lasting eleven weeks resulted Feb. 4, 1910, in a verdict for \$74,000 damages for the plaintiff. An appeal was taken and the case was sent to the United States District court, with the result stated above. It was again taken to the United States Court of Appeals in New York, which in a decision announced Dec. 18, 1913, affirmed the judgment in favor of D. E. Loewe & Co. and against the hatters' organization for \$252,130. With interest and costs the judgment amounted to \$272,000. The plaintiffs were backed by the Antiboycott society and the defendants by the American Federation of Labor.

WORLD'S TOUR OF BALL TEAMS.

The New York Giants of the National league and the White Sox of the American league returned to New York from their trip around the world March 6, 1914. The start was made from Cincinnati, O., Oct. 18, 1913, and after a long series of exhibition games the party sailed from Victoria, B. C., Nov. 19. Yokohama was reached Dec. 6, after an exceptionally rough voyage. From Japan the itinerary carried the tourists to China, the Philippines, Australia, New Zealand, Ceylon, Egypt, Italy, France and England. The largest attendance recorded was in Japan, Australia and England. King George was a spectator at the game played in London Feb. 6 when, in the presence of a crowd of 30,000, the White Sox defeated the Giants by a score of 5 to 4 in the eleventh inning. Out of the forty-six games played on the tour the American league team won twenty-four and the Giants twenty-two games ending in ties.

The White Sox team was led by its owner, President Charles A. Comiskey, and the New York Giants by Manager John J. McGraw. The party making the tour numbered sixty-seven in all. The players numbered twenty-three and included the following:

New York Giants—Pitchers, George Wiltse, Bunny Hearn; catcher, Ivy Wingo; 1st base, Fred Merkle; 2nd base, Larry Doyle; shortstop, Mike Doolin; 3d base, John Lobert; outfielders, Mike Donlin, Jim Thorne, Lee Magee.

Chicago White Sox—Pitchers, Walter Leverenz, Jim Scott, Joe Benz; catchers, Jack Bliss, Andy Sligh; 1st base, Tom Daly; 2d base, Herman Schaefer; 3d base, Dick Egan; shortstop, Buck Weaver; outfielders, James J. Callahan, Steve Evans, Sam Crawford, Tris Speaker.

Financially the tour was a success, owing chiefly to the large receipts at the home exhibition games. It was announced that the profits amounted to about \$75,000.

The first baseball world tour was made in 1885-1889 by the Chicago and All-American teams. It was organized and managed by Albert G. Spalding.

The Princeton freshmen defeated Pennsylvania by three lengths in 9:46.

ANNAPOLIS-PENNSYLVANIA.

In a race between the Pennsylvania and Annapolis (navy) eights on the Severn river at Annapolis, Md., April 18, 1914, the Pennsylvania varsity crew won by two lengths covering the 15-16 miles or Henley course on the Severn river in 7:42. The Pennsylvania freshmen defeated the navy "plebes" by a third of a boat length in 8:29½. The slow time was caused by heavy adverse wind and tide.

SOUTHWESTERN REGATTA.

The annual regatta of the Southwestern Amateur Rowing association took place at Creve Coeur lake, near St. Louis, Mo., July 17-18, 1914. The Western Rowing club of St. Louis won the senior six oared barge race distance ¾ mile in 4:02½. It also won, by two feet, the ¼ mile dash for fours in 2:36 and the senior four oared shell race in which the time was not announced. In the four oared shell event on the first day of the regatta the Lincoln Park Boat Club of Chicago defeated the Westerns by two feet in 8:51½.

CANOEING.

Leo Friede of the Manhattan Canoe club, New York, again successfully defended the trophy emblematic of the international sailing canoe championship by defeating Ralph B. Britton of the Gananoque Canoe and Motor Boat club of Gananoque, Ont., at New York, July 18. In the first race over a five mile course Friede won by a margin of five minutes. In the second race he covered the course in 2:04:46 and finished nearly seven and a half minutes ahead of Britton. Two out of three races determined the winner.

SCULLING.

Ernest Barry of London, England, champion professional sculler of the world, retained his title by defeating James Padden of Australia by four lengths over the Putney-Mortlake course on the Thames, England, Sept. 7, 1914. He also won a stake of \$5,000.

YACHTING.

THE AMERICA'S CUP.

The New York Yacht club and the Royal Ulster Yacht club, representing Sir Thomas Lipton, reached an agreement in July, 1913, to contest for the historic America's cup in September, 1914. Owing chiefly to a disagreement as to the size of the competing boats, no races for the trophy have been sailed since 1903. Sir Thomas Lipton proposed that the yachts be limited to seventy-five feet on the water line. According to the deed of gift, the defending club has the right to select a vessel of such size as it pleases, provided it be not less than sixty-five nor more than ninety feet on the water line, and the New York Yacht club was therefore unwilling to meet the condition proposed. July 20, 1913, the Ulster Yacht club of Belfast cabled that the conditions prescribed by the New York Yacht club had been accepted and signed.

Sir Thomas Lipton's challenger, Shamrock IV., arrived at New York Aug. 16, 1914, after making most of the voyage from England under its own sail, coming by way of the Azores and Bermuda. In the meantime the war in Europe had broken out and to avoid possible capture by German cruisers the yacht was towed from Bermuda to Sandy Hook. It was decided by Sir Thomas that under the circumstances it would not be advisable to attempt a race in 1914, and with the consent of the New York Yacht club it was postponed until 1915. The Shamrock IV. was laid up in a south Brooklyn shipyard for the winter.

In America three contenders for the honor of meeting the British yacht had been constructed. These were the Resolute, designed and built at the Herreshoff yards at Bristol, R. I., and the Vanitie, built for Alexander S. Cochrane, and the Owen boat, *Defiance*. In the trial races, which were not completed, the Resolute made rather the best showing and would probably have been selected to represent America. In one of the trials, June 10, it sailed over a windward and leeward course of fifteen miles in 3:16.41, a record better than any made over that kind of course in the America cup races.

RECORD OF RACES TO DATE.

1851—Aug. 22. In this, the year of the great exhibition in London, the Royal Yacht Club of England offered a cup to the winner of a yacht race around the Isle of Wight. The course was 60 miles in length. The race was won by the schooner yacht *America*, designed by George Steers for John C. Stevens of the New York Yacht club. The *America* was 94 feet over all, 88 feet on the water line, 22½ feet beam and 11½ feet draft. There was no time allowance and the competing yachts ranged in size from a three-masted 392-ton schooner, the *Brilliant*, to the 47-ton cutter the *Aurora*, which came in second in the race. The time of the *America* was 40 hours and 34 minutes; that of the *Aurora* was 24 minutes slower. The cup after that became known as the America's cup and has now been successfully defended for sixty-two years.

HARMSWORTH CUP.

There was no contest for the Harmsworth cup in 1914 owing to the outbreak of the European war. America was to have been represented by Disturber IV., a powerful hydroaeroplane built for James A. Pugh of Chicago. He took the craft to England, but had to bring it back to America without having had a chance to test it in a race.

MISSISSIPPI VALLEY REGATTA.
The seventh annual regatta of the Mississippi Valley Power Boat association took place at Peoria, Ill., July 2-4, 1914. The best performance was by Baby Speed Demon, owned by A. G. Smith of Algonac, Mich., which in four mile trials against time July 4 averaged 53.53 miles an hour. The fastest mile was made going down stream—1:06 or at the rate of 54.54 miles an hour. Baby Speed Demon won the Webb trophy and \$1,000 prize by taking the free for all championship class race in two straight heats. The Kitty Hawk, owned by H. H. Timken of Canton, O., also made a mile down stream in 1:06, but the timing was disputed.

CAMDEN-BALTIMORE OCEAN RACE.
In a power boat race from Camden, N. J., to Baltimore, Md., a distance of 368½ nautical miles, July 22-23, 1914, the Flyaway III., a 38 footer, was the victor in 23 hours 50 minutes. The competing craft finished as follows:
